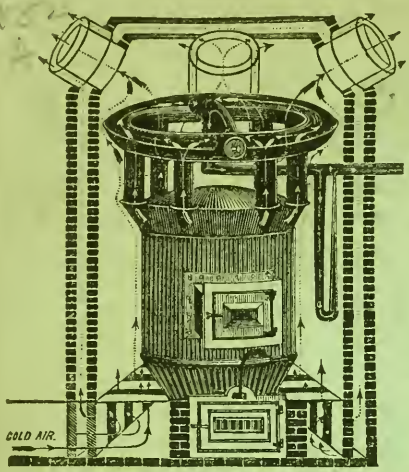
THE WORLD'S FAIR PRIZE MEDAL,

AWARDED TO

Chilson's Patent Air-Warming and Ventilating Furnaces.



The following are among the important improvements attained by these Furnaces:

1st. An abundant supply of fresh, healthful, warm air, free from *red hot iron heat, so injurious to health.*

2d. The great power of these Furnaces in Warming Buildings, is a conclusive proof that all the heat from the fuel is used in warming the rooms, which accounts for their economy in fuel.

3d. By these Furnaces and the plan of setting the same, there is not a possibility of setting the buildings on fire in which they are located.

4th. These Furnaces are completely adapted for burning any kind of fuel, — *Anthracite or Bituminous Coals, Wood, &c.*

5th. The substantial material and plan of construction of these Furnaces, render them durable beyond a doubt for a life time.

6th. The facility and ease of management, and ready access for cleaning out the Furnace, &c., are unsurpassed.

7th. The plan for making the joints of the Furnace proof against the escape of smoke and gas, is in every respect perfect.

8th. Fire may be kept in these Furnaces from Fall until Spring, by replenishing but once a day.

These Furnaces have been thoroughly tested in all parts of the country, and are now declared to be the best in the world. They have been awarded the **HIGHEST PREMIUMS,** (Gold and Silver Medals,) at the principal FAIRS in this country; which, with the unanimous reports in their favor, by the different Committees of the State and City Governments, (see their various printed reports,) together with the certificates and recommendations of more than eleven hundred persons who have them in use, (many of whom are professional gentlemen, whose scientific attainments in such matters are well known,) have combined to render these Furnaces unrivalled in this country. The WORLD'S JURY AT THE LONDON FAIR have also declared them to be the BEST IN THE WORLD. The unparalleled success and favor this Furnace meets with in this country and Europe is very gratifying to the inventor, whose practical experience and personal attention to the subject of WARMING AND VENTILATING BUILDINGS, is unsurpassed. All persons desirous of having a pure, fresh, healthful, warm atmosphere in their Dwellings, Churches, School-Houses, Court-Houses, Hospitals, Stores, &c., free from the injurious effects of red hot iron heat or coal gas so common to the Iron Heaters, will find an Apparatus at our Store, in every way suited to their wants.

We are now fully prepared to erect in both Public and Private Buildings, every variety of our WARMING AND VENTILATING APPARATUS. We give our personal attention, or printed directions, for the erection of the same in any part of the World. Also, a full and extensive assortment of REGISTERS, HOT-AIR GRATES, EMERSON'S VENTILATORS, and every variety of COOKING RANGES, including CHILSON'S PORTABLE RANGE, STOVES, GRATES, &c.

We have a splendid assortment of the various sizes of those beautiful Metallic or Mirror Marble CHIMNEY PIECES. Also, an extensive assortment of the latest styles of European and American Patterns of PARLOR & CHAMBER FRAME GRATES.

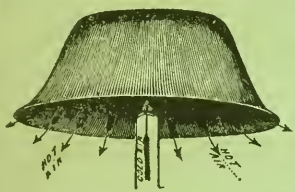
THE TRIO VENTILATING STOVE,

INVENTED BY

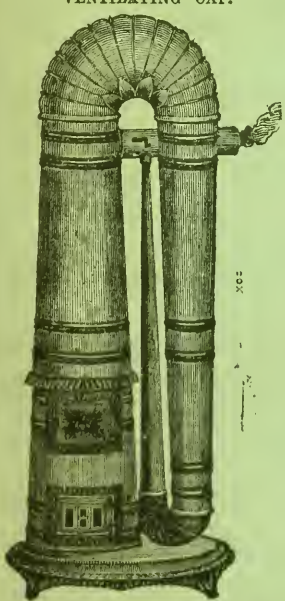
GARDNER CHILSON,

Patented Sept. 16, 1851.

The Stove can be used with or without the Ventilating Cap.



VENTILATING CAP.

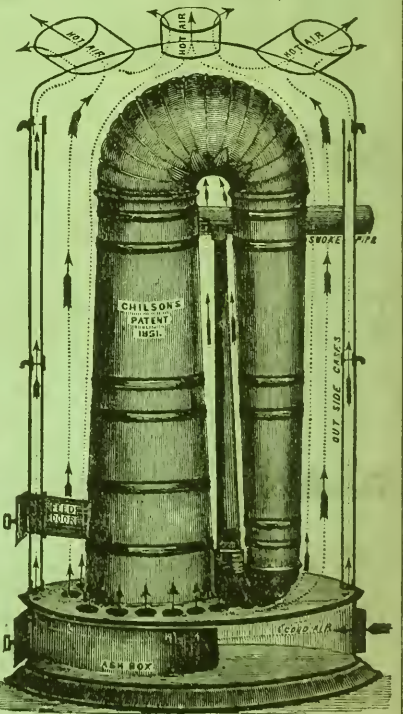


The Cut of this wonderfully operating Stove, will enable every intelligent mind to comprehend the great results which must be accomplished by this invention.

It secures in the room the entire heat from the fuel consumed; the heated smoke and gases are confined directly over the fire, and compressed into and forced to impinge their heat against the continuous tapering radiating surface; entirely exhausting every thing combustible by a very slow process of reducing the coal to ashes. As soon as the fire is kindled, close the damper in the smoke-pipe *wholly;* the radiator then becomes filled at once with the heated elements, the pressure being such as to cause the heated smoke and gases to settle down upon or in contact with the ignited coal, thus entirely consuming the smoke and gases. The floor is warmed some eight or ten feet around the Stove, yet the hand may rest on the smoke-pipe, three feet from the Stove.

No clinkers or cinders can be formed in this Stove. Fire may be kept from Fall until Spring, by replenishing once in from 24 to 48 hours, according to usage.

When Ventilation is required, (which should be in every room,) there is a Ventilating Cap, (see Cut,) and Cold Air Pipe for the introduction of Cold Air from out of doors. From 50 to 75 per cent. of the fuel commonly used is saved by this arrangement.



We have four sizes of PORTABLE FURNACES just completed (1852) on this principle, which greatly surpasses all former inventions for Portable Furnaces.

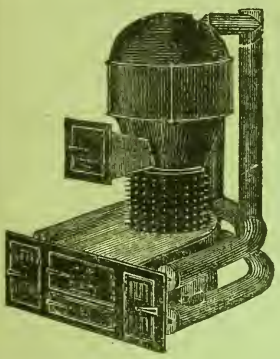
HERMAN'S

CELEBRATED

PREMIUM HOT-AIR FURNACES.



These celebrated Furnaces, which have stood the test of more than fourteen years, are now offered to the public with very recent improvements, which render them unrivalled in all the qualities which constitute a perfect Furnace. The Fire Pot is cast with elongated cones running into the Air Chamber, which insure its durability and make it vastly superior to other pattern fire pots. A new mode of retaining the heat in the Air Chamber, and securing a larger radiating surface than formerly, has been invented, and an arrangement to remove the ashes from the radiator, without entering the Furnace or disturbing the brick work, has been adopted.

More of these Furnaces than of any other kind, have been put up in this city and vicinity, and are giving unrivalled satisfaction.

ALSO, FOR SALE, an extensive assortment of new and beautiful pattern Liverpool, Berlin and other **GRATES**, together with an extensive variety of **COOKING RANGES**, Parlor, Office and Cooking **STOVES, VENTILATORS, &c.**

MASSACHUSETTS REGISTER AND RECORD.

The many material changes that have been made this year in the Massachusetts Register, or Record, render the issue of this year's volume a very fitting occasion for giving a brief historical account of this annual.

It was first issued in 1767 by its publishers, Mein & Fleeming, at the London Book Store, North side of King street, (now State street,) under the name of "Mein and Fleeming's Register for New-England and Nova-Scotia."

In 1769, Edes & Gill, in Queen street, and T. & J. Fleet, at the Heart and Crown, in Cornhill, published "Edes & Gill's North American Almanack and Massachusetts Register," printed upon paper manufactured in this country.

In 1774, under the name of "Mills & Hicks's British and American Register, with an Almanac, &c." it was published by Mills & Hicks, in School street, next door to Brackett's Tavern, sign of Cromwell's Head.

In 1779, Thomas & John Fleet became the publishers, at the sign of the Bible and Heart, at the corner of Cornhill and Water streets, and during the time of their publication, it was called "A Pocket Almanack."

In 1801, John West, and Manning and Loring, commenced its publication, as "The Massachusetts Register and United States Calendar," which they continued until 1813, when it passed into the hands of West, Richardson & Lord, and James Loring. Mr. Loring continued its publication for forty-seven years, in small duodecimo volumes, the last issue under his care being the volume for the year 1847.

In 1847, the Massachusetts State Record, in duodecimo form, was published by James French, under the editorial management of Nahum Capen. The old Massachusetts Register was merged into the State Record in 1848, and has been continued annually to this time by the same editor and publisher,—having been issued five years.

This year, 1852, the interest and good will of the Massachusetts State Record being purchased by the present publisher, it appears in an enlarged form; and it being the eighty-sixth year of the annual publication of this work, although in different forms, it has been deemed proper to give this volume its true serial number, 86.

The Record of this year, in much enlarged form, (octavo,) contains, besides its usual interesting matter, a BUSINESS DIRECTORY of the entire State, thereby rendering it more valuable to the business community.

It will be the aim of the publisher to make various improvements in the future numbers, in order to make the work a fair exposition of the unequalled institutions which Massachusetts so nobly sustains, and the important business enterprises which tend so essentially to the prosperity of the Commonwealth.

Our grateful acknowledgments are due to numerous friends who have very kindly furnished valuable information. The interest evinced in the work by the public, will serve as a powerful incentive to make it worthy of continued favor. Special acknowledgments are due to Nathaniel B. Shurtleff, M. D., Hon. Philo Leach, Hon. John P. Bigelow, Nahum Capen, Esq., Charles Hale, Esq., Charles Mayo, Esq., B. H. Currier, Esq., Chauncy Smith, Esq., of the P. O. Department, Washington, D. C.; Timothy Reed, Esq., Rev. Luther Bailey, J. H. Buckingham, Esq., Ferrand F. Merrill, Montpelier, Secretary of State, Vt.; John G. Sawyer, Augusta, Secretary of State, Me.; Hon. Asa Potter, Providence, Secretary of State, R. I.; John P. C. Mather, New London, Secretary of State, Connecticut.

That errors have occurred in this volume, must be expected, when the great amount of labor necessary to the remodelling of the work is taken into consideration. For these unavoidable faults the indulgence of the public is asked, with the assurance, on our part, that future numbers shall be as accurate as such works can be made with industry and zeal.

Having sold the copy-right of the "Massachusetts State Record and New England Register" to MR. GEORGE ADAMS, publisher of the "Boston Directory," I cheerfully recommend him as my successor. His long experience and thorough acquaintance with business of this kind, amply qualify him to produce a work that will unquestionably give entire satisfaction to the public. NAHUM CAPEN.

Having sold MR. GEORGE ADAMS the right to publish the "Massachusetts State Record," I most cheerfully recommend the work as containing a large amount of valuable information, and its publisher as worthy of a liberal patronage. JAMES FRENCH.

Entered according to Act of Congress, in the year 1852, by GEORGE ADAMS, in the Clerk's Office of the District Court of the District of Massachusetts.

TO BUSINESS MEN.

The character of the MASSACHUSETTS REGISTER commends itself to merchants, manufacturers, and others, as a means of communication with the public. To those who would introduce their business to every portion of the Commonwealth, it is offered as a desirable medium for that purpose. It is our design to make the work a register of the business, as well as a record of the political and social character of the State.

Communications upon business operations, addressed to the publisher, will receive immediate attention.

BOSTON DIRECTORY, 1852-3,

Will be published July 1, 1852. To the usual variety of valuable business and miscellaneous information, will be added some new features of interest. The work will continue to represent, as fully as possible, the Institutions and Business of the growing metropolis of New England. Statistical information and notices, from parties in the city or country, sent in during its publication in May, 1852, will be in season for the work. (400 pages, octavo, $1.25.)

TITLES AND ABSTRACTS OF THE LAWS AND RESOLVES

Passed by the Legislature of Massachusetts, at the Session of 1851.

We give below the full title of all the acts and resolves passed at the last session of the Massachusetts Legislature, accompanied by carefully prepared notes and abstracts, which will generally be found to embrace all the information in regard to them which is likely to be desired.

The numbers placed before the title of the acts and resolves show the order of their approval by the Governor, and correspond with the numbers of the chapter which each makes in the Code of "Acts and Resolves" for the year 1851. The date in the brackets after the name of the law shows the time of its approval by the Governor. The letter [G] is placed before the titles of those laws which are included by the Secretary of the Commonwealth in the list of "General" Laws and Resolves.

The letter [P] at the end of the abstract of an act shows that it is to take effect from and after its passage, which is considered cotemporaneous with its approval by the Governor, as indicated by the date in the brackets. All the other acts and resolves, in accordance with the general provisions of the Revised Statutes, take effect on the thirtieth day after their passage, unless some other time is expressly mentioned, in which case it is here given.

All the acts of incorporation contain a proviso that none of the shares shall be issued for less than their par value; the acts for the extension of wharves, a proviso that the legal rights of no person shall be by such extension interfered with; the acts for increase of bank capital, provide that the new capital shall be subject to the same tax, regulations, restrictions and provisions as the old; and there are various other general provisions which, being common to all laws of a kindred nature, are not included in the abstracts below. The par value of the shares in all corporations is $100, unless otherwise expressly stated.

267. [G.] *An Act to authorize the business of banking.*—[May 24.]—Any persons, not less than fifty in number, may associate for the business of banking, and be entitled to all the powers and privileges, and be subject to all the restrictions and liabilities set forth in the statutes relative to banking, the capital stock to be not less than $100,000, nor more than one million of dollars. The capital stock of the bank is to be divided into shares of one hundred dollars each, transferable only at its banking house and on its books; and to be paid in such instalments, in gold and silver money, and at such times as the stockholders may direct; *provided*, that one half of the capital stock shall be paid in before the bank goes into operation, and the whole within one year. A certificate stating the corporate name, the place of location, amount of capital stock, number of shares and shareholders, and time when to go into operation, is to be filed with the register of deeds and secretary of the commonwealth. The capital stock may be increased. The banks to carry on the business of banking, at their banking house, but not elsewhere. The auditor of accounts is required to provide such circulating notes, in blank, as may be necessary to carry out the provisions of the act, and is required to countersign them on delivery, and keep a proper record in his office. The auditor is authorized to receive the public stock in pledge of any city or town of this State, or of Massachusetts, or of the other New England States, or of New York, or of the United States, at not above its par value nor under its current market value; and whenever any bank shall deposit such stock to an amount not less than fifty thousand dollars, and not more than twenty-five per cent. above its capital, the auditor is authorized to deliver an equal amount of bills, which are to be labelled, "Secured by the pledge of public stock." The auditor may change the notes and rates, provided that the amount standing pledged shall always remain not less than fifty thousand dollars. The auditor, unless the public safety requires the same to be revoked, may deliver to any bank powers of attorney to receive interest on the stocks deposited as security for the notes delivered to such bank. The banks, after signing such notes as required by law to make them promissory notes payable on demand at their banking house, may circulate the same as money: but may not issue any other circulating notes. Provision is made for the redemption of such notes, out of the funds in his hands, by the auditor, whenever any bank refuses to pay specie for them. Such banks are excepted from the provisions contained in sec. 4 and 8 of 36th chapter of Revised Statutes, and sec. 11 of 93d chapter of the statutes of 1843. The auditor is to keep the plates and dies used in making bills, under his direction, although the banks using them are to pay the expenses. The auditor is subject to a penalty of five thousand dollars and imprisonment, in case he wilfully delivers to any bank a greater amount of circulating notes than it has deposited stocks in pledge of their redemption. In addition to the returns now required by law, such banks shall specify and describe the amount of stock deposited with the auditor. The Secretary of the Commonwealth is to prepare a separate abstract of the returns of the banks formed under this Act. The Bank Commissioners to have the same power over the banks formed under this Act as they shall have over the incorporated banks. When any bank desiring to relinquish its business, shall have redeemed and returned at least ninety per cent. of the bank notes it shall have received, and shall deposit the remaining ten per cent., the pledged stock shall be given up. Whenever any justice of the Supreme Court shall be satisfied from the certificate of the auditor, or otherwise, that any such bank is unsafe, the same proceedings may be had as are now provided in reference to the incorporated banks, and the assets of such bank may be transferred to the hands of the receivers, to be by them applied to the redemption of the notes. This Act may be altered or repealed by the legislature.

339. [G.] *An Act in addition to an Act concerning Banks and Banking.*—[May 24.]—Any bank refusing to comply with the conditions of the bank law of 1838 shall forfeit not more than $500. Act to take effect Oct. 1, 1851.

340. [G.] *An Act to exempt from levy on execution the homestead of a householder having a family.*—[May 24.]—In addition to the property already by law thus exempted, there shall be exempted the lot and buildings thereon occupied by the debtor as a residence, or buildings on land not his own, to the value of $500, he being a householder having a family; and after his death the exemption shall continue to his widow and children, till her death and till the youngest child becomes twenty-one years of age, if some one of them continues to occupy the homestead. To entitle any property to this exemption, it must be set forth in the deed of purchase that it is designed to be held as a homestead under this Act: or, if already purchased, this design must be recorded in the registry of deeds. No property shall be thus exempted from a levy for taxes, or for a debt contracted in its purchase, or contracted before the record of the design in writing, as above. No conveyance by the husband of any property thus exempted shall be valid, unless the wife join therein. In case the creditor insists that the property claimed to be exempted is worth more than $500, appraisers shall be appointed, and if they value the premises at more than $500, they may set off a part if they can be conveniently divided; otherwise, the debtor may pay the creditor the excess of their valuation over $500, or the property shall be sold at public auction, if more than $500 be bid, and of this money $500 be paid to the debtor to be exempted from liability for his debts for one year.

341. *An Act to authorize the Essex Railroad Company to issue bonds.*—[May 24.]—To an amount not exceeding $350,000, in sums of not less than $100, payable in ten years, with interest semiannually; and for security, may mortgage their road, franchise, etc., to three trustees elected by the bondholders; the mortgage not to be valid till bonds to $80,000 have been disposed of and every creditor has had an opportunity to take bonds. The trustees shall appropriate the money received from the bonds, to the payment, first, of land damages; second, expenses of second track, and Salem depot; third, present mortgages; fourth, other debts.

342. [G.] *An Act to appoint a board of commissioners in relation to alien passengers and State paupers.*—[May 24.]—The Governor, annually, in January, shall appoint a member of his Council, who, with the Auditor and the Boston Superintendent of Alien Passengers, shall constitute a board to superintend the execution of the laws concerning alien passengers and State paupers. The board may appoint persons to visit at least once in every year all the places in the Commonwealth where State paupers may be, and report; and to ascertain the names of foreigners landed, and identify them if they become a public charge. Officers of railroad corporations, and of other lines of conveyance are required to furnish information as far as in their power, under liability to a fine of $20. Aliens brought into the State by such lines, if they become a public charge, shall be chargeable to the corporations. Commissioners shall make annual reports, and have such compensation as the Governor and Council allow, not to exceed $3 a day, and travelling and board expenses. [P.]

343. [G.] *An Act to secure to mechanics and laborers their payment for labor by a lien on real estate.*—[May 24.]—Any person actually performing labor on a building shall have a lien, to secure the payment of his wages, on the building and the lot of land on which it stands, and on the right of redeeming it when under mortgage; which lien shall be dissolved unless he files an account of his demand in the registry of deeds within sixty days, and commences a suit for enforcing it within seventy days from the time the labor is performed.

344. *An Act to incorporate the New England Ice Co.*—[May 24.]—In Boston. Capital, $60,000.

345. *An Act authorizing the County Commissioners for the county of Essex to locate a way over Parker River.*—[May 24.]—The Commonwealth surrenders to the county all its right to the bridge of the Parker River Bridge Corporation; and the inhabitants of Newbury may collect the same tolls which were allowed to the corporation, for ten years. [*See Resolves, No.* 51.]

346. [G.] *An Act relating to the punishment for offences mentioned in the 143d chapter of the Revised Statutes.*—[May 24.]—Authorizes committal to the House of Industry, in certain cases, instead of House of Correction. [P.]

347. *An Act to incorporate the trustees of the Atkinson School Fund.*—[May 24.]—In Newburyport. May hold real and personal estate, of not more than $1000 income, to be applied exclusively to the purposes of education, in conformity with the will of the late Moses Atkinson. Mayor and Aldermen of the city may fill vacancies, and be visitors of the fund. [P.]

348. [G.] *An Act concerning the indictment of Corporations.*—[May 24.]—Default may be recorded of any indicted corporation which has failed to appear, and judgment rendered, and warrant of distress issued to compel the payment of the lawful penalty and costs, with interest. [P.]

349. [G.] *An Act in addition to the several Acts for the relief of insolvent debtors, and the more equal distribution of their effects.*—[May 24.]—When the creditor of an insolvent debtor resides abroad, the oath to the validity of the claim may be made by his consignee or agent. The commissioner may dismiss any assignee neglecting his lawful orders, and appoint another. Limit of the fees of commissioners to $1500, repealed. [*See Nos.* 189 *and* 322.]

LEGISLATIVE PROCEEDINGS.

The Massachusetts Legislature, or "General Court," assembled at the State House in Boston, for the session of 1851, in accordance with the Constitution, on the first day of January,—the first Wednesday of the year falling on the first of the month—at eleven o'clock in the forenoon, and were prorogued on Saturday, May 24, at eleven o'clock, P. M. The session accordingly lasted 144 days.

By the following table it appears that this session of the Legislature was longer than any other that has been held for twenty years, or since the amendment to the Constitution, by which the sessions have been annual and have commenced in January.

* Also Extra Session, Sept. 2 to Nov. 4, making 125 days.
† " " " " 7 to Sept. 16, " 68 "
‡ " " " Nov. 23 to Nov. 25, " 130 "

The length of individual day's sessions, in several instances, was quite unprecedented. On one occasion, the House sat from 11 A. M. (Feb. 10,) to 3½ A. M. of the next day,—16½ hours *without any recess.* April 23, the House sat from 9 A. M. to 8¼ P. M., likewise without any recess. On several other occasions the sessions were protracted to an unusually late hour. The yeas and nays were called in the House forty-one times during the session, from forty to a hundred minutes being required for the operation each time.

The Senate began its daily sessions at 11, till May 5, when 10 was adopted as the hour. Afternoon and evening sessions were held during the last week.

The daily sessions of the House were begun at 11 A. M. till March 10, when the hour was changed to 10, and so continued till April 15, when 9 was adopted. Afternoon sessions beginning at 3, were held daily from and after May 1, and evening sessions during the last week.

Neither House was in session on Sundays, nor on Saturday and Monday, Jan. 18th and 20th, (on account of the Congressional Election on the latter day,)—nor on Saturday and Monday, March 1st and 3d, (on account of the various town meetings on the latter day,)—nor on Monday, April 7, (for the same reason.)—nor on Thursday, April 10, (that being Fast Day.)

This session of the Legislature was one of the most important that has been held for many years. The abstracts of the laws passed, above, will show what was actually accomplished in that way. We give below some account of the proceedings in other respects, embracing the elections of public officers, notices of unsuccessful bills, and some statistics collected from reports made to the Legislature.

Organization of the two Houses.—The Senate was called to order Jan. 1, by Hon. DAVID SEARS, the Senior member present, and organized by the choice of Hon. HENRY WILSON as President, he having 18 votes out of 28, and Chauncy L. Knapp as clerk, he having 20 votes against 12 for Charles Calhoun.

The House was called to order by Hon. LEONARD M. PARKER, of Shirley, the Senior member, and organized by the choice of NATHANIEL P. BANKS.

Jr., of Waltham, for Speaker, he having 212 votes, against 174 for Ensign H. Kellogg, of Pittsfield; and of Lewis Josselyn, of Lynn, for Clerk, he having 198 votes against 185 for Charles W. Storey, of Roxbury.

Jan. 3. Rev. A. L. Stone was chosen chaplain of the Senate, having 18 votes out of 29. Rev. Hosea Ballou had 6; Rev. Artemas B. Muzzey, 4; Rev. Henry M. Dexter, 1. The same day Rev. George M. Randall was declared elected chaplain of the House, he having 121 votes out of 353, there being twelve other persons voted for. It was voted that the person having the highest number should be declared elected.

Jan. 7. Benjamin Stevens was chosen Sergeant-at-Arms, on the part of the House, he having 331 votes out of 333; and the next day he was chosen on the part of the Senate, having 28 votes, all that were thrown.

The Election Sermon was preached to the Governor and members of the Legislature, at the Old South Church, by Prof. E. A. Park, of Andover, on Jan. 2d.

Organization of the Executive. — The whole number of votes thrown by the people for Governor was 121,372. George N. Briggs had 56,778; George S. Boutwell, 36,023; Stephen C. Phillips, 27,636; Francis Cogswell, 689; Scattering, 239. There being no choice of Governor and Lieutenant-Governor by the people, the House proceeded, Jan. 10, to elect from among the four persons having the highest number for each office, two to send to the Senate.

The constitutional candidates for Governor were George N. Briggs, Geoorge S. Boutwell, Stephen C. Phillips, and Francis Coggswell. From these, Messrs. Boutwell and Phillips were selected to be sent to the Senate, the former having 218, and the latter 216 votes, against 171 and 170, respectively, for Mr. Briggs.

The constitutional candidates for Lieutenant-Governor were, John Reed, Henry W. Cushman, Amasa Walker, and Henry C. Cushman. From these, Messrs. H. W. Cushman and Walker were selected, having each 214 votes against 166 and 154, respectively, for Mr. Reed.

On the 11th of January the Senate proceeded to elect from the candidates thus presented to them. *George S. Boutwell* was chosen Governor, having 32 votes, all that were thrown, except three blanks not counted. *Henry W. Cushman* was chosen Lieutenant-Governor, having 29 votes, likewise all that were thrown, except five blanks not counted.

Jan. 13. The organization of the Executive part of the Government was completed by the choice of nine Councillors by joint ballot of the two Houses in Convention. Six of them were qualified in Convention, on Jan. 15, two Jan. 21, and one Jan. 29.

The same day, Jan. 13, the Governor and Lieutenant-Governor were sworn to the faithful discharge of their duties, and to support the Constitution of Massachusetts and of the United States.

The Governor delivered his message in person, on Jan. 16th.

Jan. 14. Amasa Walker was chosen Secretary of the Commonwealth, receiving 230 votes out of 413, and Charles B. Hall was chosen Treasurer and Receiver-General, receiving 230 votes out of 414. Feb. 28, David Wilder, Jr., was chosen Auditor of Accounts, receiving 251 votes out of 279. These elections were made by joint ballot, in convention.

Contested Elections.—By the Constitution, each House of the Legislature is the judge of the elections, returns, and qualifications of its own members. During the session, eight cases of contested seats were settled in the House, which, on account of the evenness of parties in that branch, excited particular interest.

1. The first case brought to the attention of the House was that of *Nathaniel Clark*, claiming a seat as Representative to the General Court from Natick. At the election, in the box for votes for Representative to the General Court, there were found nine printed votes, bearing the designation "for Representative in Congress," six with the name of "Horace Mann, of Newton," and three with that of "Samuel H. Walley, of Roxbury," neither of whom were eligible as representatives to the Legislature from Natick. All the other votes for representative to the Legislature were written. There was another box for votes for Representative in Congress. The Selectmen included these nine votes, and returned "no choice" as the result of the election. Jan. 8, the Committee on Elections reported that the nine votes should not have been counted in making up the number for Representative to the General Court, but should have been excluded, making the whole number of votes 463, necessary for a choice 232; and as Mr. Clark had 233, he was duly elected, and was entitled to a seat. The report was accepted the same day without much opposition.

2. The next case settled was that of Mr. *Bragg, of Milford.* By the State Census of May, 1850, on which the apportionment of representatives for the next ten years was based, Milford was entitled to but one representative. At the election, however, after the choice of one representative, it was voted to send another, and Mr. Bragg was then elected as the second. The ground for this proceeding was the belief that the assessors in making up their returns had committed some errors, and that the population was really enough to entitle the town to two representatives. The Committee on Elections reported, Jan. 31, that they had voted to give Mr. Bragg an opportunity to prove these errors; but he subsequently informed them that he apprehended he should not be able to make out so clear a case of errors as to warrant him in urging the propriety of going behind the census returns, and accordingly he should withdraw from the House forthwith. The Committee were thus relieved from a case of considerable embarrassment, and reported that the election of Mr. Bragg "was null and void, and that he is not entitled to a seat in this House." This report was accepted, Feb. 5.

3. The right of Mr. *Barry, of Hanover*, to his seat was disputed on the ground, that the election on Nov. 25, 1850, when he was elected, was null and void, because the warrants therefor were dated Nov. 16, 1850, and warned the inhabitants to meet on the "25th day of November *next*," which would strictly mean Nov. 25, 1851. Feb. 20, the Committee reported that the remonstrants had failed to make out a case, and that they have leave to withdraw. Feb. 28, this report was accepted.

4. The next case settled was that of Mr. *Rugg, of Sterling.* Feb. 19, the Committee reported that in their opinion, the decision of the case turned on the question whether the polls, at the third and final ballot, when Mr. R. was elected, were opened after five o'clock, P.M. After a careful examination and detail of the best of the contradictory evidence, they were of opinion that it was *before* 5; and accordingly reported that the remonstrants had failed to make out their case, and that the sitting member, Mr. Rugg, was duly elected, and was entitled to his seat. Feb. 27, this report was accepted; March 4, a motion to reconsider its acceptance was lost, 54 to 119.

5. The right of Mr. *Edwards, of West Newbury*, to his seat was disputed, on the ground that he did not have a majority of the whole number of votes, including two ballots found in the box for votes for Representative to the General Court,

bearing this designation, "for Representative to Congress for District No. 3, James H. Duncan, of Haverhill." The Selectmen had excluded these votes. The Committee reported that these two votes ought not to have been included in counting the whole number of votes for Representative to the General Court; consequently Mr. Edwards had a majority, and was legally chosen, and that the Selectmen did right in giving him a certificate of his election, and that he was entitled to his seat. March 4, this report was accepted.

6. The right of Mr. *Robinson, of Needham*, to his seat was disputed, on the ground that the names on the voting list were not checked at the third ballot, at which he was chosen. It was proved that the names were checked at the first ballot, but not on the other two; at which, however, the list was held by one of the Selectmen, who permitted no person to vote until it was ascertained that his name was on the list. This had always been the custom in Needham. There was no evidence of any fraud or double voting at any of the trials. The Committee reported that in their opinion the neglect of the Selectmen to check the voters' names according to law, ought not to operate to disfranchise the town, but that the penalty of $200 should apply to them as the only offending parties, and was a sufficient guaranty for the enforcement of a due observance of the law. Accordingly they reported that Mr. Robinson was duly and legally elected, and was entitled to his seat. April 18, an amendment that he was *not* entitled to his seat, was rejected, and the report, as above, was accepted.

7. The case next decided was that which excited most interest, and on which opinions most differed, viz., that of Mr. *Nye, of Plympton*. At the election, the first ballot for representative resulted in no choice. Motions to adjourn and to dissolve the meeting were made, put, and lost. The Selectmen then called for the votes for a second trial. About the same time a motion was made not to send a representative, but the evidence was very contradictory and conflicting, whether it was made before or after the second balloting had actually begun. The Selectmen ruled this motion out of order, on the ground that there was no article in the warrant for the meeting authorizing it to be put, and they refused to entertain it. The second balloting was proceeded with, and resulted in the election of Mr. Nye. The ground on which his right to his seat was disputed was, that this decision was wrong—that the motion not to send was proper, legal, and was made at a seasonable time, and ought to have been entertained; —that as the presiding officer refused to entertain it, all subsequent proceedings in electing a representative were illegal and void. On the other side, it was admitted that the reason given by the Selectmen for ruling out the motion was not sufficient, and that the motion was proper and legal, if made at the right time; but that it was not so made, if made after the balloting had begun, on which point the evidence was conflicting. It was urged that the testimony that it had begun, being positive, while that on the other side was negative, gave the former greater weight. Moreover, even if the motion was reasonable, and the Selectmen were wrong, their wrong decision honestly made, without fraud, ought not to invalidate the election and disfranchise the town; and, finally, that presumptions were in favor of Mr. Nye's right to his seat, so that it must be proved that there was sufficient informality to unseat him beyond a reasonable doubt—that any doubt should be in his favor. The testimony and arguments in the case were very voluminous. Jan. 30, the original report of the Committee was made, that the election was void, and declaring Mr. Nye's seat vacant. Feb. 5, the question was debated, and the next day, when the previous question was applied, 169 to 155, the report was accepted 179 to 164. Feb. 10, a motion to reconsider this vote occupied the attention of the House sixteen hours, and the next day it prevailed 194 to 179. The report was recommitted, with instructions to report additional evidence and the conclusions of fact and legal principles. March 27, the Committee reported again, adversely; a minority report being made at the same time on the other side. April 17, after some debate the previous question was applied; the report was amended, 162 to 154, by the substitution of the minority report, declaring Mr. Nye entitled to his seat, and in this form, was adopted, 155 to 141. April 19, a motion to reconsider this vote was debated, till the previous question was applied, and rejected 135 to 172. So Mr. Nye retained his seat.

8. The case of Rev. Mr. *Baker, of Georgetown*, turned on the question whether he had been a resident of Georgetown for one year previous to his election. He removed with his family from Essex, where he formerly resided, to Georgetown, just about a year before his election. The testimony was conflicting and uncertain, which town he actually resided in at election time. One member of the Committee being absent, the remainder were equally divided as to his right to his seat, and made two reports, April 11, to the House, one on each side. April 22, a motion to recommit these, with instructions to take the testimony of Mr. B. himself was lost, and after much discussion, at the suggestion of a member, he stated to the House his own opinion. He said that he had a very strong impression that he had begun his residence in Georgetown, Nov. 11, 1849, and that he did not vote, as was alleged, in Essex at the election of that year. Upon this, a motion to accept the adverse report was rejected, 141 to 153, and the other report, that he was entitled to his seat, was accepted, 156 to 139. April 24, a motion to reconsider this vote was lost, 142 to 173.

Decease of a Member.—But one member of the Legislature died during this session; Dr. John Spence, Jr., of Boston, died Feb. 8. This sad event was appropriately announced to the House, by his colleague, Mr. John P. Putnam, the same day; and that branch, after passing resolutions, adjourned, in respect to his memory. In the Senate, upon the receipt of the intelligence by message, Mr. Seaver made a few remarks, when that branch also adjourned.

Washington's Birthday.—The House, Feb. 22, after listening to some patriotic remarks from Gen. Cushing, of Newbury, at 12 o'clock, voted to adjourn "as a manifestation of veneration for the memory of the Great Founder of this republic—of respect to the Constitution—of profound and unradicable attachment to the Union—and of devotion to the principles of lofty regard for liberty, joined to order, which are consigned to us in the farewell address of the Father of his country."

Limitation of length of Speeches.—In the House, April 18, an order was submitted, that on and after the 24th, no member should speak more than ten minutes; which was laid over under the rules till the next day, and then rejected. May 15, a similar order, limiting the time to fifteen minutes, was adopted, 111 to 53,—but after trying its practical operation a few hours, this vote was reconsidered, 133 to 62, and the order was laid on the table.

Pay-roll.—The pay-roll of the Senate amounted to $12,158: and that of the House to $118,124; and there was allowed to Wm. H. Bradford, of Plymouth, his full pay and mileage, $300 (*Res. No.* 93), and to two members $147.50, on account of expenses of sickness (*Res. Nos.* 55. and 65), making the total pay of members of the House $118,571.50. In addition to this, $200 was paid to the Chaplains (*Res. No.* 74), $4,804 to the Clerks, $3,421 to Mes-

sengers, Doorkeepers, &c., and $50 to Preacher of the Election sermon—making the whole compensation to the members and officers of the Legislature, for the session, $139,204.50; there was also allowed to sundry members of the legislature of 1850 $264.70, on account of sickness, &c., making the total $139,469.20.

Massachusetts State Record. — In the House, May 13, it was "*Ordered*, that the Sergeant-at-Arms furnish to each member of the House, a copy of the Massachusetts State Record for 1851." A subsequent motion to reconsider this vote was lost.

Elections of Senators in the U. S. Congress.—In the House, Jan. 10, a motion was made "that 11½ o'clock the next day be especially assigned for the election of a Senator in the Congress of the United States for six years from and after the 4th day of March next." A motion to amend this by adding the words: "and in the election the roll of the House shall be called and each member shall give his vote *vivâ voce*," after a long debate, was lost, 129 to 181. The next day, the original motion was amended by substituting the 14th for the day of the election, and it was then adopted.

Accordingly, Jan. 14, two ballots were had for a Senator, but no choice was effected and the assignment was laid on the table, 189 to 157. Jan. 15, it was taken up, and a motion to postpone it to the next day being lost, 167 to 215, another unsuccessful ballot was had, when the House adjourned, 187 to 179. Jan. 16, two more ballots were had, and the further execution of the order was postponed for one week, 189 to 178. Jan. 23, three more ballots were had, and the House adjourned, 174 to 150. Jan. 24, two more ballots were had, and the further execution of the order was postponed two weeks, 188 to 182. Feb. 7, three more ballots were had, and the matter was postponed four days, 202 to 126. Feb. 11, it was postponed to the next day without discussion or opposition, the House then being engaged in the "Nye" election case. Feb. 12, a ballot was had, and the matter was postponed two weeks. Feb. 26, two more ballots were had, and the matter was postponed two weeks, 189 to 182. March 12, two more ballots were had, and a motion to postpone four weeks being lost, 182 to 195, the matter was postponed one week. March 19, a ballot was had, and the matter was postponed two weeks, 196 to 151. April 2, a motion to postpone four weeks was lost, 164 to 201; one to postpone two weeks was also lost, 162 to 180; a ballot was had, and the matter was postponed three weeks, 175 to 133. April 23, four ballots were had, the House remaining in session eleven hours. The next day, April 24, the consideration of the matter was resumed, when two ballots were had, at the latter of which, (being the 26th from the beginning,) *Charles Sumner, of Boston*, having received exactly the number of votes necessary to a choice, was declared elected on the part of the House. The following is a statement in a tabular form of all the ballots:

	January 14.		January 15.	January 16.		January 23.			January 24.		February 7.			February 12.	February 26.		March 12.		March 19.	April 2.	April 23.				April 24.

As is stated above, a proposition that the voting should be *vivâ voce* was rejected, before the ballotings began. The first three were conducted in the usual manner, by passing boxes round among the members of the House. Jan. 16, however, it was ordered that thereafter the members should deposit their votes at the table in front of the Speaker's desk, in presence of the House and under

the inspection of a committee, marching thereto, in order, by forms. This mode of conducting the ballots was used from the fourth to the thirteenth, inclusive; but after the eleventh ballot, Feb. 7, it was ordered that during the voting the floor should be cleared of all persons except members. Feb. 12, as an additional precaution, it was ordered that the Clerk call the names of the members in order, and check them as they deposited their votes; this was done from the fourteenth to the twenty-fifth ballot, inclusive. April 24, it was ordered that the votes should be enclosed in sealed envelopes before being deposited, and this mode was used at the twenty-sixth and final ballot.

Meanwhile, the Senate, Jan. 17, assigned the 22d for the election on their part of a Senator for six years from March 4, 1851. On that day it was ordered, 23 to 14, that the vote be taken *viva voce*, and the result was as follows:

For Charles Sumner—Messrs. Austin, Buckingham, Cazneau, Dean, Dewitt, Graves, Griswold, Howe, Kimball, Keyes, Morrison, Mosely, Robinson, Saunders, Taber, Usher, Warner, Welch, Wellington, Whitney, Wood of Plymouth, Wood of Worcester, Wilson [President],—23.

For Robert C. Winthrop—Messrs. Barney, Bassett, Boynton, Daniels, Hawley, Hilliard, Hubbard, Hyde, Kuhn, Newell, Russell, Sears, Seaver, Wilkins—14.

For Henry W. Bishop—Mr. Beach—1.

Absent—Messrs. Bigelow and Brown—2.

And accordingly *Charles Sumner* was thereupon declared elected, on the part of the Senate.

In the Senate, April 25, their Clerk was directed to notify His Excellency the Governor that Charles Sumner had been elected, by concurrent vote of both Houses, to be Senator in the Congress of the United States for six years from and after March 4, 1851. May 14, a communication was received from Mr. Sumner, signifying his acceptance of the office.

Election of Senator for the unexpired term.—In the House, Jan. 21, a message was received from the Governor, communicating the facts of the resignation of Hon. Daniel Webster, July 22, 1850, and the appointment, by Gov. Briggs, July 27, of Robert C. Winthrop, to be his successor "until the meeting of the Legislature," in accordance with the Constitution. A similar message was received by the Senate, Jan. 27, when that body proceeded to assign the next day for the choice of a Senator to fill the vacancy, the term expiring March 3, 1851; and it was ordered, 16 to 15, that the vote should be *viva voce*.

Accordingly the Senate proceeded to a ballot, Jan. 28, when Robert Rantoul, Jr., received 21 votes, Robert C. Winthrop 13, and Stephen C. Phillips 2; Messrs. Bigelow, Bassett and Robinson being absent, and there being also then a vacancy in the Senate, caused by the resignation of Mr. Taber, Mr. Rantoul received the vote of all the Senators present who voted for Mr. Sumner on the 22d, except Messrs. Buckingham and Morrison, who voted for Stephen C. Phillips, and also that of Mr. Beach, who before voted for Henry W. Bishop, and Mr. Brown, who was before absent. Mr. Winthrop received the votes of all the Senators present who voted for him on the 22d.

In the House, Jan. 29, the next day, was assigned for the choice, on the part of that body, to fill this vacancy. Jan. 30, the ballot was had, and resulted as follows: Whole number of votes, 372; necessary for a choice, 187. Robert Rantoul, Jr., had 187; Robert C. Winthrop, 173; George S. Boutwell, H. H. Childs, Josiah E. Abbott, Henry W. Bishop, 2 each; Charles Sumner, Stephen C. Phillips, Benjamin F. Hallett, Samuel D. Bradford, 1 each; and two blanks, not counted.

Accordingly *Robert Rantoul, Jr.*, of Beverly, was elected by the concurrent vote of the two Houses. His credentials were presented in the U. S. Senate Feb. 7, but he did not take his seat there till Feb. 22. His term expired March 4.

Time, place, and manner of elections of U. S. Senators.—In the House, May 19, a bill was reported "to define the time, place, and manner of holding elections for Senators in Congress," providing that whenever a U. S. Senator is to be chosen, the time shall be prescribed by joint resolution of the two branches of the Legislature; that he shall be chosen by concurrent vote of the two Houses, each voting separately, by *viva voce* vote; and in case of disagreement between the two Houses, the same proceedings to be repeated. May 22, this bill was refused a third reading, 51 to 57, and thus rejected.

Western Railroad Directors.—In convention of the two Houses, Feb. 14, J. S. C. Knowlton of Worcester, and Edward L. Keyes of Dedham, were elected Directors in the Western Railroad on behalf of the Commonwealth, the former receiving 203 and the latter 202 votes out of 391.

Preacher of the next Election Sermon.—The choice of this officer, by usage, rests with each branch of the Legislature in alternate years. Feb. 25, the House proceeded to his election for the year 1852. The whole number of votes was 320, of which Rev. Abel Stevens (Editor of the Zion's Herald and Wesleyan Journal) had 179, and was accordingly elected. The next day a note was received from him declining the office, and the House proceeded, March 5, to another election, when Rev. Rollin H. Neale received 106 out of 283 votes, and it was voted that he be declared elected.

Change in Election Day.—A proposed amendment to the Constitution, to change the day of the election for Governor, &c., to the Tuesday next after the first Monday in November annually, so as to correspond with the day required by the U. S. Law for the election for Presidential Electors, received the assent of the Senate, 24 to 8, on May 7, but was indefinitely postponed in the House, May 22.

County Officers.—In the House, Feb. 21, a bill was reported providing, as a uniform day for the election of all county officers, except in Suffolk and Nantucket, the first Monday in March. Feb. 28, a motion to amend by substituting for the day the second Monday in November was lost 26 to 114, and the bill was then indefinitely postponed, 100 to 41, and thus rejected.

Valuation of the State.—The valuation of the State, as made by the Valuation Committee of 1850, appointed to sit during the recess, was slightly amended, and adopted in the Senate, April 23, and in the House April 28. As finally established, the number of polls in the State is estimated at 245,-142, and the property is valued at $597,936,995.46. Of this, 33,705 polls and $217,587,172.00 are in Suffolk County.

Taxation of property of Corporations in the cities and towns where they are located.—In the Senate, Jan. 23, it was ordered that a joint special committee (*No.* 22) be raised to consider the expediency of providing by law so as to secure this object. March 28, the Committee reported a bill for the purpose, which was refused a third reading, April 1, 13 to 21, and thus rejected.

Taxation of Mortgaged Real Estate.—In the Senate, Jan. 23, the Committee on the Judiciary were instructed to inquire "if some legislation may not be necessary in relation to taxation on mortgaged property, requiring the mortgagee to pay the tax on the amount mortgaged." Feb. 1, a bill was reported in conformity with the plan of this order, which was somewhat amended, and passed through its several stages in that branch. In the House, April 12, the Committee to which it was refused reported that it ought *not* to pass; and May 16, the bill was laid on the table.

Lands.—The whole number of tracts of land held in common and undivided, by Massachusetts and

Maine, which have been sold since the separation, amounts to eighty-five; and they are of various dimensions, amounting, in the aggregate, to 884,341 acres, equal to thirty-eight and one-third full townships of 23,040 acres each. The amount for which they have been sold, is $833,352.

The whole number of tracts of land which have been divided by the two States, and set off in severalty to this State, are 115, containing in the aggregate 2,486,038 acres, equal to about 108 full townships of 23,040 acres each. The sale of a portion of these lands, down to, and including the year 1850, amount in the aggregate to 1,589,491 acres, and were sold for the sum of $876,502. The number of acres of lands held in common and undivided, remaining unsold, is about 1,876,000.

In the conveyances of townships, there were reserved for public uses, in each township, 320 acres. In addition to the amount of lands set off to this State, as before named, a considerable number of the reserved lots fell to the share of this Commonwealth, also many islands along the seacoast of Maine.

There have been taken from the Massachusetts share of lands, several townships granted to academies, to soldiers of the revolutionary war, and to the settlers at Madawaska.

Since 1820, the number of acres sold has been 2,412,527; grants and reservations, 468,364 acres; receipts for sales, timber, &c., $1,998,226.55; paid for surveys and explorations, $72,337.97; paid for making roads, &c., $70,676.04; current expenses of land office, $39,083.78. Balance handed over to the treasury, in money and securities, $1,816,128.76.

The quantity of land owned by and strictly in the possession of Massachusetts, either in severalty or jointly with Maine, is now about 14,000,000 acres. Besides, she still retains the fee of some townships, upon which the right to cut timber has been sold, either for a time limited or *in perpetuum*. With the exception of a few townships which lie upon the extreme head waters of the Kennebec and Penobscot Rivers, these lands are all located upon the River St. John and its tributary streams. This fact materially affects their value, for the timber upon the waters of this river, whether within the State of Maine or in the province of New Brunswick, has but one avenue to market, and that is furnished by the river itself. Whenever it reaches tide-water, it is within the territory of Great Britain, and if shipped to a port of the United States, is subject not only to the export duty of the province, but also to the payment of such duties as our own tariff imposes. Whatever becomes of it, it is burdened with the impost of the province. The consequence is, that all or nearly all the timber which goes down this river, is shipped to England or the Continent. Another consideration, which in some measure affects the value of the largest part of it, is its distance from market. These considerations cause lands upon the River St. John to be much less valuable than are lands no better timbered and no better watered, which lie upon the Penobscot.

In the House, Jan. 30, a resolve was reported providing for a division of the public lands in Maine, in accordance with the act of 1819, relating to the separation of the District of Maine from Massachusetts proper. This was laid on the table, Feb. 3, 145 to 67. May 22, the bill, having been taken from the table was refused a third reading, and thus rejected.

Monuments.—The resolve (*No.* 6) in aid of a monument in Acton to the memory of Capt. Isaac Davis was so successful (being ordered to a third reading in the House, Feb. 3, by the decisive vote of 190 to 31, and all motions to reconsider, &c., being lost) that several other projects for "monuments" were started. In the House, Feb. 13, the Committee on the Library were instructed to consider the expediency of a State appropriation of $2000 in aid of a monument to John Eliot, the apostle to the Indians, to be erected in Forest Hills Cemetery. On March 6, the Committee reported that it was inexpedient to make such an appropriation. March 28, a motion to amend this report by substituting a bill appropriating $2000 for the purpose, was rejected, 91 to 121, and the report was accepted, 181 to 93. March 31, a motion to reconsider this vote was lost, 53 to 124. In the Senate, April 14, a like motion to amend was lost, and the report was accepted. In the House, a petition was presented for State aid to a monument to Crispus Attuck, who fell in the Boston Massacre, March 5, 1770, and referred. The Committee reported leave to withdraw thereon, and the report was accepted by the House, May 1, and soon after by the Senate.

Commissioner to the Industrial Exhibition.—In the Senate, Jan. 23, a resolve was reported, providing for the appointment of a Massachusetts Commissioner to attend the industrial exhibition in London, and appropriating $3000 for his expenses and those of the State Committee who have had contributions in charge, which was forthwith passed to be engrossed. In the House, Jan. 28, this resolve was refused a third reading, 84 to 164, and thus rejected. Jan. 30, this vote was reconsidered 150 to 118, and the resolve was recommitted. Feb. 5, it was reported in a new draft. Feb. 15, this was amended, 45 to 45, by striking out all relative to the appointment of a Commissioner, so as to appropriate $800 to defray the expenses of the State Committee who had had the Massachusetts contributions in charge, and was ordered to a third reading, 133 to 40. In this form, it was finally passed by both branches as above, (*Resolves, No.* 20.)

Compensation of the Clerks.—In the House, Feb. 6, a Committee was raised to consider this subject. Feb. 18, they reported a resolve which was finally passed, (*Resolves, No.* 38.) At the same time, however, Mr. Heath of Tyringham submitted a minority report, expressing the opinion that there is too great a difference between the compensation of the clerks and members, with a resolve which he submitted as an amendment, allowing the clerks from $5 to $7 a day, with $100 for copying the journals in duplicate, and to the Assistant Clerks, from $2 to $4 a day. March 11, the latter resolve was amended so as to make the Clerk's pay $8, and the Assistant's $4. The question on this was divided; the first branch was rejected, 114 to 168, and the second adopted, 94 to 65. April 5, this last vote was reconsidered, and the resolve was ordered to a third reading, the same as it was originally reported, and in this form it was passed by both branches, as above.

Pauper Accounts.—In the House, Feb. 17, at the same time that the bill was reported, which was subsequently passed and became a law, (*Acts, No.* 42,) providing as a penalty for delay in returning pauper accounts, the forfeiture of a certain percentage instead of the whole amount, the Committee on Claims reported a resolve for the payment of all the back accounts since 1848, heretofore forfeited for delay, 48 in number, (28, forfeited under the same circumstances, having been allowed from time to time by special resolves,) amounting in all to $1,681.66. Feb. 20, this resolve was laid on the table, and subsequently recommitted. March 12, it was reported in a new draft, allowing to 61 towns $2,372.83. March 31, a motion to recommit the resolve, with instructions to report a general resolve, embracing the principle of paying all the towns whose accounts have been refused payment for delay, was lost, and the resolve was refused a third reading, and thus rejected. April 1, this vote was reconsidered, and the resolve (in the first draft) was ordered to a third reading. May 3, the resolve was amended by substituting the new

draft and inserting a general provision for the payment of all pauper accounts which have been disallowed on account of delay, and was passed to be engrossed, 112 to 63. In the Senate, however, May 6, the resolve was refused a third reading, 11 to 20, and thus rejected. May 21, a motion to reconsider this vote was lost.

Increase of Salary.—In the House, April 11, the Committee on the Judiciary was instructed to consider the expediency of increasing the salary of the Hampden Judge of Probate. April 19, a bill was reported establishing this salary at $340 *per annum.* May 19, this bill was indefinitely postponed.

Apportionment of Senators and Representatives.—In the House, Jan. 15, it was ordered that a joint special Committee, (*No.* 15,) be raised, "to consider the expediency of so amending the Constitution, as may secure to all the towns and counties a more equal and just system of representation for the House of Representatives, and also for the Senate." In the Senate, March 26, this Committee roported a plan, which was agreed to by all of their number but one, proposing to amend the Constitution in two respects: first, as regards the House, to give one representative annually to every town or city having 1000 inhabitants, two to 5000 inhabitants, and to every town or city having more than 5000 inhabitants, one additional representive for every 5000; thus, three to 10,000, four to 15,000, &c., provided that no town or city have more than 30 representatives; towns of less than 1000 inhabitants, to have one representative as many times in ten years as 100 is contained in their population: all of these numbers to be increased one-tenth, whenever the population of the State has reached 1,100,000, and by an additional increase of one-tenth for every 100,000 above that number. The second proposed amendment, provided that the Commonwealth be divided into forty single senatorial districts, according to population. April 3, Mr. Aspinwall of Brookline submitted his minority report, dissenting from the proposed amendments, and recommending a change only in the Senate. April 16, the first proposed amendment was adopted in the Senate, 23 to 13, and the second, 29 to 8. May 6, the first was *rejected* in the House by a vote of 180 to 151 (not two-thirds,) and the second, 118 to 181. In order to have become part of the Constitution, these amendments must have received the votes of a majority of the Senators and two-thirds of the Representatives, present and voting, for two successive years, and then have been submitted to the people and accepted.

The subject was then recommitted to the same Committee, with instructions to consider the expediency of amending the Constitution in some other way than that thus rejected by the House. In the Senate, May 10, the Committee asked to be discharged from the further consideration of the subject, being unable to agree upon any plan. This report was accepted, in the Senate, May 12, in the House, May 13.

Single Representative Districts.—In the Senate, May 14, a bill was introduced on leave, for the division of cities and large towns into single representative districts, and referred. May 16, it was reported back to the Senate. May 19, it was ordered to a third reading, 16 to 5. May 20, it was passed to be engrossed, 23 to 14. In the House, May 24, the bill was referred to the next General Court, 126 to 71; and was thus lost.

Removal of the Seat of Government from Boston.—In the House, Feb. 28, it was ordered that a Joint Special Committee (*No.* 29,) be raised to consider the expediency of removing the Seat of Government to some town in the interior of the Commonwealth. March 18, the Senate concurred in this order. April 30, in the Senate the Committee made a detailed report in favor of the proposed removal, and reported a "resolve concerning the removal of the Seat of Government to some town in the interior," providing for the appointment of five commissioners to examine sites for a new seat of Government, and to estimate the expense of new public buildings. On the 19th of May, an amendment to authorize the commissioners to fix definitely the site of the New State House, was rejected. Another amendment, to submit the question of removal to the people at the November election, was also rejected. An amendment, authorizing the commissioners to inquire into the title of the land on which the present State House stands was adopted, and the resolve was ordered to a third reading, 24 to 12. The next day, May 20, it was ordered to be engrossed, 24 to 14.

In the House, May 23, the resolve as it passed the Senate was ordered to a third reading, 131 to 109. But subsequently, during the same day, this vote was reconsidered, 127 to 120, and the resolve was laid on the table, 141 to 119. The next day, which was the last day of the session, a motion to take it from the table was lost, 131 to 139, and thus the resolve was lost.

Enlargement of the State House.—In the House, May 10, the Committee on Public Buildings were instructed to consider the expediency of providing further accommodations for the State Library, and for Committee rooms, and the expense thereof.

May 12, the Committee reported in favor of a plan for the extension of the State House, by G. J. F. Bryant, the main features of which are as follows:

The extension to consist of a building measuring 58 feet in length, and 41 feet 6 inches in width, and to be four finished stories in height; to be located immediately north of the one story portion or hall of the building now containing the statue of Washington, and to be attached to the north wall of said hall, extending therefrom to Mt. Vernon street, and to be built in conformity with the present structure. The lower or basement story of the extension will be wholly above the surface of the sidewalk in the street. The second or principal story will be on a level, and of uniform height with the Rotunda or Doric Hall of the present building; will contain the Library, to be fitted with alcoves, &c. The third story, the floor of which will be on a level with the lower part of the House of Representatives, will contain two large Committee rooms, so arranged that they can be thrown into one room for important hearings. The fourth story is to be finished with four Committee rooms. There will be one entrance to the extension from Mount Vernon street, and another from the east side of Doric Hall through an entry at the side of two of the fire-proofs, east of the statue of Washington. An accurate estimate, prepared by mechanics of ability, of the cost of the proposed extension, amounts to the sum of $15,000.

A resolve authorizing the Sergeant-at-Arms under direction of a Committee of the legislature, to cause an extension to the State House to be constructed in accordance with this plan, and appropriating $15,000 to cover the expenses, was reported at the same time, which was refused a third reading, May 24, and thus rejected.

Gas in the State House.—The Representatives' chamber has been for several years lighted, in the evening, with gas. In the Senate, Feb. 15, the Sergeant-at-Arms was directed to cause the Senate chamber to be lighted with gas. In the House, Feb. 20, a similar order was passed with regard to the Clerk's room. Feb. 21, a similar order with regard to all the Committee rooms was submitted and referred to the Committee on Public Expenditures. In the Senate, Feb. 28, this Committee reported an order for the introduction of gas into the Committee rooms, and Secretary and Treasurer's offices, the expense not to exceed $1000, which was rejected.

Slavery —The joint special committee (*No.* 17,) on this subject, reported a series of resolves, in the Senate, March 28, which, after being variously amended, were passed to be engrossed in the Senate, May 16, 33 to 5. In the House, May 23, they were laid on the table, by the close vote of 167 to 165.

Personal Liberty.—The joint special committee on slavery (*No.* 17,) reported in the Senate, March 28, a bill "in addition to the act [of 1843] for the better security of personal liberty," extending the authority to issue writs of *habeas corpus* to justices of the peace, &c. In the Senate, May 21, this bill was refused a third reading, 13 to 16, and thus rejected.

Inquiry whether the freedom of inhabitants has been endangered.—The select committee of the Senate (*No.* 4,) made a detailed report, April 22, of the hearings and investigations had by them, and reported two bills, one "concerning calling out the militia," vesting in the governor the sole power to call out the militia during any session of the General Court or Executive Council in Boston, or at any time when he is in Boston or in any other city, instead of in the mayors of such cities; the other "to punish disobedience to the laws by public officers," extending the prohibitions of the personal-liberty act of 1843 to all persons holding any office under the statutes of the commonwealth, under penalty of $100, "to be recovered by indictment or information, or by action of debt on the part of any person choosing to sue for the same." The report and bills were laid on the table, and ordered to be printed; and no further action was had with regard to them.

Anatomical Diagrams for Schools.—In the House, March 18, the Committee on Education reported that the several petitioners that anatomical diagrams be furnished by the State to the schools have leave to withdraw. At the same time a minority report was made in accordance with their prayer. May 1, an amendment to substitute for the former report a resolve authorizing each district to be supplied with eight diagrams at 25c. each was rejected, and the report was accepted. May 3, a motion to reconsider this vote was lost; May 6, the report was also accepted in the Senate.

Exclusion from Public Schools.—In the Senate, May 6, a bill was reported in these words: "No applicant for admission to any of the public schools in this commonwealth shall be excluded therefrom on account of color or race," and was subsequently passed through all its stages in that branch. In the House, May 20, this bill was refused a third reading, and thus rejected. May 22, a motion to reconsider this vote was lost, 122 to 120.

School Districts.—In the Senate, April 22, a bill was reported "to authorize school districts to raise money for the support of schools," for a longer time, and of a higher character than the towns of which they are a part may be disposed to maintain, which passed through all its stages in that branch. In the House, May 23, it was refused engrossment, unanimously, and thus rejected.

Truant Children.—In the Senate, May 17, a bill was reported, "in addition to an act concerning truant children and absentees from school," authorizing the commitment of such truants to the houses of correction, jails, &c., in default of the payment of the fine provided for in the existing law. May 20, this bill was ordered to a third reading, 23 to 3. May 22, it was passed to be engrossed. In the House, May 23, it was refused a third reading, and thus rejected.

State Reform School for Girls.—In the House, March 5, was received the report of the Commissioners, (William Appleton, Joseph H. Billings, and George W. Campbell,) appointed the preceding year to consider the subject of a State Reform School for Girls. We give two extracts from this report.

"There are two distinct grounds on which children may be confined in such an institution. First,—simply as a punishment, on conviction of some offence known to the law, in which case, it would seem that the term of confinement should bear some relation to the gravity of the offence, and the prisoner at the end of that term be discharged; or secondly,—by virtue of the right of the State to assume the guardianship of minors, whose natural or actual guardians encourage or permit them to pursue a course of life detrimental or dangerous to society, in which case the managers of the institution should have the complete power of guardians over the inmates, including that of binding them as apprentices during minority. So great is the reluctance among us to prosecute young girls for a first offence, or for any but very grave offences, that commitments on the first ground would probably be very few, and those of the most incorrigible character. But it is estimated that in Boston alone, there are three hundred girls, under seventeen years of age, who on the latter ground would be fit subjects for such an establishment, and twelve hundred boys."

"It is therefore the impression of your commissioners, that if any such action over female children be assumed, it should be understood to be a mere guardianship, or agency, to place them in reputable families and under private domestic protectors, as soon as possible. They are aware that these views differ from any which have been hitherto acted on, either in Europe or America; but they respectfully submit, that they are not therefore the less adapted to our state of society, the less worthy of Massachusetts, nor the less likely to promote the usefulness and the happiness of her native or adopted children."

The subject was referred, and the Committee reported in the Senate, May 17, that it be referred to the next General Court. This report was accepted by both branches.

Aid to the Female Medical Education Society.—In the Senate, April 3, a resolve was reported, allowing $5,000 from the State treasury to this society, provided a like sum be obtained from individual donations, which was rejected, 13 to 18, April 24.

Lotteries.—In the Senate, Jan. 21, 1851, the Committee on the Judiciary were instructed to inquire whether any further legislation be expedient to prevent imposition on the public by means of lotteries, allusion being made to Gift Concerts, Art Unions, &c. Feb. 21, the committee reported that in their opinion the present statutes are sufficient, and that no further legislation is necessary —which report was accepted.

Intoxicating Liquors.—In the House, April 8, a bill was reported by a special committee (*No.* 7), "regulating the sale of intoxicating liquors," absolutely prohibiting their sale by persons not tavern or grocery keepers appointed by the municipal authorities, except for medicinal or mechanical purposes, under penalty of fine and imprisonment, authorizing search under the warrant of any justice of the peace of premises where any three legal voters affirm under oath they have reason to suspect such liquors are kept or deposited intended for sale, and prohibiting any person engaged in the traffic from sitting on any jury. May 14, this bill was ordered to a third reading, 103 to 68. May 21, it was passed to be engrossed, 123 to 106. In the Senate, May 23, however, it was indefinitely postponed, 23 to 13, and subsequently a reconsideration of this vote was refused.

Asylum for confirmed Inebriates.—The Joint Special Committee (*No.* 16) on this subject, made a detailed report in the Senate, April 14, accompanied by "resolves concerning an Asylum for Inebriates," providing for the appointment of three commissioners to consider the expediency of establishing such an asylum, to report a plan for its organization and government, to suggest a loca-

tion, and to estimate the cost; which were passed in the Senate. In the House, May 19, they were ordered to a third reading, 66 to 60. May 23, they were laid on the table. A subsequent motion to reconsider this vote was lost; and thus the resolves failed to receive the assent of the House.

Gambling.—In the Senate, May 5, a bill was introduced "more effectually to prevent gambling," with very stringent provisions. May 17, it was passed to be engrossed in the Senate. In the House, May 22, the Committee to which it had been referred, reported that it ought *not* to pass; and May 23, it was rejected.

Abolition of Capital Punishment.—The Special Committee (*No.* 21,) on this subject, made a long report to the House, April 24, accompanied by a bill, providing as the punishment for treason, murder, rape and arson, imprisonment for life, instead of the death-penalty required by the existing laws. May 19, this bill was refused a third reading, 97 to 172, and thus rejected.

Abolition of Police Courts.—A number of petitions were presented for the abolition of the police courts in Lowell, Newburyport, &c., which were referred to a joint special committee (*No.* 26,)which reported in the Senate, May 24, that the petitioners have leave to withdraw, which report was accepted the same day by both Houses.

Bounty to Horticultural, and further bounty to Agricultural Societies.—In the House, April 23, a bill was reported, allowing from the State Treasury to any Agricultural Society embracing a population of $10,000, $200 annually, on a capital of $1000, and in the same proportion for a greater capital, but not more than $600; and to any Horticultural Society covering not less territory than a whole county, $100 annually on $1000, and in the same proportion for a greater capital, and requiring annual returns from Horticultural Societies. May 19, this bill was refused a third reading, and thus rejected.

State Board of Agriculture.—In the House, April 4, a bill was reported "to establish a State Board of Agriculture," to be composed of the Governor, Lieutenant Governor and Secretary of State *ex officio*, and delegates from the various county agricultural societies, to take the general supervision of all matters relating to agriculture in the Commonwealth; to receive, hold in trust, and exercise control over any donations or bequests from private sources, made to advance agricultural education; appropriating one-fourth of the income of the public lands, when the school fund shall have reached $1,000,000 and the Western Railroad Stock Sinking Fund shall have reached $700,000, as an agricultural fund, to be expended at the discretion of the Legislature, for the encouragement and support of institutions for instruction in the science and practice of agriculture. May 12, this bill was refused a third reading, and thus rejected.

Canada Thistle.—In the Senate, Feb. 1. the Committee on Agriculture were instructed to consider the expediency of providing by law for the extinction and prevention of the further spread of the Canada thistle within this State. March 20. a bill was reported to this effect, which was refused a third reading, April 2, 6 to 12, and thus rejected.

Railroads—occupied the attention of the Legislature largely, as usual. A number of laws were passed incorporating new companies, and extending the privileges of old ones, as will be noticed in the abstracts of the Acts above. The general legislation proposed with regard to them, however, with some exceptions, (*see Acts, Nos.* 88, 102, 147, 317,) did not receive the support of majorities of the Houses, and most bills of this kind failed.

In the House, Feb. 13, and Senate, Feb. 14, an order was passed, directing the Railway Committee to consider the expediency of providing by law for the establishment of a Board of Railway Commissioners. April 19, in the Senate, a bill was reported providing for the appointment by the Governor, of three Commissioners for terms of three years, one going out of office annually, whose duties should be to visit and inspect every railroad, at least once a year, and also at any time when requested by five stockholders; also to investigate the causes of accidents immediately after their occurrence, and with authority to apply to the Supreme Court for an injunction to restrain any railroad corporation from further proceeding, if they think the safety of the public endangered. April 25, it was ordered to a third reading, but subsequently this vote was reconsidered, 23 to 2. The next day it was laid on the table, and it did not receive any further favorable action.

In the Senate, March 5, a bill was introduced "concerning Railroad Corporations," providing that no Railroad Corporation shall hereafter begin to build its road, till all its stock has been subscribed by responsible parties, and ten *per cent.* of the par value of each and every share has been paid in; also prohibiting the issue of shares at less than their par value. March 7, this bill was ordered to a third reading. March 10, it was amended by substituting twenty for ten *per cent.*, and passed to be engrossed. In the House, April 1, it was laid on the table, and received no further favorable action, although its provisions were separately inserted in nearly all the bills concerning railroad companies.

In the House, Feb. 24, a bill was reported "concerning Railroad Corporations, and granting charters for the same," containing a number of provisions regulating the form and conditions of applications for railroad charters, &c. April 1 was assigned for its consideration. It was then taken up and discussed for several days, when it was laid on the table. May 23, it was taken up, and indefinitely postponed.

In the House, May 16, a bill requiring that all railroad bridges should be so built as to leave a space 6½ feet, in the clear, between the tops of all cars and the bridges, was rejected, 58 to 101. May 23, this vote was reconsidered, and the bill was again rejected, 74 to 89.

In the house May 16, another bill, requiring that barriers shall be erected to prevent the cars from running off bridges into the water, was also rejected, 54 to 85.

In the House, May 17, a bill was reported, "relating to signs at Railroad Crossings," authorizing the municipal authorities to cause such signs to be removed at their discretion. May 20, this bill was ordered to a third reading. May 21, it was ordered to be engrossed. In the Senate, May 23, it was refused a third reading, and thus rejected.

In the Senate, May 19, a bill was introduced on leave, and referred, "concerning the manner of voting at meetings of Railroad Corporations." restricting the number of votes to be thrown by any one individual at such meetings to thirty votes when the capital is $100,000, or less, sixty votes when it is $500,000, one hundred votes when it is $1,500,000, and two hundred votes when it is $3,000,000. It was reported back, and was passed to be engrossed May 22. In the House, May 23, it was laid on the table.

Hoosac Tunnel.—In the Senate, March 28, a bill was reported, "to enable the Troy and Greenfield Railroad to construct a tunnel through the Hoosac Mountain," authorizing the treasurer of the commonwealth to issue scrip in the name of the commonwealth, for $2,000,000, payable to the bearer in London, or in Boston, and bearing interest of five per cent. per annum, payable semiannually, if made payable in London, redeemable in twenty years from date, or twenty-five years from Oct. 1, 1851. This scrip to be delivered to the Troy and Greenfield Railroad Corporation for the

purpose of enabling that corporation to construct a tunnel under and through the Hoosac Mountain, between the "great bend" in Deerfield river in the town of Florida and the village of North Adams, in instalments as follows:—$100,000 when the Governor and Council were satisfied that sufficient provision had been made for the completion of the road except the tunnel, and that $300,000 had been spent thereon; $100,000 scrip more when $200,000 more has been expended; $100,000 scrip more when $200,000 more has been expended; $150,000 scrip more when $300,000 more has been expended; $150,000 scrip more when $300,000 more has been expended; and the residue of scrip when the whole road is completed except the tunnel. On the receipt of scrip by the corporation, ten *per cent.* on its amount to be paid into a sinking fund, and when the road is open for use, $50,000 annually to be added to this fund. The corporation to give the State as security a mortgage of its entire road, income, franchise, and property; also all its interest in the Southern Vermont Railroad, and a guaranty from the Vermont and Massachusetts Railroad Corporation, secured by a like mortgage on that road. April 12, this bill was ordered to a third reading, 21 to 11. April 17, it was passed to be engrossed, 23 to 11. In the House, May 13, after an amendment referring the matter to the people had been rejected, 123 to 178, the bill was refused a third reading, 108 to 237, and thus rejected. May 16, a motion to reconsider this vote for the purpose of amending the bill, was lost.

Aid to the European and North American Railway in Maine.—The joint special committee to whom this subject was referred, reported in the House, May 22, that it behoves the Commonwealth of Massachusetts to afford some countenance to this enterprise, on account of the relations of the railway to her commercial interests, and because she is the proprietor of so considerable a part of the soil of Maine; but not considering it expedient to engage thereto, as proposed at first, a portion of the proceeds of the public lands in Maine, they reported a bill granting a loan of the State credit to the amount of $500,000, in scrip, redeemable in twenty years from Jan. 1, 1852, bearing interest five *per cent.* a year, payable semiannually, under guaranties to guard against the possibility of loss to the commonwealth; the scrip to be delivered in instalments when $1,000,000 is subscribed to the company, half of that paid in, and the State of Maine has advanced $500,000. May 24, this bill was referred to the next General Court.

Privileges of Expressmen.—In the House, April 21, a bill was reported, "regulating the privileges of expressmen on railroads," prohibiting railroad corporations from affording exclusive or special privileges to any expressman except under general rules. May 10, this bill was recommitted. May 23, the committee reported that it be referred to the next General Court; which report was accepted by both branches.

Banks and Banking.—The special and general laws connected with banks and banking, which were passed by the Legislature, are noticed above in the Abstracts of the Acts. In the House, March 14, a bill was reported "concerning banks and banking," providing for annual and bi-monthly returns from the cashiers of all banks; that the rate of interest on future loans for the use of the Commonwealth, shall not exceed 6 *per cent.*; prohibiting banks from borrowing money or paying interest on debts due; that no dividends be declared unless earned in the preceding six months, or unless the bank has sufficient surplus exclusive of doubtful debts; that the stockholders annually appoint investigating committees; that of the directors of Boston Banks not more than one-third need be residents of the city, provided a majority be residents or persons doing business in the city; that no bank receive or pay bills except at its own counter; the general penalty for neglect of any of these provisions being $1000. April 9, this bill was refused a third reading, 74 to 92, and thus rejected. April 12, a motion to reconsider this vote was lost.

In the Senate, March 25, the Special Committee (*No.* 1,) reported a bill "concerning banks and usury," prohibiting banks from issuing paper money when they have not on hand 20 *per cent.* of their capital in specie; from loaning more than 5 *per cent.* of their capital to one person; from issuing bills of a less denomination than $3 after July 1, 1861, $6 after January 1, 1852, $8 after April 1, 1852, $11 after April 1, 1853; and from receiving a per centage as exchange in addition to interest on any loan. It also provided that all usurious contracts should be void, and money paid thereon be refunded, and that in actions relating to usury, each party might use the other as witnesses. May 22, this bill was refused a third reading, and thus rejected.

Increase of Bank Capital.—It will be seen by reference to the acts passed, that quite a number of banks were authorized to increase their capitals. All those which applied were not so successful. In the House, April 15, the bill to increase the capital stock of the Grocers' Bank was refused a third reading, 80 to 95, and thus rejected. April 23, this vote was reconsidered, and the bill was ordered to a third reading, 134 to 112. May 7, the bill was refused engrossment, 68 to 88, and thus again rejected. May 10, a motion to reconsider this vote was lost, 70 to 97. In the Senate, May 14, the bill to increase the capital stock of the Eagle Bank, which had passed the House, was rejected. May 22, the bill to increase the capital stock of the Hampden Bank, which had also passed the House, was rejected.

Alterations in Towns, &c.—One new town was incorporated, one town was made a city, and boundaries were altered in several instances, as may be seen in the lists of acts passed. [*See Acts, Nos.* 250, 296; 8, 54, 192, 265, 293, 323.] There were some other propositions of the same kind which were not carried out. In the House, May 15, a bill to incorporate the town of Hamburg, at Chester Village, from parts of the five towns of Chester, Montgomery, Blandford, Russell, and Norwich, was indefinitely postponed; two bills to incorporate the two towns of Sippican and Mattapoiset from parts of Rochester, which had passed the Senate, were rejected; and a bill to annex Charlestown Poor Farm in Malden to Charlestown, proposed as an amendment to the reference of the matter to the next General Court, was rejected, and that reference was adopted. May 17, a reconsideration of this last vote was refused, 100 to 50. May 21, the bill to annex a part of North Brookfield to Brookfield, which had passed the Senate, was rejected. May 22, the bill to annex part of Dedham to Walpole, which had passed the Senate, was rejected, 61 to 86.

Formation of a New County.—A large number of petitions for and against the establishment of a new county from parts of Worcester and Middlesex, were presented and referred to a special committee, (*No.* 27,) who reported in the Senate, May 7, that the subject be referred to the next General Court. This report was accepted. In the House, May 12, a motion to reconsider its acceptance was lost.

Rhode Island Boundary.—In the House, April 1, a message was received from the Governor, transmitting the report of the Commissioners appointed under the Resolves of May 10, 1848, "concerning the boundary line between the States of Massachusetts and Rhode Island." From this report it appears that the effort so often renewed to settle the line between Massachusetts and Rhode Island has failed. The Governor was authorized by the resolves, if the line was not ratified before May 1, 1849, to institute such process as he might deem proper in the Supreme Court of the United States for a final adjudication. Gov. Boutwell remarked

in his message that if there should be no legislation on the subject during the session, he should consider it his duty to institute such process as may lead to a judicial decision, and that he could not advise any further delay. The Committee (*No.* 34,) to whom these communications were referred, reported in the Senate, April 29, that it is inexpedient to legislate on the subject at present, and this report was accepted in the Senate, April 30, and in the House, May 2.

Filling of Flats.—In the Senate, May 3, a bill was reported, "to authorize the Boston Wharf Company to complete and maintain their wharf," authorizing an extension thereof of 150 feet. May 7, it was passed to be engrossed. In the House, May 20, it was refused a third reading, and thus rejected; but, May 22, this vote was reconsidered, the bill was ordered to a third reading, 144 to 99, and under a suspension of the rules by a vote of 160 to 48, was forthwith passed to be engrossed. May 23, it was passed to be enacted in the House, and May 24, in the Senate. The same day the Governor returned it to the Senate, the branch in which it originated, with a message, stating that he entertained objections to its passage, and consequently withheld his approval, because the bill contemplated not only a grant of flats, the property of the Commonwealth, to the company, but necessarily implied "the extension of this grant, along a line of more than 3000 feet towards South Boston, thus involving a surrender of about 500,000 feet of flats, in which the State has a valuable, vendible interest. If this portion of the public domain, over which the tide now ebbs and flows, is to be converted into land, it seems just that the proceeds should be applied to the improvement of the harbor, or in some other way made serviceable to the commerce of the State, in which all the people are interested. But I am induced to withhold my assent to this bill, by a consideration more important than any to which I have referred —the preservation of the harbor of Boston. Its main channel has diminished several hundred feet in width, and from three to five in depth, within thirty years, and vessels of a large class have recently grounded at low tide. Scientific and practical men may differ as to the cause, but the fact of a gradual and fearful shoaling of the water is certain. This result may be traced to a variety of causes, some more important than others; but I cannot doubt that a serious one is the conversion of large tracts of marshes and flats, over which the tide once flowed, into solid land." The Senate, in accordance with the Constitution, proceeded to reconsider the bill; but two-thirds did not agree to pass it, notwithstanding the Governor's objections. But three Senators voted in its favor, viz., Messrs. Bigelow, Daniels, and Seaver.

In the Senate, May 8, a bill was reported, to "establish the Eastern Avenue Corporation," authorizing the construction of a pile bridge, 40 feet wide, with draws, from the foot of Summer Street in Boston, across Fore Point Channel, to the "extreme line of solid filling," established by the Commissioners of 1850, and an "*avenue*" thence, to be a solid structure 100 feet wide, for a street and sidewalks, with draws and sluiceways, to L street, South Boston; also the construction of a sea-wall along the Commissioners' Line; the bridge, street, and avenue to be open for free travel to the public, without toll, and to be completed in five years. May 20, this bill was ordered to a third reading, 20 to 10. May 22, it was passed to be engrossed, 29 to 9. In the House, May 23, it was ordered to a third reading, 133 to 72. May 24, it was ordered to be engrossed. The same day it was passed to be enacted by both Houses, and was submitted to the Governor for his approval. He returned it to the Senate, where it originated, with his objections, being unwilling to give his assent to its passage. The effect of the proposed structures, he said, would be to enclose and partially separate from the harbor, a large tract of flats, the property either of riparian owners or the Commonwealth. "By the operation of natural laws this basin would finally become unfit for commercial purposes, and in time would be above the flood of the tide. A large portion of these flats are the property of the State, subject only to the right of the shore owners to pass over them," but the natural accretion by deposit would ultimately extend the rights of the riparian owners to the solid structure, "and thus ultimately convert valuable public interests to private use, without any compensation whatever." The interest of the State in the lands enclosed in the basin, is estimated to extend to several thousand feet. Another objection to the bill was that it contained no provision for the compensation of the owners of the wharves, which would be deteriorated in value by effects of the structures. The message concludes, "It is likely that another avenue to South Boston may at some future time be constructed, but it should have regard to the rights of individuals, the rights of the Commonwealth, and above all, to the safety of the harbor. The bill to which I have made these objections, appears to me to be essentially defective in all these particulars." The Senate proceeded to reconsider the bill, but two-thirds did not agree to pass it, notwithstanding the Governor's objections. The vote was 7 in favor to 15 against.

In the Senate, May 19, a bill was reported to "authorize the City of Charlestown to fill up certain flats in Mystic River," authorizing the city and other proprietors of certain described flats to fill them up, under the name of the Mystic River Corporation, with a capital of $200,000, the filling to be begun within three years, and completed within eight. The bill was reported by a minority of the Committee, the majority report being adverse to the project. May 21, a motion to refer the matter to the next General Court was lost, 25 to 10; the majority report was amended by the substitution of the bill, 22 to 13, and it was ordered to a third reading. May 22, it was passed to be engrossed, 25 to 9. In the House, May 23, it was ordered to a third reading, and under a suspension of the rules by a vote of 112 to 42, was passed to be engrossed, and a motion to reconsider this vote was lost. May 24, the question being on its final passage, the Governor having already vetoed two bills of a somewhat kindred nature, a motion was made for its indefinite postponement, which, after debate, was cut off by the application of the previous question, and it was passed to be enacted, 52 to 14. In the Senate, however, the question being on its final passage, it was rejected, 8 to 13, and a reconsideration of this vote was refused, 7 to 12. So the bill was lost.

In the Senate, May 13, a bill was reported "to incorporate the Suffolk Wharf Company." May 14, it was ordered to a third reading. May 15, it was passed to be engrossed. In the House, May 22, it was laid on the table, and several subsequent motions to take it up were lost.

Alien Passengers.—During 1850, 1,007 vessels, (213 American, 786 English 6 Swedish, 1 Prussian, 1 Russian,) arrived at ports in Massachusetts, bringing 30,075 alien passengers.

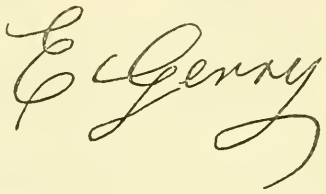
GOVERNORS OF MASSACHUSETTS.

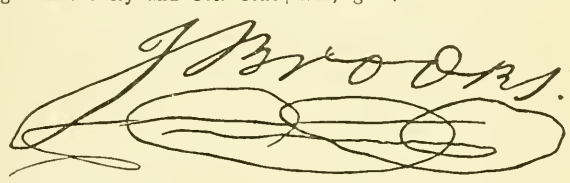
In our first volume, we gave a complete list of the Governors of Massachusetts, from 1620 to 1847, with a brief sketch of Gov. Carver. In the second, we gave sketches of the Governors under the first Charter, which were continued in the third, fourth and fifth volumes. We shall continue in this and future volumes, brief sketches of each, in chronological order. We give also *fac similes* of their autographs, faithfully taken, by N. B. Shurtleff, M. D., from original documents. In preparing the following notices, we have drawn chiefly our materials from the Biographical Works of Thacher, Allen and Herring, and the "American Whig Review."



ELBRIDGE GERRY

Was born at Marblehead, Mass., 17th July, 1744. After receiving the rudiments of education at the common town schools, he entered Harvard College before he had completed his 14th year, and received its first honors in 1762.

He devoted himself for several years to commercial pursuits. Being a member of the legislature in 1772, he was appointed on the important committee of inquiry and correspondence. The provincial Congress of 1775 appointed him on the Committee of Public Safety and Supplies. The Committee had been in session at Menotomy, then a part of Cambridge. Mr. Gerry and Col. Orne were in bed, when the approach of the British troops induced them to flee, half dressed, to a neighboring cornfield, where they remained, while the troops searched every apartment of the house in order to find them. In 1776, he was sent to the Continental Congress, and continued at times a member till 1785. He was a member of the Convention which framed the present Constitution of the United States. He was a member of Congress four years. In 1797, he was appointed a minister to the French Republic. He was Governor of Mass., 1810, 1811. March 4, 1813, he was inaugurated Vice-President of the United States. He died, 1814, aged 70.



JOHN BROOKS

Was born in the town of Medford, Mass., in the year 1752. His family had been established in this place from the earliest settlement of the country, employed from one generation to another, in the cultivation of the soil. The father of Governor Brooks was a respectable farmer, and he himself passed the early part of his life in the usual occupations of village husbandry. The circumstances of the family prevented his acquiring an academical education; but he attained in the school of Medford, sufficient knowledge of the learned languages to enable him to engage to advantage in the study of medicine,—the profession of his choice.

While at school in Medford, the celebrated Count Rumford, a native of the neighboring town of Woburn, was his associate and friend; and the intimacy then formed was kept up by correspondence, till the death of that distinguished philosopher and friend of man.

Having completed his medical studies, he established himself in the practice of his profession in the adjacent town of Reading, and there he was found at the commencement of the revolutionary war. A company of minute-men was raised in the town of Reading, and young Brooks, a stranger, just established in the town, and but 23 years of age, was chosen its commander. He was indefatigable in drilling and disciplining the men, and prepared himself for this duty by carefully observing the military trainings of the British soldiery in Boston. In the organization of the army, which immediately took place, Brooks was appointed a Major in Col. Bridge's regiment.

In the campaign of 1777, Major Brooks was advanced to the rank of Lieut. Colonel, and attached to the 8th regiment of Mass. troops, recruited principally by himself. Col. M. Jackson, of this regiment, having been severely wounded in 1776, the command of the field devolved principally upon Lt. Col. Brooks during the campaigns of 1777 and 1778, and till he was promoted to the command of the 7th regiment, with the rank of Colonel, on the death of Col. Alden, in 1779.

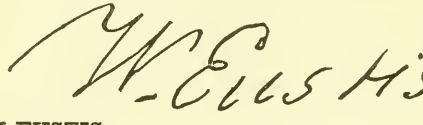
When the British army retreated from Philadelphia, in the spring of 1778, Washington left his encampment at Valley Forge, and marched on its rear. At Monmouth, the two armies came in conflict, and Col. Brooks, as adjutant-general to General Lee, performed a very conspicuous part in the events of that important day. After the troops had again taken post on the banks of the Hudson, Col. Brooks was employed under Baron Steuben as inspector of discipline, and rendered valuable services. In these various positions of duty, he acquired the confidence of Washington and established a high reputation as a military officer. Col. Brooks, like most of his brethren in arms, retired in poverty from the service of his country. He immediately resumed the practice of his laborious profession in Medford and the neighboring towns. The kindness of his heart, and the gentleness of his manners, procured him the love and confidence of all around him.

Immediately after the close of the war, he was appointed Major General of the 3d division of the Mass. Militia. He was frequently chosen a representative of the General Court of the Commonwealth. He was delegate to the Convention of 1788, by which the Constitution of the United States was adopted. He was for several years a senator for the county of Middlesex, and a member of the Executive Council.

During the administration of Governor Strong, he was appointed Adjutant General of the Commonwealth of Mass., and on his retirement from the chief magistracy, was called to the chair of the state, which he filled with dignity and ability from 1816 to 1822.

After his voluntary retirement from the chair of state, Gov. Brooks still continued to serve the community in various important capacities, and to manifest his sympathy in the public spirited objects which were presented for his approbation.

On the 11th of February, 1825, he attended the funeral of his revolutionary associate and successor, Gov. Eustis. He died March 2, 1825, aged 73, leaving an only surviving child, Lt. Col. A. S. Brooks of the United States army.



WILLIAM EUSTIS

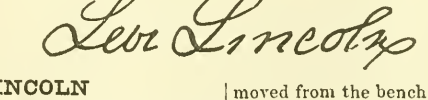
Was the second son of Benjamin and Elizabeth Eustis, Boston. He was born on the 10th of June, 1753. At the age of 14 he entered Harvard College, where he was distinguished as a good classical scholar, and graduated with honor in 1772. After his graduation at college he commenced the study of medicine in Boston under Dr. Joseph Warren, the revolutionary patriot.

At the commencement of the glorious struggle between the mother country and her colonies, Mr. Eustis was a student. On the 19th of April, 1775, the day of the battle of Lexington, an express arrived in Boston communicating the intelligence; on which occasion Gen. Warren mounted his horse, called Mr. Eustis, and directed him to take care of the patients during his absence, and departed for the scene of action. About one o'clock on the same day Dr. Eustis rode to Lexington and Concord, where he had an opportunity of dressing the wounds received by some of our militia from the fire of the British. Gen. Warren proposed to him that he should receive the appointment of surgeon to one of the regiments of the American army, observing that he had seen more practice than most of the gentlemen from the country. He was accordingly appointed surgeon of the Regiment of Artillery, then at Cambridge. From thence he removed with the army to New York, and soon after received the appointment of hospital surgeon. He was subsequently offered a commission in the line of the army as Lieut. Colonel of Artillery, by Gen. Knox, but he preferred the medical department, where he might improve his mind in the knowledge of his profession. In 1777, and during most of the war, Dr. Eustis occupied as a hospital a spacious house and outbuildings belonging to Col. Robinson, a royalist who had joined the British, situated on the Hudson river, opposite to West Point.

In all the duties pertaining to his office Dr. Eustis was found faithful, humane and indefatigable. His urbanity and social qualities rendered him popular. When the number of the medical staff was reduced by a new arrangement by order of Congress, he was among those who were selected to remain in service; and in March, 1783, he was present at the meeting of the officers at Newburg, called by Washington in consequence of the excitement occasioned by the inflammatory anonymous letters.

At the termination of the revolutionary war, Dr. Eustis commenced his professional labors in the town of Boston. In 1788, he was a member of the General Court for Boston, where he was on many committees, and took a conspicuous part in the debates during six or seven years in succession, pursuing still his professional calls and duties in town. During the administration of Gov. Sullivan he was chosen a member of the Executive Council. In 1800 he was elected member of Congress for Suffolk district. He was an ardent supporter of the administration of President Madison. It was under this administration that he was appointed Secretary of War. In 1815 he was appointed Ambassador to Holland. In 1821 he was elected member of Congress for Norfolk district, which he continued to represent with ability for four successive sessions. In 1823 he was elected Governor of Massachusetts.

He died after a short illness in Boston, during his attendance on the General Court in their session in February, 1825, in the 72d year of his age.



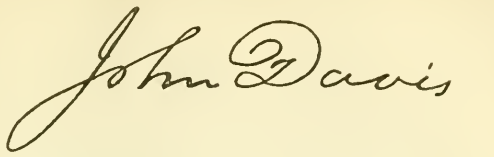
LEVI LINCOLN

Was born in Worcester, Mass., October 25, 1782. He graduated at Harvard College in 1802, and immediately commenced the study of law. He commenced as an attorney in Worcester in 1805. He soon distinguished himself as a lawyer, and was regarded as at the head of his profession in Worcester County.

In 1812 he was elected to the State Senate. In 1814, 1815, and 1816, he was a member of the House of Mass. Representatives from Worcester. In 1822 he was again chosen Representative by the people of his native town, and elected Speaker of the House; and on the following year he was elected Lieutenant Governor of the Commonwealth. In 1824 he was appointed one of the Judges of the Supreme Court of Massachusetts, but was soon removed from the bench by the voice of the people and placed in the chair of state. He was elected Governor in 1825, and continued in this highly responsible office till 1834. In 1835 he was elected member of Congress, and continued till 1841. In 1842 he was appointed Collector for the Port of Boston. In 1845, after a period of 33 years, he was again elected a member of the State Senate, for Worcester County, and chosen its President. He has been twice elector of President and Vice President of the United States, and has been honored with numerous other responsible trusts, which the historian will find detailed upon the pages of the State and United States Records, and in the journals of our most useful public institutions.

To speak of the public life of Gov. Lincoln would

require a line of investigation and a course of remark not suited to the limits and objects of our work. But few men have served the public so long and so well. But few men have blended more happily true dignity and courtesy of manners with the performance of public duties than Gov. Lincoln.



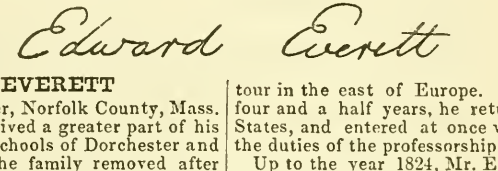
JOHN DAVIS

Was born at Northboro', Mass., Jan. 13, 1787. He graduated at Yale College, in 1812, and prepared for the profession of law. He commenced practice as an attorney in the town of Worcester, and soon commanded the confidence and esteem of the people by his plain common sense and sterling integrity. He was not only regarded as an able lawyer, but as the faithful friend;—and while he responded to numerous calls for professional advice—he was invariably true to the higher duties of the citizen and of the man.

In 1825 he was elected member of Congress, and continued five successive Congresses. In 1834 he was elected governor of Massachusetts, and again in 1835. In 1835 he was chosen United States Senator. In 1841 he was again elected Governor, and continued to hold the office till 1843. On the death of Senator Bates, he was again returned to the United States Senate, for the residue of his term, at the expiration of which he was elected for the term to expire in 1853.

Gov. Davis has ever manifested a lively interest in the literary and scientific associations of the Commonwealth. He has been an active and efficient member of the American Antiquarian Society, Worcester, of which, he is at the present time, the first Vice President; and he is a member of the American Academy of Arts and Sciences.

It is not within our province to speak of the public acts of Gov. Davis, for these will be noticed and recorded by the future historian. He is a gentlemen of great sincerity of motive, and averse to useless parade and public notoriety. He is happy in being useful to his fellow citizens, and his pride consists in having always acted from the noblest purposes, with a proper self-respect, and for the good of others.



EDWARD EVERETT

Was born in Dorchester, Norfolk County, Mass. in April, 1794. He received a greater part of his schooling at the public schools of Dorchester and Boston, to which town the family removed after his father's death. He attended, for about a year, a private school in Boston, kept by the late Hon. Ezekiel Webster, brother of Daniel Webster. He passed the two last terms of the year preceding his entrance into College, at the Academy at Exeter, N. H. He entered Harvard College in 1807, when he was a few months more than 13 years old, and graduated with the highest honors, in 1811.

Although he was inclined to prepare for the profession of the law, he was persuaded by President Kirkland, to turn his attention to the study of divinity. He spent two years in preparing for the ministry, and in 1813 was settled as the pastor of Brattle Street Church, Boston.

In 1814 a professorship of Greek Literature was established at Cambridge, and Mr. Everett was invited to accept an appointment as the first professor. This proposal was rendered more tempting by permission to visit Europe, with a view to recruit his impaired health. He was inducted into office in the spring of 1815, and before he had attained the age of twenty one years.

Before commencing his duties at Cambridge, Mr. Everett embarked at Boston for Liverpool, in one of the first ships that sailed after the peace. From London he went by the way of Holland, to Göttingen, the seat of a University at that time the most famous in Germany, where he remained more than two years. The winter of 1817–'18, he passed in Paris, devoted to the studies subsidiary to his department, and especially tothe acquisition of the Romaic, as a preparation for a tour in modern Greece. In the spring of 1818, he went from Paris to London, passed a few weeks at Cambridge and Oxford, and made the usual tour through Wales, the Lake country and Scotland. In the autumn of 1818, in company with the late General Lyman of Boston, he commenced an extensive tour in the east of Europe. After an absence of four and a half years, he returned to the United States, and entered at once with diligence upon the duties of the professorship at Cambridge.

Up to the year 1824, Mr. Everett had taken no active interest in politics. In this year, the late Mr. Fuller, who had represented the Middlesex district in Congress for eight years, declined a reëlection.

Under these circumstances, and without having been himself previously consulted on the subject, his name was brought forward at a volunteer convention of the young men of the district. The nomination was received with great favor, and he was elected by a handsome majority over the regular candidate. He was reëlected four times successively, by large majorities. On reference to the transactions of the ten sessions for which he was a member, it will be found that he took part in almost every debate of importance. He served on several important Committees, with signal ability.

In the autumn of 1834, Mr. Everett had announced his intention of retiring from Congress. In the winter of 1835, he was nominated as a candidate for Governor of Massachusetts, and he was chosen in the autumn of that year. He held the office of governor till 1840, which he filled with honor to himself, and usefulness to the public.

Relieved from public duty, Mr. Everett was led by domestic reasons to visit Europe a second time. In 1841 he was appointed United States Minister at London, and entered upon his duties at the close of the year.

Immediately after the accession of Mr. Polk to the Presidency, Mr. Everett was recalled. He remained in London, however, until the arrival of his successor. He returned to Boston in the autumn of 1845, and in Jan., 1846, was elected President of Harvard University. He held this office three years, and then resigned on account of ill health.

The public career of Mr. Everett has been a brilliant one. Whatever he has attempted, has been accomplished with much ability, learning, dignity, and elegance.

BARNSTABLE COUNTY.

Barnstable County was incorporated June 2, 1685, having previously formed a part of Plymouth County. It includes all of Cape Cod, which is 65 miles long. It contains about 367 square miles, and numbers thirteen towns. The population in 1840 was 32,548, being about 89 to a square mile.

The population in 1850 was 35,279, or 96 to a square mile The shire town is Barnstable.

Most of the inhabitants are engaged in the fisheries; also many of them in the manufacture of salt. Concerning these important branches of business, we had intended to give some interesting statements, but we have been unable to prepare them in season for this number. We shall endeavor to do them justice next year.

DUKES COUNTY

Comprises Martha's Vineyard, Chappequiddick, Elizabeth Islands, and Noman's Land; lying south from Barnstable County, containing about 130 square miles. These islands were discovered by Bartholomew Gosnold in 1602.

Martha's Vineyard was first settled by whites at Edgartown in 1641.

From 1644 to 1664, these islands were under the jurisdiction of Massachusetts; afterwards under the jurisdiction of New York for some twenty years. In 1695, Dukes County was reincorporated.

The shire town is Edgartown, containing in 1840, a population of 1736, and in 1850, a population of 1990. The two other towns of the County are Chilmark,—population in 1840, 702; population in 1850, 747,—and Tisbury, population in 1840, 1520; in 1850, 1803. There is one newspaper in the County, printed at Edgartown, called the "Vineyard Gazette." It is a weekly journal, edited by E. Marchant. Terms, $1.00 per year.

NANTUCKET COUNTY

Was incorporated June 20, 1695. It is composed of five islands, the only one of any importance being the one on which the town is built. This island contains about 30,000 acres of land, and is about 14 miles broad, averaging about three miles in width. It lies 30 miles southerly from the mainland, 60 miles S. E. from New Bedford, and 100 S. S. E. from Boston. The population in 1840 was 9,012, being 152 to a square mile. Population in 1850, 8,452.

Originally the island was occupied by Indians, and in 1641, that portion which embraces the town was purchased of them by Thomas Mayhew and others. The first Englishman who became a resident was Thomas Macy, in 1659. He was from Salisbury, in Essex County. He bought the island of Mayhew for £30, in merchantable pay, and two beaver hats.

(*Depot, East Boston Ferry. Office*, 17 *Merchants' Row. Freight Office, do.*)

Annual Meeting, 2d Monday in July.

Incorporated April 14, 1836. The track from Boston to Salem was opened August 27, 1838. December 10, 1839, a Branch Railroad was opened from Salem to Marblehead. December 18, 1839, the cars commenced running to Ipswich Depot. June 19, 1840, they run to Newburyport; and to the New Hampshire line, Nov. 9, 1840,—distance 54 miles.

A. Thorndike, Beverly, *President*. David A. Neal, of Salem; Isaiah Breed, of Lynn; Ichabod Goodwin, of Portsmouth; B. T. Reed, of Boston; Samuel Hooper, of Boston; Samuel Philbrook, of Brookline; Alb't Thorndike, of Beverly, *Directors*. W. S. Tuckerman, of Boston, *Treasurer*. William H. Foster, *Clerk*. John Kinsman, *Superintendent*.

Opened for travel to Salem in 1839, to Portland in 1841.

Eastern Railroad, from Boston, through Lynn, Salem, and Newburyport, to Portsmouth.

Portland, Saco, and Portsmouth Railroad, to Portland. Thence by the Portland and Kennebec Railroad to Bath, Gardiner, and Hallowell, on the Kennebec, and by Steamboat to Thomaston, Camden, Belfast, Frankfort, and Bangor, on the Penobscot River.

This Railroad affords access to many splendid sea-side locations, and passes through many pleasant towns, opening magnificent views of the ocean, leading to the most retired spots for sea-bathing, and to the most delightful walks and drives in the native forests that can be found in New England.

Stations, Distances, and Fares on the Eastern Railroad, from Boston.

WHERE AND HOW TO ADVERTISE.

Newspaper Publishers generally throughout New England, and many in every section of the United States and Canadas, have appointed S. M. PETTENGILL & Co., 10 State Street, Boston, their Agents, in order to increase the amount of their advertising in their respective papers by rendering the same facilities to business men as if the offices of publication were all located in the city and combined in one.

This arrangement advertisers will find to be of great advantage to them, as they can deal with S. M. PETTENGILL & Co. more favorably and more expeditiously than they can with one hundred different publishers at their offices. The prices for any advertising will be made out before sending the advertisement, and a judicious selection of the best papers will be made, comprising those of the widest circulation and best calculated to further the interests of advertisers. They are Agents for nearly all of the following papers in Massachusetts, and most of them are received at their office, No. 10 State Street, Boston.

V. B. PALMER'S

AMERICAN NEWSPAPER ADVERTISING AGENCY,

BOSTON: *Scollay's Building, Court Street;* NEW YORK: *Tribune Buildings;*
PHILADELPHIA: *North-west corner of Third and Chestnut Streets;*

Affords every facility for the transaction of business with the best and most widely circulated Journals of all the Cities and principal Towns in the United States, British Provinces, &c., &c.

THE AGENCY presents a convenient and complete opportunity for publishing advertisements in any number of *the best and most widely circulated newspapers* of the different cities and towns throughout the whole country, at the publishers' lowest rates, with the least possible trouble to advertisers, and with the greatest despatch.

A single copy of an advertisement only is required, from which a sufficient number are printed in such style as advertisers wish to have them appear in the papers, which insures correct insertions.

By this method the advertiser is spared the labor of corresponding with the several papers, the expense of postage, and much time and perplexity in the settlement of bills. Besides this, he can know when his account *is* settled, and no apprehension need be entertained of the too common annoyance of bills being presented, after having been *once* paid.

Copies of papers containing advertisements are forwarded to advertisers, and all requisite attention given to insure general satisfaction.

The agent, V. B. PALMER, is duly empowered to receive subscriptions and advertisements at the publishers' lowest rates.

He is authorized to make contracts, and his receipts are regarded by the proprietors as payments.

The publishers' prices (only) are charged to advertisers and subscribers—and the terms of each paper are on file for examination.

A list of places, papers, terms, and prices, may be had at the Agency without charge.

His long experience and extensive Agency qualify him to impart valuable practical information, which is cheerfully communicated.

Through the Agency a circumspect and discriminating choice of places and the best selection of papers can be had, suitably adapted to various business pursuits—enabling persons to advertise judiciously, effectively, and safely.

Copies of the best newspapers in the United States, may be seen and examined at the Agency, their respective merits understood, and a complete system of advertising adopted, upon either a large or small scale.

Advertisements are carefully and skilfully written, without charge, for those who are not experienced in the art—and improvements suggested in such as are written by unpractised hands.

Through the Agency, a regular, safe, and systematic means is afforded to the business community, of giving notoriety abroad to their respective callings and pursuits—and all requisite information for the adoption of a complete system of advertising in the best newspapers of the country, *far and near*, for which he is deputed to transact business.

☞To public institutions, reading-rooms, clubs, &c., as well as to individuals in all parts of the world, the Agency presents a convenient, safe, and ready means of subscribing for the best journals of the Union, advertising in any number of the most desirable business newspapers, and obtaining valuable information.

Remittances may be made from any section of the country with entire assurance that all orders will be faithfully and promptly attended to. Address V. B. PALMER, Newspaper Agent, BOSTON: Scollay's Building, Court st.—NEW YORK: Tribune Buildings.—PHILADELPHIA: N. W. corner of Third and Chestnut streets.

This old established agency continues to enjoy the full confidence of the press and the public. Whatever is intrusted to Mr. P. or his agents, is promptly attended to, and, as the Press is under very great obligation to him, we are happy to know that he is enjoying the unlimited confidence, as he deserves the good wishes of those whom he has so

long and so faithfully served.—*Albany Evening Journal.*

From an intimate acquaintance with Mr. Palmer, we are prepared to say that any business connected with the Agencies which he advertises, will be both promptly and honorably transacted. In the matter of Newspaper Agencies, he has reduced the business to such an admirable system that all parties can hardly fail to be satisfied.—*N. Y. Daily Tribune.*

To such of our country cotemporaries as have not secured the services of an advertising agent in New York, we commend the old and well-established agency of Mr. V. B. Palmer, in the Tribune buildings. His business relations extend to nearly the entire press of the country; and the promptitude with which his accounts are always adjusted, has secured for him the confidence of those who have had transactions with him.—*Buffalo Courier.*

CHEATING PRINTERS.—We receive an invitation almost every day from some fellow who *claims to be an advertising agent*, to insert somebody's advertisement, and *he* will pay for it. We have been "*wooled*" on several occasions by these *sharpers*, and caution the country press against the *rascals*. *V. B. Palmer* is the *only agent* for the press that we ever had any transactions with who pays promptly and acts honorably. We recommend him to the profession.—*Albany Knickerbocker.*

V. B. Palmer's plan of a newspaper agency for advertising and subscriptions, is deserving of patronage, both from the public and from the country press. Mr. Palmer has acted for the Union for five years, and we bear willing testimony to his fidelity and promptness. We feel that we should be doing him an injustice were we to favor the establishment of another agency, conducted upon his plan, and the forms and arrangements stolen, as it were, from him. We shall accept of no advertisements from any other agencies in New York or Boston, and feel bound to protect Mr. Palmer as much as possible, from having the benefits of his plan taken from him by any one who may have surreptitiously availed themselves of the forms and arrangements of Mr. Palmer in the establishment of a similar agency.—*Saco (Me.) Union.*

Mr. Palmer has, by dint of great energy and indefatigable industry, succeeded in organizing this agency, and accomplishing by means of it, objects that were deemed altogether chimerical when it was first commenced. His success has raised up a number of imitators, who now advertise Newspaper Agencies in the Eastern cities. Mr. Palmer is in no way connected with any of these. Having the most unlimited confidence in his capacity and integrity, he is fully authorized to make all necessary contracts as agent for this paper. We wish it to be distinctly understood, that we have no other agent in any of the cities of New York, Philadelphia, or Boston, and that all inquiries relative to such contracts, coming from these cities, even although directed to ourselves, will be referred to his agency.—*Louisville Democrat.*

MASSACHUSETTS MILITIA.

[*Corrected at the office of the Adjutant-General, to December*, 1851.]

The Militia of Massachusetts is divided into two classes, the active and enrolled; the latter consists of all "able-bodied white male citizens, of the age of eighteen years, and under that of forty-five, excepting persons enlisted into volunteer companies, and persons exempted by law, or incapacitated by physical and other causes." [See sec. 5, Militia Law.] The whole number enrolled in 1851, as appears from the Returns of Assessors of cities and towns, (whose duty it is to make such returns,) is 114,469.

The Active Militia consists of Volunteers, who are paid a per diem allowance when on duty, amounting, in the whole, to $6.50 per annum, each man. They consist, by the Brigade Returns of 1850, of 5,052 men. These are organized into three Divisions, and six Brigades, embracing two Divisionary Corps of Cadets, two Troops of Cavalry, four Regiments, and four Companies "annexed" of Artillery, and nine Regiments of Light Infantry.

TIME AND CONDITIONS OF EXAMINATION.—The examination for the Freshman Class occupies two days, and takes place in University Hall, on the Monday and Tuesday of the Commencement week, (the 19th and 20th of July,) beginning precisely *at 6 o'clock, A. M.*, on Monday morning. Attendance on both days is required.

Every candidate, before examination, must produce proper testimonials of a good moral character, and, after being accepted on examination, must give a bond, with sureties, of which one at least must belong to this Commonwealth, to the satisfaction of the Steward of the College, in the sum of four hundred dollars, to pay all charges accruing under the laws and customs of the University. A certificate that such bond has been given must be exhibited to the President, before any person can be admitted to the privileges of the institution.

TERMS.—There are two terms, and two vacations. The first term begins at the end of the vacation following the Commencement, (which takes place on the third Wednesday of July, annually,) and continues twenty weeks. The Summer Vacation continues six weeks, and the Winter Vacation, seven weeks. The second term, beginning at the end of the first term, continues twenty weeks.

WESLEYAN ACADEMY.

NORTH WILBRAHAM.

The Wesleyan Academy is located ten miles east of Springfield, and about thirty northeast of Hartford, on the eastern extremity of the valley of the Connecticut. The great Western Railroad passes within two miles of the Academy.

The Institution was founded in 1826, under the patronage of the New England Conference of the Methodist Episcopal Church. From its commencement it has received a large share of the public patronage, and has educated in part about eight thousand young persons. Recently, the Trustees have erected a new Academy Edifice, and are remodelling and repairing the other seminary buildings. The amount of funds invested in buildings and apparatus is about thirty-five thousand dollars. The institution is free from financial embarrassment, but has no endowment. The current expenses are defrayed by the annual income from tuition, &c. The course of study is purely academic, but is extensive, thorough, and eminently practical.

The following is a list of its officers, the prices of tuition, number of students, &c., taken from the Annual Catalogue for the year 1851.

STATE NORMAL SCHOOLS.

ESTABLISHED BY LAW, 1838.

The STATE NORMAL SCHOOLS are designed for those *only* who purpose to teach, and especially for those who purpose to teach in the Common Schools. There are at present three in this Commonwealth; one at West Newton, Middlesex County; one at Bridgewater, Plymouth County; and one at Westfield, Hampden County.

STATE NORMAL SCHOOL AT WEST NEWTON.

Eben S. Stearns, *Principal;* Rebecca M. Pennell, Lucretia Crocker, Georgiana Whittemore, *Assistants;* Nathaniel T. Allen, *Permanent Teacher in Model School;* Rebecca C. Lewis, *Do. Primary Department.*

The Normal School, at West Newton, continues to deserve and enjoy a full measure of prosperity. It has the honor of being the first and oldest institution of this class in the New World. Originally established at Lexington, July 3, 1839, it was transferred in May, 1844, to West Newton. The building which it occupies was the gift of Hon. Josiah Quincy, Jr. This edifice was fitted up at an expense of more than $600 by the inhabitants of West Newton, who have ever felt and manifested a deep interest in the welfare of the Normal Schools.

It has always been an exclusively female school. The whole number of pupils that have been connected with it is 686, of whom 539 have completed the prescribed course of study and attendance. Nearly all of this number (539) have become teachers in our Public Schools, the great majority of them for several years, or permanently.

Pupils are admitted on the day preceding the commencement of every other term.

Tuition.—Tuition is free; $10 per term, however, may be charged against those who fail to teach in the State.

Board.—Board may be had in good families for from $2 to $2.50 per week, including washing and fuel. The whole annual expense is about $100.

Terms and Vacations.—There are three terms in the year. The Winter Term commences on the 2d Wednesday in December, and continues 15 weeks. The Summer Term commences on the 2d Wednesday in April, and continues 15 weeks The Autumn Term commences on the first Wednesday in September, and continues 12 weeks. Between the summer and autumn terms there is a vacation of 6 weeks; between the other terms, a vacation of 2 weeks.

BRIDGEWATER STATE NORMAL SCHOOL.

Nicholas Tillinghast, *Principal;* Richard Edwards, *Assistant.*

This school was established by the State for the education of those intending to become teachers. It is placed by law under the direction of the Board of Education.

Those who enter this school must express an intention of becoming teachers; male pupils must be at least 17, and females at least 16 years of age. Of those who become teachers in the Common Schools of Massachusetts, no tuition fee is required.

The next term will commence March 24, 1852. The term following, August 4, 1852.

The Fall River railroad passes through Bridgewater, and the Normal School House is but a few rods from the depot.

STATE NORMAL SCHOOL AT WESTFIELD.

David S. Rowe, *Principal.*

It first went into operation at Barre, Sept. 4, 1839, under the care of Prof. Samuel P. Newman, as Principal. It continued at Barre till November 1841, when, upon the death of its Principal, it was suspended till Sept. 4, 1844. The school then recommenced at Westfield, with Rev. Emerson Davis, D. D., for its Principal, and remained under his care till September 3, 1846, when a new and beautiful Normal School edifice was dedicated. Since its first establishment, about 650 (males and females) have been members of the school, some for a single term, and others for two or more terms. Lectures are given almost daily, upon modes of Teaching, School Discipline, Obligations of Teachers, School Arrangements, &c. &c. The exercises of the school are exclusively English.

Terms.—The school year is divided into three equal terms, of 14 weeks each, commencing as follows:—

The Spring and Summer Term, the 1st Wednesday in April.

The Fall Term, the 3d Wednesday in August.

The Winter Term, the 1st Wednesday in December.

Board.—Board can be obtained in private families, for about $1.75 to $2 per week.

TEACHERS' INSTITUTES.

The number of Teachers' Institutes held during the year is twelve, the greatest that the law will allow. More would have been held if provision had been made for them. They were as follows:—

At Royalston,	March 10–15, 1851.	No. in attendance,		111
" Pitsfield,	" 17–22.	"	"	150
" Lawrence,	" 31–April 5.	"	"	101
" Ware,	April 14–19.	"	"	103
" Blackstone,	" 21–26.	"	"	64
" N. Attleboro'	" 28–May 3.	"	"	107
" Petersham,	Oct. 6–11.	"	"	206
" W. Newton,	" 13–18.	"	"	152
(Besides 100 from the Normal School.)				
" Stoughton,	Oct. 20–25.	No. in attendance,		74
" Southbridge,	" 27–Nov. 1.	"	"	114
" Northboro',	Nov. 3–8.	"	"	124
" Barnstable,	" 17–23.	"	"	129
Making the total number in attendance,				1,435
And average attendance a fraction less than				120

These Institutes are all under the personal superintendence of the Secretary. The Board of Permanent Instructors employed by him, are

Prof. S. S. Greene, Superintendent of the Public Schools of Providence, and Professor of Didactics in Brown University, *Teacher of Grammar.*

Mr. D. P. Colburn, formerly Teacher in the Bridgewater Normal School, *Teacher of Arithmetic.*

Prof. William Russell, Principal of the Merrimac Normal Institute, *Teacher of Elocution.*

Lowell Mason, Esq., of Boston, *Teacher of Music.*

Prof. A. Guyot, *Teacher of Geography.*

Mr. W. J. Whitaker, Principal of the School of Design, in Boston, *Teacher of Drawing.*

In addition to the above-named individuals, Professor Agassiz is conditionally engaged for the ensuing year.

The number and cost of dictionaries, furnished to Public Schools at the expense of the Commonwealth, during the year ending December 31, 1851, according to the Resolves of May 2, 1850, are:—Webster's Dictionary, 340 copies; Worcester's Dictionary, 8 copies, at an expense to the State of $1,376.

Whole number of copies furnished since the Resolves took effect,—Webster's Dictionary, 3,058 copies; Worcester's Dictionary, 111 copies; total expense to the Commonwealth, to January 1, 1852, $12,454.

The whole number of Public Schools, according to the last returns, is 3,987. As comparatively few of these are primary schools, which are not entitled to a dictionary under the Resolves, there remains a large number of schools still to be furnished. Every town in the State, with one exception, has made application, through its committee, for copies, yet in many towns there are some districts that have failed to comply with the condition expressed in the Resolves, and consequently those towns are but partially supplied.

Many private libraries in the United States exceed the average.

HISTORICAL AND COMMEMORATIVE ASSOCIATIONS.

American Antiquarian Society, Worcester.

Incorporated 1812. The American Antiquarian Society, established for the purpose of collecting and preserving the materials of history, more especially *American* History, was incorporated by the Legislature of Massachusetts, in 1812.

Isaiah Thomas, the distinguished Printer and Publisher, and author of "The History of Printing in America," was the first President, and has been the greatest benefactor of this Institution. A brick edifice for the Library and Cabinet, erected at his expense, was completed in 1820. His private collection of books, which was a very considerable one, became the basis of the Library. Extensive additions were made to the building after his death, from resources provided by his will; and the principal portion of the funds of the Society, now amounting to more than $27,000, resulted from his bequests.

The Library of the Society now exceeds 16,000 volumes. Its cabinet contains many articles of curiosity and interest; and its manuscripts, coins, &c., are of considerable value. Two volumes of

Transactions, and a catalogue of the Library, have been published; and a third volume of Transactions is in preparation for the press.

There are two meetings of the Society in the year; one at Worcester, on the 23d day of October, the day on which Columbus discovered America; the other in Boston, on the last Wednesday of May. The Council of the Society meet on the last Wednesday of each month, at the Antiquarian Hall, in Worcester.

The Thursday Lecture.

This Lecture was commenced by John Cotton, second Pastor of the First Church in Boston, in the autumn of 1633, and was at first sustained by himself alone.

Afterwards, by courtesy, it came to be preached by each of the ministers of the Boston Association in turn.

In the year 1845, the association gave it back into the hands of the pastor of the First Church, to whom by right it still belonged.

By his invitation, the following gentlemen are pledged to assist him in sustaining the Lecture. It is preached by them in the order of their college graduation.

NEW ENGLAND REGISTER.

On the following pages we give the present executive organization of the New England States, and also the Towns and Counties in each State, with the population. The six New England States embrace an area of 65,855 square miles, being about one-third larger than the State of New York. The number of square miles in Maine is 32 628; New Hampshire, 9,411; Vermont, 10,212; Massachusetts, 7,500; Rhode Island, 1,340; Connecticut, 4,764. Total, 65,855 square miles. It will be seen that Maine is nearly as large in territory as all the other New England States.

COMMON SCHOOLS.

In 1828, twenty townships of public land were reserved as a basis for a school fund. The proceeds of the land already sold are $104,363.63, which constitutes the permanent school fund of the State. In 1850 twenty-four half-townships of the undivided lands of the State were set apart and added to the permanent school fund. The banks are required to pay into the treasury ½ of one per cent. semiannually on their capital stock for the use of schools. This tax for 1850 was $27,230.27. Add to this six per cent. interest of the school fund, $6,216.81, and there is the sum of $33,492.10, which was apportioned among the towns making returns during the past year. Towns are obliged by law to raise an amount of school money equal to 40 cents for each inhabitant. In the 3,948 districts, and 279 parts of districts, which made returns for 1850, there were 2,706 male, and 3,921 female, teachers. Average monthly wages of male teachers, $16.66; of female teachers, $5.92; average length of schools in weeks, 18.8; schools suspended by incompetency of teachers, 152; number of good school-houses, 1,596; number of poor ones, 2,012; number built the past year, 120; whole number of scholars, 230,274; whole attendance in winter, 151,360; average attendance, 91,519. The whole amount of school money raised by tax was $264,351.17, which was $41,010.37 more than required by law. $29,921.46 were expended for private schools. There are school libraries in nine towns. There are 92 chartered academies in the State, of which 64 sustain schools during a greater or less part of the year. The teachers' institutes have been in successful operation for several years; 1,732 teachers attended them in 1850; 801 males, 931 females. The session of each institute was ten days.

We are indebted to the American Almanac for the following valuable statistics in regard to this State.

PUBLIC SCHOOLS.

The State has a School Fund invested in bank stock of $51,300. By an Act passed in 1836 the interest of the State's part of the United States surplus revenue (commonly called the Deposit Fund) was set apart for Public Schools. $35,000 is annually paid from the State Treasury for Schools. By an Act passed in June, 1848, the proceeds of the militia commutation tax in each town are to be applied hereafter to the support of public schools.

The whole number of school districts in the State is 332, of which 231 own school houses. There has been expended for school houses during the last six years, $148,254. No. of persons in the State under fifteen, 47,857. No. of scholars registered, 24,442,—13,360 males and 11,082 females; average attendance, 13,182. No. of male teachers, 239; of female, 270. Amount received from the State, $34,348.71; amount raised by towns, $50,332.70; whole amount, $96,913.54. Expended for schools, $95,291.16; expended for school houses, $19,070.81.

In June, 1851, the school laws were revised and consolidated and in many respects much improved.

TOWNS IN NEW ENGLAND.

The Act of Congress under which the U. S. Census for 1850 was taken, establishes the rule which is to be adopted for the apportionment of members for the 33d Congress, and until the taking of the next census. This rule limits the number of the members of the House to 233, and provides that the ratio of apportionment shall be obtained by dividing the aggregate population of the Union, as ascertained by the new census, after deducting therefrom two-fifths of the whole number of slaves, by 233. The population of each State is then to be divided by the ratio so obtained, and the last quotient will show the number of members to which the State will be entitled, besides which, however, those States to which the largest fractions belong, after the division, will be entitled to one additional member, until the whole number of 233 shall be made up. This apportionment is to be made, and the result certified, by the Secretary of the Interior.

We give the U. S. Census of 1850, for the States of Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island, taken from the most authentic sources. The returns of the census have not yet been officially published.

This establishment is one of a general and national interest. Its extent and efficiency, and the liberal expenditures which have made it what it is—one of the most prolific manufactories of arms and capacious arsenals in the world—are legitimate subjects of national pride. Accordingly, it has become the resort of sight-seers and travelers, and constitutes one of the principal attractions of our beautiful locality; and at no public establishment in the United States can the eye be gratified with the sight of so much beautiful and ingenious machinery, so large, skillful and well paid a company of laborers, such finely laid out and well kept grounds, and so thorough and orderly a system of operations, as here.

The arsenal, the offices, and the principal manufacturing and storing buildings of the Armory, are located on Springfield Hill, and overlook the Connecticut valley at a charming elevation. The heavier operations of the concern are effected at three localities on Mill River, known as the "Upper," "Middle," and "Lower Water Shops" The land owned on the Hill by the Government amounts to 72 acres and 2 rods; at the Upper and Middle Water Shops, 19 acres and 66 rods; at the Lower Water Shops, 10 acres and 102 rods;—total land owned by the Government, in town, 102 acres and 10 rods. The principal building is the new arsenal. This is 200 feet long by 70 feet wide. Its height is 50 feet, which is divided into three stories, each story being sufficiently large to contain 100 000 muskets. The tower is 89 feet high and 29 feet square, the flag staff rising 60 feet above the deck of the tower Another large building is the new brick structure for storing lumber and musket stocks This is 400 feet long, 55 feet wide, and two stories high. Here a stock of four years in musket stocks is constantly kept, that the timber may be properly seasoned. The principal of the three old arsenals is 120 by 40 feet on the ground, and 3 stories high; and the other two are respectively 2 stories high, and, in their other dimensions, 100 feet by 34. The other principal buildings are the work shops. There are located on the Hill 10 dwelling houses which are owned by the Government; at the Upper Water Shops, 2; at the Middle, 2; and Lower, 2;—total dwelling houses, 16.

The total expenditures of the Armory for the fiscal year ending June 30th, 1851, were $271,308 33. Of this sum, $179,216 29 were paid out for labor alone. To show the extent and variety of the stock and materials used, we give the items consumed last year.

Refined Iron,	446,628 pounds.
Cast Iron,	41,298 do.
Inferior Iron,	3,677 do.
Wire Iron,	1,079 do.
Cast Steel,	63,146 do.
Shear Steel,	651 do.
Nails,	2,326 do.
Wood Screws,	163 gross.
Sand Paper,	396 quires.
Sulphuric Acid,	2 823 pounds.
Boards and Plank,	145,013 feet.
Timber,	32,204 do.
Bricks,	20,000
Leather,	1,788 pounds.
Thong,	31 skins.
Sperm and Whale Oil,	2,380 gallons.
Assorted Files,	8,613
Grindstones,	52,634 pounds.
Charcoal,	46,598 bushels.
Anthracite Coal,	2,438,924 pounds.
Pit Coal,	52,700 do.
Fire Stone,	4,480 pounds.
Furnace Clay,	134 bushels.
Wood,	200 (2 ft.) cords.

The result of the operations of last year is as follows:

Percussion Muskets complete, . . .	21,000
Percussion Musketoons complete, . .	2,000
Muskets altered from flint to percussion, .	57,272
Extra cones for issue with muskets, .	119,757
Compound screw-drivers for issue with do.	93,908
Percussion hammers (for other posts,) .	41,682
Arm chests and packing boxes, . .	295
Tilt hammers for welding barrels, . .	2
Components of muskets for other posts, equal to Percussion Muskets, . .	55

Col. RIPLEY, the commanding officer at the Armory, received an order to alter the flint lock muskets to percussion, if practicable, at a cost not exceeding $1 per musket. This work was commenced in July, 1849, and the whole number, 113,406, were completed by February, 1851, at a cost of 50¼ cents each. At the close of the year, there were on hand a grand total of *two hundred and fifteen thousand nine hundred and fifty muskets.*

The largest number of men employed during any one month last year was 431; the smallest, 320—average number per month, 381¾. The average pay of these men, making no account of lost time, and reckoning in all, from the highest to the lowest, was $40 per month.

In the month of June, just past, the division of office, labor and laborers, was as follows:

Superintendent, . . .	1	Iron Maker, ...	1
Master Armorer, . . .	1	Assistant forgers, . .	9
Military Storekeeper, .	1	Annealers, ...	6
Clerks, ...	4	Borers, ...	14
Inspectors, ...	11	Millers, ...	26
Machinists, ...	16	Lock filers, ...	24
Barrel forgers, . . .	18	Bayonet filers, . . .	6
Lock forgers, ...	7	Appendage filers, . .	3
Bayonet forgers, . . .	8	Polishers, ...	16
Ramrod forgers, . . .	2	Stockers, ...	16
Mounting forgers, . .	10	Lock finishers, . . .	3
Mounting filers, . . .	14	Arm finisher, ...	1
Barrel finisher, . . .	1	Appendage finishers, .	2
Mounting finishers, . .	3	*Jobbers*—Smiths, . . .	5
Drillers, ...	11	Filers . . .	2
Turners, ...	3	Carpenters, .	19
Grinders, ...	3	Mason, . . .	1
Barrel filers, ...	11	Laborers, . .	36
Appendage forgers, . .	5		

The above give a total of 320 men, employed in June, which is the smallest number employed in any month during the year, with the exception of May, when the number was the same.

At the Lower Water Shops, there is now comparatively little business done. A principal part of these shops and their water power are leased to Messrs. Ingersoll, Doolittle & Co., and constitute the establishment known as the Massasoit Flour Mill. The Government, however, carry on a rolling mill here, where every scrap of iron, iron filings &c., produced in the process of manufacture, are melted and rolled into stock to be re-consumed, so that not a pound of iron is thrown away or sold at less than its value. This rolling mill is furnished with a complete set of machinery for rolling and slitting iron, 2 tilt hammers, 1 cutting shears for bars, and 3 water wheels, as the driving power.

At the Middle Water Shops, the process of forging barrels, ramrods and bayonets is carried on. There are here 13 tilt hammers, carried by twelve water wheels. These shops, with the Lower, employ 34 men. A new invention has just been completed here, and one which will be of great importance to every large forging establishment in the country. The old method of driving a tilt-hammer is by a water wheel to each hammer, or to every two hammers. The necessity compelling this arises from the fact that if the hammer were driven by a belt, from a regular moving power, the speed of the hammer could not be increased or decreased suddenly at will. The new invention consists of a loose driving belt—so loose that when it is not tightened by bearing against it, the driving drum has no action upon it. A pulley is attached to a compound lever half way between the drum and the pulley where the power is applied to the hammer, and, by acting upon the lever, the pulley presses upon the belt, until it is so far tightened as to drive the hammer at the utmost speed of the drum. When a smaller speed is required, the lever is partially released, allowing the belt to slip, and in this manner, by increasing or diminishing the tension of the belt, any required speed is attained. The result of this simple and beautiful invention is, that a thousand tilt hammers, if necessary, may be driven by one water wheel, or by a steam engine.

At the Upper Water Shops there are 57 men employed. Here, the boring, turning, grinding, and polishing of barrels, ramrods and bayonets are effected, and here also the tempering and polishing of the lock work. The machinery in these shops consists of 13 boring banks, 9 turning engines, 7 large grind stones, 4 turning lathes, 10 milling machines, 2 barrel polishing machines, 1 for buffing bayonets, 2 screw cutting machines, 1 punching press, 1 wood planer, 1 circular saw, 1 machine for splitting leather, and all are driven by 4 water wheels.

The filing shop is located on the Hill, and employs 93 men, a larger number than are engaged in any other department. The machinery in this department consists of 1 boring bank, 1 turning lathe, 2 turning engines, 45 milling machines, 3 machines for cutting screws, 1 for tapping cone-seats, 3 for drilling and finishing cones, (the part of the lock receiving the percussion cap,) 2 for cheeking hammers, 11 drill presses, 1 punching press, 2 machines for straightening hammers, and 2 for grinding cutting mills.

There are 31 men employed in the machine shop, and it is here that the machinery and the principal instruments of manufacture for the other departments are made. The machinery of this department, as well as that of all the other shops located on the Hill, is driven by a double engine of thirty-horse power, manufactured by Otis Tufts, Esq., of Boston. This engine is one of the most perfect and beautiful ever built in the United States, and, from its exquisitely perfect operation and high finish is always a prominent object of attraction to visitors. The machinery of this department consists of 1 cutting engine, 9 turning lathes, 2 milling machines, one machine for shaving "bridles," 5 planing machines, 4 machines for grooving, pointing sawing and planing plank, 1 for making arm chests, 1 for making packing for muskets, 1 for splitting leather, 1 for sawing tenons, 1 for cutting bolts, 4 punching presses, 3 drill presses, 5 turning engines, 1 straightening machine, and 1 slitting machine.

The most beautiful machinery in the whole establishment is that in the stocking room. The machinery here is operated by 20 men, and consists of 14 machines, which would be best described by simply mentioning the work that they perform. Into this department the stocks come, in the form of *blanks*. They are rough forms of gun stocks, sawed out of black walnut plank. They first pass through the widely celebrated Blanchard turning machine, which turns the form roughly in the shape required, and are then passed from one machine to another, in rapid succession, receiving every depression for the reception of the lock and mounting, the grooving for the breech-pin, barrel and ramrod, holes for the reception of screws, turning, &c., until the stock is complete. All this irregular mortising, boring, &c., is effected with most unerring precision, and every piece of the lock and mountings fits into its appropriate place in the most perfect manner. The inventor of a majority of these machines is Mr. Cyrus Buckland, a gentleman of eminent mechanical genius, long connected with the Armory.

The manufacture of a single musket is effected by four hundred different operations, and the majority of the men employed engage in only one of the operations. A larger number of muskets were manufactured, last year, than any year previous, and a calculation based upon the number turned out shows that throughout the year of 313 working days, of ten hours each, a musket was completed every 8

minutes and 56 seconds. The various parts of the musket pass, during their manufacture, through the hands of inspectors who, with their guages, determine the exact dimensions of every piece, and reject every one that is not exactly what is required. Thus, a hundred thousand muskets might be taken to pieces, and thrown promiscuously into a pile, and the whole taken up and put together again without the misfit of a single component, to its appropriate place. Thus, too, when the arms are in use, there is never need of sending them to the Armory for repairs. Hammers, screws, springs, &c., furnished from the Armory, as extras, will take the place of any damaged part, precisely as if they were made for the arms to be repaired.

The process of manufacturing the musket barrel is one of the most important and difficult in the whole range of the Armory operations, and one which is guarded with multiplied tests, at every step of its progress, from the bar to the finished tube. The bar, which is of the best Salisbury and Ancrom refined iron, is first cut into lengths, weighing 10¾ pounds each. These are rolled into shapes, and then the edges rolled up, lapped upon each other, and welded. They are then inspected, and the imperfect ones rejected. As they pass along through turning, boring and grinding, they are subjected to inspection at each step, and the workmen are held responsible for the full value of any barrel they may spoil, at the stage in which it is spoiled, and the amount is deducted from their earnings; and, we may say here, that the same course is adopted in regard to every component of the musket. The barrel having been reduced to the dimensions required for proof, (by powder,) which dimensions are three hundredths of an inch greater, in the exterior diameter of the barrel, and three hundredths of an inch less in the diameter of the bore, than the finished barrel, leaving an ounce and a half to be worked from each barrel in finishing, it is then subjected to the powder test. Fifty-five barrels are usually loaded and discharged at the same time, in a building made for this purpose. Each barrel is discharged twice, the first charge consisting of one eighteenth of a pound of powder, one ball and two wads, each wad occupying three-fourths of an inch of the bore, and each ball weighing one-fifteenth of a pound. The second charge consists of one-twenty-second of a pound of powder, one ball and two wads, and each charge is well rammed. These barrels are laid on a cast iron, grooved bed, and the balls are discharged into a bank of clay, which is occasionally washed for the lead it contains.

The inspection of the barrels is so rigid before they come to the proof, that very few of them burst. After proof, they are again inspected, as before, to see that there are no ring-bones, cinder-holes, flaws or cracks, or defects of any kind, that will not disappear in the finishing.

The number of condemned barrels, in the last year's operations, was, for defective workmanship, 451, and for defective material, 5,323. Of these, 183 of the first class were condemned before reaching the stage of proving, and 1,971 of the last. In proving, 251 were condemned for workmanship, and 1,315 for material. In the whole number of barrels proved, only 142 burst, and an instance of a barrel bursting at the second discharge, has not been known for several years. Between this stage and the finishing of the barrel, 17 were condemned for workmanship, and 1,537 for material. Thus, in making 21,000 muskets, only 451 barrels were spoiled by the workmen, and the value deducted from their earnings, while 5,323 were a loss to the government, from imperfect material.

A single musket cost, in the year 1830, $9 03½. The cost for the last year was $8 75; and for a musketoon, $9 15. In ten years, the cost of manufacture, per musket, has been reduced nearly one-half, it being in 1841 $17 44.

The smallest piece value of a component of a musket is one mill; the highest, $3 50.

The following is the weight of a musket, in detail and total, expressed in pounds and hundredths of a pound:

Weight of barrel, ...	4 25
Weight of locks and side screws, . .	0 84
Weight of bayonet, ...	0.66
Weight of musket without bayonet, .	4.25
Weight of musket complete, ...	9.32

It will thus be seen that a complete percussion musket weighs ten pounds, lacking eighteen hundredths. This weight is less than that of the old flint musket.

The exquisite order and neatness which reign throughout the whole establishment, are always subjects of remark to those who visit it, and the perfect system of accounts by which every item of stock is followed and checked in its passage from the hands of the store-keeper to its final and perfect transformation into the finished arms, is enough to beatify one whose organ of order is dominant in his cerebral development. This intimate system of accounts is as prevalent in every other department, as in that of stock, and is necessary in the making up of the quarterly returns to the department.

It has already been made public that an iron fence is to be built around a portion of the government grounds, an appropriation having been made by Congress for this purpose. A specimen section of this fence has been completed, and put up, and is decidedly beautiful and appropriate in design, and neat in appearance. It is to stand upon a running pedestal of Longmeadow free-stone, and will be precisely eight feet and eight inches high. It is now to be put up only the length of the government grounds on State Street, and across the eastern end. The standing portion of the fence is composed of posts and two styles of pickets. The post terminates at the top with the representation of a battle axe corresponding more nearly to the old Roman fasces than to any other design with which we are acquainted. Each alternating picket is less in height than the others, the long ones representing halberds with the cross curving upwards at the points, and the short ones, spears.

Since the commencement of the superintendence of Col. RIPLEY over this extensive institution, there has been a marked change in its general character, for the better. The grounds have been reformed, terraced and beautified, and every department of manufacture is now carried on with such order and efficiency, that the world may safely be challenged to produce, in every respect, the equal of the Springfield Armory.

We are indebted to the *Springfield Republican* for the above interesting and accurate description of the Armory.

We also give the following abstract from an Address delivered at the opening of the Town Hall in Springfield, March 24, 1828, by George Bliss, from which a general idea may be obtained of the early progress made in establishing an Arsenal at Springfield.

It was in the Revolutionary War a recruit and rendezvous for soldiers, and was fixed upon for making and repairing the various munitions of war, and a depot for military stores. At first the whole was confined to Main Street. The laboratory for cartridges, &c, manufactured on such occasions, was in the barn then owned by Ebenezer Stebbins on Main Street, a short distance from the Western Railroad depot near the corner of Ferry Street. After two or three years the public works were removed to the hill where they now are. This was done in the years 1778 and 1779. A few cannon were cast near the lower water shops during the war, but no small arms were manufactured till after the peace of 1783. The armory was established here by the national government in 1794, since which time great improvements and additions have been made in grounds and buildings.

The people, at the close of the Revolutionary War, in this part of the country, were very heavily burdened with heavy debts and enormous taxes. From 1783 to 1786, at different times, armed and organized forces were seen in the streets to prevent the regular administration of justice.

SHAY'S INSURRECTION. Passing over what had occured before, in the winter of the year 1787 large bodies of men collected from various quarters, organized as a military force, and Daniel Shays assumed the general command. From all quarters the insurgents seemed to be centered in Springfield. Shays commanded a large body collected in the eastern part of the town. Luke Day had also a large force in West Springfield. A third party, under Eli Parsons, formed at Chicopee. The object was to possess themselves of the military stores and arms at the arsenal here. In arms and amunition they were quite deficient. A considerable force, by order of the government, was stationed here, to protect and defend the stores, under the command of Major General Shepard. Shays' plan was that all three of his bodies should, at the same time, from different directions, attack the troops at the arsenal. Shays sent a message to Parsons and Day, informing them that he should be at the stores at an appointed hour the next day, and requested them to meet him there. Day sent back word that he should not be there on the day appointed, but would be there the next day. His message was intercepted and the messenger detained. At the time appointed Shays drew near the arsenal in close column, and was fired upon by Shepard, which soon dispersed his forces. Day was entirely ignorant of proceedings, and though the distance was not more than two miles to West Springfield, the firing of the cannon was not heard or noticed.

In 1793, all of our courts were removed to Northampton, but re-established here in 1813.

Within the limits of the town the population of Springfield, by the census of 1791, was 1,574; in 1810, 2,767; in 1820, 3,914; in 1827, 5,788.

The place where the Town Hall now stands was a deep marsh, and the water was frequently standing in great depth. The Town Hall was completed February, 1828.

The following is a list of the inhabitants of Springfield from 1636 to 1664, and the time of their settlement.

1636. William Pynchon, Henry Smith, William Blake, Edmund Wood, Thomas Ufford, John Cabel, Matthew Mitchell, Samuel Butterfield, James Wood, John Reader, Thomas Woodford.

1638. John Searle, Richard Everett, Thomas Horton, Rev. George Moxon.

1639. Thomas Mirrick, John Leonard, Robert Ashley, John Woodcock, John Allin, John Burt, Henry Gregory.

1640. Samuel Hubbard, Elizur Holyoke, William Warriner, Henry Burt.

1641–2. Rowland Stebbins, Samuel Wright, Richard Sikes, John Deeble.

1642–3. Samuel Chapin, Morgan Johns, Thomas Cooper.

April, 1643. James Bridgman, Alexander Edwards, John Dobie, Rodger Pritchard, Francis Ball.

May, 1644. John Harmon.

1645. William Vaughan, Miles Morgan, Francis Pepper, John Burrhall, Benjamin Cooley, John Matthews, George Colton, Joseph Parsons, John Clarke.

1646. James Osborne, Thomas Rieve, Widow Margaret Bliss, Nathaniel Bliss, Lawrence Bliss, Samuel Bliss, John Bliss, Thomas Thompson, Richard Exell, William Branch, Griffith Jones, Rice Bedorthia, Hugh Parsons, John Lombard, John Scarlet, George Langton.

1651–2. Anthony Dorchester, John Lamb, Samuel Mansfield, John Dumbleton, Jonathan Taylor, Rowland Thomas, Thomas Miller.

1653–4. Benjamin Parsons, Obadiah Miller, Abel Wright.

1656. Hugh Dudley, William Brooks, Simon Beamon, Samuel Terry, John Lamb, Benjamin Mun, John Stewart, Thomas Bancroft, Richard Manus, Thomas Gilbert, Simon Sachet.

1658. Richard Fellows.

1659. Rev. Peletiah Glover, Tahan Grant, Nathaniel Ely, Samuel Ely.

1660. John Keep, Edward Foster, Thomas Sewall, Thomas Day, John Riley, John Henryson, William Hunter, John Scott.

In 1763, the eastern part of the town, including the mountain parish half a mile west of it, was made a district called Wilbraham.

In 1713, Longmeadow was incorporated a separate parish called third.

Enfield, Sulfield, and Somers, were originally settled as a part of Springfield.

For the foregoing information we are under obligations to Mr. L. C. ALLIN.

STOVES, FURNACES, AND FUEL.

Any middle-aged man can remember the introduction of Anthracite Coal, and the cost of fuel before it, and he may easily calculate what would have been the cost of wood sufficient to create the same degree of heat all over his house, which he now considers a necessary comfort of life. With Anthracite Coal came various contrivances and experiments for the best mode of using it; and the result is, that from Open Fire Places, the gas escapes into the room, affects the lips, the skin and the lungs, and is unpleasant and unhealthful. Then to remedy the bad effects of the gas in the rooms, and to economize in fuel, Stoves were invented of various plans and forms for burning it, which at the present day forms no small branch of the industry of our State.

Some idea may be formed of the steady increase in the manufacture and sale of Stoves from the fact that from one house alone in Boston, that of Messrs. CHILSON, RICHARDSON & Co, (formerly GARDNER CHILSON,) nearly 10,000 Stoves are sold annually; while in 1837, the number of Stoves sold by Mr. Chilson did not exceed 1,000. Notwithstanding the great economy in fuel by the use of stoves over open fire places, yet it was found necessary for comfort and health to have a stove placed in each room and passage, else in passing from a warm to a cold room health was endangered. But the trouble and expense of a stove and fire for each room is attended with many serious objections, and to remove these objections Furnaces were invented to warm with one fire the whole house This mode of warming by Furnaces has met with great favor, especially those of the most approved construction.

In 1838 the number of Furnaces sold by Mr. Chilson did not exceed 30, but as with Stoves, so there has also been a steadily increasing demand for Furnaces. The number of Furnaces manufactured and sold by Messrs. Chilson, Richardson & Co, the past year, amounts to 500. Although it is but a few years since the introduction of Furnaces, yet an entire change in the principle, construction and character of the heat generated by them, has been successfully accomplished by Mr. Chilson, from that of the common cast iron cylinder pot furnace, to those constructed on the most scientific principle for securing the greatest amount of heat from the fuel consumed; producing a fresh, healthful, warm atmosphere throughout the buildings; and insuring great durability without liability of repairs. Another important object has been secured in the construction of this kind of furnace, and plan of setting it, which is that of preventing the possibility of firing the buildings in which they are placed.

Mr. Chilson has undoubtedly given more attention to the important subject of the invention of warming and ventilating apparatus, than any other individual in the country. His inventions are based on strictly scientific principles, which govern the elements of air and heat in harmony with the laws of nature.

A great error has pervaded the form of the apparatus for burning Anthracite Coal in stoves and furnaces hitherto used, and the latter in particular, in which the fire pot containing the fuel was a long iron cylinder, and set permanently in its brick walls. The necessary consequences were, that the coal was confined in a deep, compact bed, presenting the least possible surface for radiation, and in the worst possible position for combustion; so that a given quantity of fuel gave out the least possible heat, and made the most possible waste in clinkers, &c. Then the red hot coals came in contact with the iron pot, and made that red hot also; and as the coals were the hottest in the centre, so was the iron pot, and being unequally heated, it necessarily was unequally expanded, and more at the centre than above or below it This unequal expansion of parts necessarily cracked the pot, and through the cracks the poisonous gas escaped into the air-chamber, and thence passed into the house, thus destroying health and comfort

And all this was the consequence of the action of the unscientific fire-pot. Its own action necessarily destroyed itself, and at the same time cracked and warped the plates and joints of the furnace about the fire-pot; and the only remedy was to remove the brick work, take out the cracked pots and plates, and put in new ones, and rebuild the brick work. The consequence was a public belief that Furnaces poisoned the air of a house, and consumed themselves, and thus cost health and money. The general reputation of furnaces for a long time were based upon such conclusions.

But a new era came with CHILSON'S FURNACE. Mr. Chilson made a new fire-pot on an entirely new principle, conforming to, instead of opposing, the natural laws. The old fire-pot was deep, he made his shallow; the old was narrowest at the top, the new is the broadest; the old fire-pot was a cylinder much taller than it was broad, the new one has an open flaring basin, much broader than it is tall; the old fire-pot held its heated coals against the sides of the iron pot, the new is lined with soap-stone, which prevents the hot coals from touching the iron of the fire-pot. The natural result of Mr Chilson's invention is, that his fire-pot presents the broadest possible radiating surface, and holds the coals in a shallow bed, through every part of which the air passes freely, and furnishes the most perfect combustion. The logical deduction derived from this is, that from a given quantity of coal the most possible heat combined with the least possible waste is obtained.

Then, as the fire-pot never expands unequally or materially, it never cracks, and there being no escape of gas into the air-chamber or the house, the fire-pot will last a life-time. The arrangement of this Furnace in its parts above the fire-pot, is also such as to prevent the intense action of the heat from warping or cracking any part of it, and there is therefore no burnt iron heat coming from the furnace or fire-pot, and no escape of coal gas into the air-chamber. All the evils of old furnaces are thus removed. The new furnaces are made healthful and economical, one fire only being necessary to fill many rooms and large buildings with a salubrious atmosphere.

The best recommendation of the invention is its own experience. It has by its utility been spread all over the country, and by the use of scientific principles in its construction, it has won the commendation of scientific men, who saw at once the reasons of its efficiency.

This Furnace has received the first premium of all the principal Fairs in America, among which one Gold Medal, three Silver Medals, besides numerous Diplomas, are on record.

At the World's Fair it gained the PRIZE MEDAL, and plans of its construction were engraved and printed in the Illustrated Catalogue of the Fair, and its Secretary testifies, under his own signature, that "this compliment was paid to no other article in the American exhibition *unsolicited*." So favorable has been the impression produced by this Furnace, that its proprietors contemplate sending a special agent across the Atlantic to superintend the important and growing branch of their business in that country. Its use in England was begun by the EARL OF CARNAVAN, in his lordly castle, and it will carry increased comfort into the homes of the English people.

This but adds to the substantial evidence already adduced, that American skill and enterprise is justly appreciated and acknowledged abroad.

IRON MANUFACTURE.

The great improvements in the manufacture of Iron, and its direct application to the uses and even luxuries of domestic life, demand a passing notice. Until quite

recently the many uses of this metal have been unknown to the American public. The general conception formed of Iron has been that it is a heavy, clumsy substance, adapted only to rude and massive objects But recently, however, it has been discovered useful for a thousand other purposes, and in no other art probably, has there been more progress than in that of Iron Moulding. Messrs Chase Brothers & Co., of Boston, have within the past year made extensive arrangements for the manufacture of every description of Ornamental Iron Work, and their assortment already embraces a large variety of articles of Furniture, Statuary, Fountains, Iron Railing, &c. All of these are produced after the most beautiful and graceful styles. The elegance of design, the durability of the material, and the low price at which these articles are sold, will, we are confident, ensure their general introduction. Those who possess the most refined taste will doubtless find something in these manufactures to admire, while the strict economist will probably feel a satisfaction in converting them to his purposes.

FIRE-PROOF SAFES.

Within a few years the marked progress in the manufacture of Fire Proof Safes has attracted considerable attention. The business has extended itself to other manufacturers, not exclusively devoted to the manufacture of this article. Thus competition has given us the advantage of the best mechanical skill, and at the same time secured to us an article which for preserving our valuables, brings with them the value which is produced by the unquestionable test of experience. Previous to the year 1835, there was nothing of a *portable* nature in use that deserved the name of "Fire Proof Safe." This remark is based upon the fact that a Asbestos, and Gaylor's Knob Safe, and several others, large number of Safes, of various kinds, such as Scott's were completely destroyed by the great fire that occurred in New York in the winter of that year. This event led others to try their skill in endeavoring to make something that would be what its name purported, a *Fire Proof Safe.*

We believe the efforts to produce such an article have been successful, and perhaps no establishment is more closely identified with its manufacture than that of EDWARDS, HOLMAN & Co. Their establishment was commenced some fifteen years ago, under the style of Thayer & Edwards, and was the original Salamander Safe manufactory in the United States. Its complete success is proved by the great number of all sizes which have been sold in every part of the country. A glance at the numerous certificates which can be seen at their store, will show that they have been tried under various circumstances, where, if they did not combine every advantage which is claimed for them, they would have been discarded, and the sale of them stopped; but their high reputation has been steadily increasing, year by year, until their popularity has become firmly established.

DAGUERREOTYPES.

[The following interesting sketch was prepared by Mr. ALBERT S. SOUTHWORTH, of the firm of Southworth & Hawes, of this city. They have done much towards perfecting the Daguerreotype art, and stand at the head of their profession.—ED.]

Nearly thirty years since M. DAGUERRE, a French gentleman, began his experiments for the purpose of fixing, in some way, the images as formed in the Camera Obscura. His efforts were at length successful, and in January, 1839, he communicated to the world the principles and the results of his discovery. With united voice his name was accorded to the *new art*, and has received the universal sanction of usage throughout the world, and will descend with it through all time as a tribute of immortal honor. With its most prominent use, that of likenesses from life, all are familiar. This has identified it with the dearest objects of our affections, by bringing within our reach their exact and faithful resemblances, so that whether separated by distance or death, we can have with us a lovely miniature to keep their faces in fond remembrance. But this is only one of its many agreeable and useful purposes. It may picture to us the home of our childhood, the hills and valleys over which we have rambled, and the streams beside which we have played. It may trace for us the rugged face of nature rising steep above steep in magnificent grandeur, till lost in clouds; or with its mellow lines preserve the lights and shadows of the wild flowery landscape or beautifully decorated garden. The village with its quiet churches, the city with its imposing edifices and lofty temples, the rising mound and the sculptured monument are drawn at a view, with a perfection which defies the skill of the artist, and a beauty equalled only by nature. But transfers of scenery or likenesses from the face are only a portion of its value. Daguerreotype has become the infant-school of art. There are a thousand to look at, and criticise, and possess a picture now, to one ten years ago. Shapes and forms are observed, studied, and compared; disagreeable and unfavorable effects of light and shade are contrasted with agreeable and fortunate; universal interest is felt in its progress, and it has come to be a fine art indeed. Every Daguerreotypist's energy is taxed to its utmost to perfect his apparatus, to cultivate a correct taste, to improve and discipline his eye, and to acquire those powers of perception and feeling, which will best fit him to perform his complicated duties and enable him to equal the just expectations of the public. To the true Artist passably satisfactory results, are exceptions, whilst a succession of failures is the general rule. It may not be out of place to give a brief description of the process, answering the double purpose of instruction, and the gratification of curiosity.

Daguerreotypes are made upon a surface of silver, plated on a body of copper, about the thickness of a half-dime. When the plate is polished smooth and clean, it becomes a black-ground or black board upon which to make the picture. In a dark room it receives upon its surface by evaporation a compound of Iodine, Bromine and Chlorine, forming an even and perfect coating. The first light admitted to the coated plate is the desired image, made by light in the Camera Obscura. Though neither the black-ground of the plate nor the compound were susceptible to any action of the light separately, yet when brought properly in contact, the light affects the combined elements composing the surface instantaneously, and in exact proportion to the amount admitted. The plate is then placed over a box containing a moderately heated cup of quicksilver. The vapor of the quicksilver passes readily through the compound surface of the plate just in proportion as the light acted upon it, and becomes attached to, or amalgamated with the silver. This forms the lights of the picture, and is the white chalk upon the black-board to develop it. The compound on the surface of the plate, acted upon by the light, has only been the medium to conduct the white vapor of mercury to its proper place. The time of the exposure of the plate to the coating, to the image of light, and to the mercury, can only be learned by actual experiments. After the picture is fully developed, it is immersed in a solution of hyposulphite of soda, which does not affect the mercury or black-ground, but removes the compound coating. It is then submitted to a process whereby the whole surface of the plate is coated with a leaf of pure gold, which protects it as varnish does a painting. To secure Daguerreotypes from injury, they are sealed under a glass, with a border between, to prevent the glass from resting upon, or chafing them. If through accident the glass is broken, the plate should be turned face down, so that the pieces of glass and particles of dust will fall from the picture; and carefully guarding it from the slightest touch, it should be carried to a Daguerreotypist for repairs. Be sure that you cannot touch a plate with anything whatever without soiling or scratching it.

From this description it will readily be seen that the whole picture, when finished is metallic with a gold surface, and that there can be no question of its permanency, provided all the manipulations have been properly performed.

ARTISTS' DAGUERREOTYPE ROOMS, No. 5½ TREMONT ROW, BOSTON.

SOUTHWORTH & HAWES.

This establishment offers to the admirers of perfect Daguerreotypes the highest inducements for patronage. From the earliest introduction of the Photographic art to America, the exertions of the partners of this Firm have been unequalled to perfect it in its application to every agreeable or useful purpose. We were the first in New England to apply it to likenesses from life; now more than eleven years since. One of the partners is a practical Artist, and as we never employ *Operators*, customers receive our personal attention. By constant industry and perseverance, we have so far distanced competition, that our services have commanded as much higher prices, as our ingenuity and taste have furnished better pictures. Since the use of Chlorine, and Bromine combined with Iodine, by Dr. Goddard, of Philadelphia, more than eleven years ago, there has not been a process or an idea made known in this country or Europe, which would improve our productions. We have been the originators of every variety of style which is exhibited in our rooms, and practiced the same, in many instances for years before any one else. We are able to show work made four years since, which cannot be procured elsewhere at all, whatever may be the price offered for it.

Our plates are the largest, most highly polished, and have a most perfect surface: our pictures have a surpassing delicacy in their finish; there is no sameness in our positions and use of the light, it being adapted to the design of showing every face in its best view. As far as possible we imitate nature in her most beautiful forms, by a mellow blending of lights and shades, an artistic effect of drapery and figure, a pleasing air, forcible expression and startling animation; representing thought, action, and feeling or soul.

LIKENESSES FROM LIFE.—Not only should the best outline of the face be selected, but also that of the head and neck, for the outlines of every feature of the likeness are effected by any change. The eyes, eye-brows, nose, lips, mouth, chin, and every shade in the face should also be most carefully observed, and the best point of view chosen.

THE EYES.—The remark of visitors is very often made, "What perfect eyes your miniatures have; how clear and life-like. Why I can see the very veins, and eye-lashes, and pupil, and iris: and how delicate that reflected light." We take all eyes, blue, light, gray, and black, perfect. We arrange the light mild and suitable to represent their perfections and preserve the expression in keeping with the attitude, lively and life-like, and give them their proper direction.

HANDS.—The hands may be so disposed as to add beauty to a picture, and be in perfect proportion. Full-lengths, also may be very fine, if the artist has paid due attention to the drapery and its folds, to the feet, and to the outline and action of the figure.

DRAPERY, DRESS AND ORNAMENTS.—Dark colors should be chosen by gentlemen, and woolen fabric, the plainer the better, with not too much white above the cravat, nor the vest much open. For ladies, if the ground colors are made up of red, green, orange, yellow, dark blue, indigo or purple, black or brown, the picture of the dress will usually be darker than the face; but white, light blue, or very light pink, purple, or violet, will be whiter than the face, and should be worn for drapery in a daguerreotype, only by children, or ladies having very clear, fair and delicate complexions. Avoid large plaids and stripes, and any large figures in straight rows or set lines. Inquire, study and understand how colors take in daguerreotypes, and then you can judge properly what shades to select. Lace-work should be narrow and open usually. Avoid broad ribbons as much as possible. Simple ornaments may be worn, such as chains, bracelets, rings, pins, &c.

VIGNETTES OR HEADS SIMPLY, *improperly styled by some* CRAYON DAGUERREOTYPES.—This is our own style—we were the first to practice it, and in it are some of our very best pictures. Though we made many previously, it is more than four years since we adopted it. The strength and boldness of the effect can be equalled in no other way.

No drapery attracts the eye from the face and its character.

Childrens' and Infants' Pictures, if they are quiet and pleasant, are beautifully taken. If uneasy and restless, a good likeness can be made, but much must be sacrificed to the light which permits us to make the impression *instantly*. We prefer to have them still one or two seconds.

Invalids can always receive attention at our rooms with due notice, or at their residences, and every effort will be made for success, and also for their comfort.

Likenesses of the Deceased we make so easy and natural that even artists suppose them in a quiet sleep.

Groups.—Fine grouping shows skill in the artist, and though he may not be able to select his sitters, he may arrange them in a picturesque manner, and give a pleasing representation of life scenes. We often make family groups with infants, taking every likeness with absolute perfection.

Harmony, Expression and Air.—Every part of a picture should be in keeping with every other part. If a reporter were taking down a speech made in the open air, he might with propriety wear his hat; and a lady on horseback would probably have her head covered, unless perchance the horse was running away with her. An artist representing a choir of singers might as well introduce a scissors grinder as a lady reading the last novel. In daguerreotype great care should be taken to avoid incongruities, and make every minute particular in shade, figure, drapery and appendages, do its duty in preserving harmony and unity. We will do our best to overcome the defects of dame Nature, or at least not to magnify or exaggerate them; and try to hide the distortions of bad tailoring and mantua-making, and ugly fashions.

Copying.—We are perfectly at home in every department of daguerreotype copying, *without reversing*. We can copy a daguerreotype head, from the size of a three-cent piece to that of life, if desired.

Crayon drawings, Mezzotints, and Architects' drawings, with ink or pencil we imitate to a shade, and can often improve the strength and depth of a too faint effect, and frequently make daguerreotype copies stronger and better than their originals. Copies of engravings from worn plates are as strong as the proofs, and have all their value.

To engravers and those having work engraved, we can be of great service. We reduce pictures upon the engraver's copper or steel plate, at the same time furnishing an exact duplicate, and he cuts upon the lines made by the daguerreotype. In this way we copied *Allston's Sketchings*, and a portrait of Fitz Green Halleck, and Mr. Cheney engraved them. We refer those interested to Mr. Andrews, Mr. House, Mr. Cheney, or the Bank Note Companies, for the accuracy of our work. No part of it is out of drawing. We can copy a square of eight feet, upon a plate two feet square, absolutely perfect in every line and angle, so that no designer can detect or measure the slightest deviation from the original. Our large lenses were arranged after years of trial and experiment by ourselves, and there is no other arrangement like them in existence; nor is there another instrument which will copy parallel lines a foot long and six inches apart, or copy a common portrait size, or crayon without distortion, upon a common large plate. We have tried to get up another set of lenses like ours, having had them ordered at our own price: but we cannot yet do it at all.

Statuary.—Our picture of Powers' Greek Slave shows our ability in this department; for so perfect is it, that when we exhibited it magnified to the size of the original, artists and amateurs would often suppose it the identical marble, and exclaim in astonishment, "Where did you get Powers' Greek Slave." We shall soon show it in this way again. In the mean time it may be seen in our room upon a plate 13½ by 16½ inches, having nearly 100 more square inches than any plate shown out of our rooms.

Views, Landscapes, Buildings, Monuments, &c., and Interior Views. Our panorama of Boston proves the perfection of our instrument. The depth of focus is from the steeple of Park-street Church to the lower Light House and Nahant Hotel, and from the Beacon Reservoir to West Cambridge. The view of Quincy Market and Faneuil Hall, taken at the opening of the last Fair, may also be seen at our rooms, covering one of our large plates. No such work in this line is shown or attempted. Perfect and elegant views of Mount Auburn furnished. We can make interior views of halls, stores, private dwellings, &c., often bringing in likenesses of the occupants, or their families and friends. Bands of music, choirs, societies and gatherings, and military companies in uniform, can be well daguerreotyped. We have made several pictures of the Surgeons of the Massachusetts Hospital with the patient under the influence of ether, all accurate likenesses.

Copies of Portraits, Paintings, and Painted Miniatures, in oil or water colors, upon canvas, metal, wood, ivory, or paper. We can copy any of these that *can be copied* by daguerreotype, and often do well what cannot be done at all elsewhere. One of the partners being a practiced portrait painter in oil colors, can often color daguerreotypes to imitate not only outlines, but the color of the original portraits or miniatures. We can clean paintings so as to wonderfully improve them, as well as to prepare them for copying. It is a very great advantage to our customers in this line, that we have an artist in our rooms to take every possible advantage in copying paintings. Copies of miniatures upon ivory are often mistaken for the originals, so perfect is the imitation.

The Natural Colors. We have many pictures which in certain lights reflect the colors of the Prism, partially blended, and many of different tints; but we assure our friends that the colors of nature were never, in a single instance, transferred by Daguerreotype, and that the pretended discoveries of taking the colors are an imposition upon the public, a trick unworthy of any one claiming the appellation of Artist.

Painting or Coloring Daguerreotypes.—All persons without exception pronounce our coloring unequalled. Artists say it is as true to nature as it can possibly be.

Daguerreotypes of Clouds, a Sunset scene, of the last great visible Eclipse of the Sun and the Moon, we made long ago. No other Artists have succeeded in copying an eclipse. The spots upon the sun are perfectly shown. Our pictures of Clouds are among the most beautiful of Daguerreotypes.

Apparatus, &c. We silver all our Plates every time we try them, by Electro Galvanism, thus securing them against spots of oxide of copper coming through the pores or small holes in the silver. We have the largest glass vessels ever made at Cambridge. Our silvering and coating boxes for plates are about two feet square. We received a silver medal at the Fair for our highly finished plates, the only award ever made for that article; and the best proof that we deserved it was that the visitors at the Fair mistook our specimen plate for a looking glass. We finish our plates upon an apparatus of our own invention, for which we have a *patent*. And we use no other patent, nor do we know of one that would not injure our work very materially. Since 1845 we have used a *lighted Camera*, and instructed Mr. Mavall and Dr. Goddard of Philadelphia, and Mr. Gurney of New York into its principles in November of that year, and have used it ever since, notwithstanding some Frenchman has just made it known as his discovery; and some learned savan is publishing a correspondence upon the subject with Sir David Brewster in the May No. of the London Art Journal of 1851.

In the convenience and variety of our apparatus, we were, five years ago, ahead of what any Daguerreotypist is at this time, as we will hold ourselves ready to prove whenever called upon.

The Permanency of Daguerreotypes.—We coat all our pictures with a perfect leaf of pure Gold, and so seldom is it that any of our Miniatures have ever shown any defect, that we warrant them all. We never knew any daguerreotype properly freed from the chemicals, and kept so, to change or fade; and will pay ten dollars for a specimen of Daguerreotype simply, that has faded since it was taken, if properly washed and secured.

To our Friends and Patrons. Ware proud to acknowledge the compliments and patronage of the best artists, amateurs, and judges of Art in Boston and vicinity. We thank them for their many encouraging and useful suggestions. Our past conduct and experience we offer to them, to the public, and to all, as a pledge that *we will excel. Our customers shall have the best of work.* We will deserve and claim by right the name of our establishment, "The Artists' Daguerreotype Rooms." As no cheap work is done, we shall spend no time in bantering about prices; and wish to have all understand that ours is a one price concern. Whenever our friends introduce individuals on whom the public have a claim on account of station or talent, and wish for their likenesses *for the public*, we will do our duty and bear our share in the expense.

N. B.—We never sell or dispose of likenesses without a written order from the one for whom they are taken; except those whose professions and standing before the public, make it right and proper for worthy and laudable purposes.

Something New. We have an apparatus for showing upon paper a perfect likeness the size of life from any Daguerreotype. The appearance excels by far any Crayon ever exhibited, and seems a reflection from life itself. It may often be pleasant for those having Daguerreotypes of their deceased friends, to see their very image as in life brought before them. Those who wish to test the correctness of our Miniatures can have this facility for doing so. Artists can, free of expense, avail themselves of the use of this apparatus to trace outlines from *our* Daguerreotypes.

"Any description of Messrs. Southworth & Hawes' apparatus for magnifying Daguerreotypes and showing their images on paper, must fall far short of the reality. Such beauty, perfection and strength in a shadow is wonderful indeed."—*F. Alexander, A. Hoyt, D. C. Johnston, A. Morse, S. & J. Cheney, D. Kimberly*, and many others.

BIRTHS, MARRIAGES, AND DEATHS.

According to a law of this State every city and town is required to make an annual return of the Births, Marriages and Deaths, to the Secretary of State. From the valuable report of the Secretary of State the following interesting extracts are taken.

"The returns are fuller and more complete than any former ones, and afford gratifying evidence that the service is becoming more familiar to the officers on whom it devolves, and its importance more generally appreciated by the people.

"The value of these registrations, it is believed, must become more apparent from year to year, as the nature and practical bearings of the facts they present, become better understood and appreciated.

"Massachusetts has taken the lead in this work of registration, and it is well, for she, of all the states, is the most immediately and deeply interested in the particular description of statistics they present.

BIRTHS.

"The whole number of births in the commonwealth, between January 1st and December 31st, 1850, was 27,664; in 1849, 25,773; being an increase of 1891, or 7.34 per cent. Of this number, 8197 were of foreign parentage, against 6480 in the year preceding; and there were 3278 whose parentage was not stated, which is an improvement upon the last Report, in which 4235 births were not specified in this particular. It will be observed that a large proportion of the births of foreign parentage occurs in our cities or manufacturing towns. For instance, the whole number of births in Boston was 5279, of which 3340 were of foreign parentage; in Lowell, 488 American to 452 foreign; Fall River, 145 American to 164 foreign. Instances of this kind might be multiplied.

MARRIAGES.

"The number of marriages for the year 1850, was 10,345; showing the unprecedented increase of 3409, or nearly 50 per cent. over the preceding year. This large increase is in part owing to the returns being more full and complete; but it cannot be doubted that the late alteration in the law, concerning marriages, has helped to swell the returns of matrimonial alliances within the state. The number of marriages in Boston in 1849, was 1187; in 1850, 2467, being an increase of 1280, or more than 100 per cent.

DEATHS.

"The year 1850 was not marked by the prevalence of any particular disease or class of diseases, and in this respect contrasts strongly with the preceding year. The number of deaths in 1850 was 3817 less than in 1849, and this difference is mostly accounted for by the extraordinary prevalence of certain diseases in the latter year.

"It is gratifying to observe that while the births and marriages have increased, the deaths have greatly decreased. The whole number of deaths in 1849 was 20,423; in 1850, 16,606; being a decrease of 3817, or 18.69 per cent.

Says the Edinburgh Review, 'a well organized system of civil registration is one of the first wants of an enlightened people. No man among such a people is above or beneath authenticating his existence, his claims on the protection of his country, and his fulfilment of the duties of a citizen, or of contributing his individual quota of information in what personally concerns himself or family, in reply to any system of queries which the government, in its wisdom, may see fit to institute respecting them. Such information may be regarded as a poll tax, which, in this form, a government is fairly entitled to impose, which is at once the justest and least onerous of taxes; or rather it may be looked upon as a mode of representation, by which each individual takes a part in directing the views of the legislature in objects of universal concern. Nothing, therefore, can be more unreasonable than to exclaim against it, or to endeavor to thwart the views of government in establishing such a system; nor any thing more just than to guarantee its fidelity by penalties imposed on false returns or wilful omissions."

The registrar of the city of Boston has, for the last three years, made complete returns of the Births, Marriages, and Deaths of that municipality. If every city and town should give as full returns, these statistics would be of great value.

ABSTRACT OF MARRIAGE LAWS OF MASSACHUSETTS,

As understood by the City Registrar of Boston.

The statutes of Massachusetts in regard to marriage, though not of great length or remarkable obscurity, having been repeatedly amended, and being scattered in several volumes, are not well understood. Hence frequent mistakes and illegalities. Clergymen, justices of the peace, and even lawyers, violate the laws by performing the marriage rite in cases where the preliminary steps required by statute have not been taken. The marriage may be binding on the parties married, while the officiating minister or justice renders himself liable to a smart penalty.

It is proposed in this article to state, as briefly as may be, the main points to be observed by parties about to marry, and by officiators at the ceremony.

If the intended bridegroom and bride reside in the same town or city in this State, the intention is to be entered in the office of the Clerk or Registrar of the town or city. The Clerk or Registrar records the names, ages, birth places, and parents' names of each, and the occupation of the male, and issues a certificate accordingly. When the parties to a marriage reside in different places in this State, the entry must be made, and a certificate procured, from each; but if only one of the parties resides in Massachusetts, a certificate from the place of his, or her residence, is sufficient to authorize the marriage.

Clergymen residing in this State, who have been regularly inducted into the ministry, agreeably to the usages of their several denominations, and who continue to exercise the vocation, may marry in any part of the State, provided that either the clergyman, the bridegroom, or the bride, reside at the place of marriage. But a clergyman who resides in Boston cannot legally marry in Salem parties who belong in Worcester, and clergymen who reside in other States are not authorized to solemnize marriages in this State. Justices of the Peace can only marry in the counties for which they are commissioned, and at least one of the parties to a marriage must be a resident of the same county.

Before solemnizing a marriage, the officiator should receive the certificate or certificates required, and if either party be under the age of consent, i. e twenty-years of males, and eighteen years of females, he cannot proceed without the consent of parents or guardians, if there be any in the State.

Clergymen would find it convenient to be supplied with blank certificates of marriages to fill up and give to the parties most interested, to be carefully preserved by them.

The certificates of marriage intentions now issued by Clerks in the form prescribed and furnished by the Secretary of State, have blanks at the bottom for the place, date of marriage, and signature of the clergyman, and *the whole certificate or a certified copy* is to be returned to the Clerk or Registrar of the place where the marriage is solemnized, on or before the tenth day of the following month. A strict compliance with this regulation, which secures complete registration, is not only required by law, but in many instances is found to be of much public and private importance. In past years there has been great negligence in regard to marriage returns, and in hundreds of cases parties have been put to great inconvenience or serious loss in consequence. Happily a considerable improvement has recently taken place; but there are still careless

clergymen and magistrates who need to have "their pure minds stirred up by way of remembrance."

The recent law of Massachusetts, abolishing the usage of fourteen days publication before marriage, was not designed to provide facilities for residents of other States to evade their own laws. But an impression prevails abroad, particularly in Maine, that in Massachusetts a marriage certificate or license may be obtained by any stranger couple, and that the marriage may take place at once. But it ought to be understood that sworn Clerks are not, for the paltry fee of fifty cents, to issue certificates to strangers from other States, neither will respectable clergymen celebrate their nuptials. NEW UNIVERSALIST COLLEGE.

It is proposed to erect the College on Walnut Hill, which is situated partly in Somerville and partly in Medford. The site is very beautiful, and commands a fine view of the harbor, Boston, Charlestown, Roxbury, Brookline, Brighton, Cambridge, Lexington, Malden and Lynn. Charles Tufts, Esq. of Somerville, has given twenty acres of land on the above named hill for the College. The institution will have over a hundred thousand dollars when it is opened for the reception of students, and the prospect of three times that amount in a few years. It has strong and influential patrons in all the New England States, and in some of the Middle and Southern States. Its Board of Trustees consists of twenty-three. Rev. T. J. Sawyer, D.D., of Clinton, N. Y., is President of the Board; B. B. Mussey, Esq., of Boston, is Treasurer; and Rev. O. A. Skinner, Secretary. It is the intention of its patrons and friends to make the institution in all respects equal to the best New England Colleges, and at the same time to furnish the agriculturalist, the manufacturer, the mechanic and the merchant with the education requisite to their pursuits. The system of instruction will be somewhat on the plan of Brown University.

STATE PRISON.

Stephen Whitmore, jr., *Warden.* J. W. Bemis, *Physician.* Jared Curtis, *Chaplain.* William J. Hubbard, Richard Frothingham, jr., Robert Cowdin, *Inspectors.* Benjamin Whitmore, *Chief Clerk.*

The whole number of convicts remaining in prison October 1, 1850, was 440; the whole number of convicts received into the prison during the year ending September 30, 1851, was 169; total, 609.

Discharged from the prison during the year ending September 30, 1850, by expiration of sentence, 118; by remission of sentence, 12; by pardon, 1; removal to State Lunatic Hospital, by order of the Court, 1; death, 5; total, 137. Number remaining in prison, September 30, 1851, 472.

CRIMES OF THOSE IMPRISONED FOR LIFE. For murder, 4; burglary, 7; rape, 2; arson, 3; burning a dwelling house in the night time, 1; highway robbery, 1; robbery, 2; malicious burning, 1; total, 21.

There are 35 negroes and 15 mulattoes now in prison, 18 of whom were received the past year, viz: 11 negroes, and 7 mulattoes.

The largest number of convicts in prison at any one time, during the past year, was 480; the smallest number, 435.

The average number of convicts for the past year has been 466.

ANNUAL REPORT

OF SAMUEL D. PARKER, ESQ., ATTORNEY OF THE COMMONWEALTH FOR THE COUNTY OF SUFFOLK.

In accordance with the laws of 1844, and more recent enactments in the supplements to the Revised Statutes, Samuel D. Parker, Esq., the learned, able and indefatigable Attorney of the Commonwealth for this county, has prepared his annual report of the official business which has been under his supervision during the year ending November 30, 1851.

From an examination of this document, extending as it does over a thick blank book, closely written, we can form some idea of the very many hours of actual hard work it must have cost the Commonwealth's Attorney in compiling it from his dockets, and the records of the Municipal Court.

The report covers two hundred and forty-eight pages, in Mr. Parker's own hand writing, and shows that during the year, there have been 1981 entries on the docket, being an excess over all former years, and 410 more than in the year 1851. Among the charges there are for violations of the license and Sunday laws, keeping brothels, and noisy and disorderly houses, 997; larceny under various forms, 281; shopbreaking and larceny, 35; house breaking and larceny, 28; receiving stolen goods, 23; robbery, 20; having in their possession with intent to utter and uttering counterfeits, 16; forgery, 11; perjury, 8; felonions assault with intent to commit capital crimes, 9; manslaughter, 3; murder, 3; and a very large number for assaulting watchmen, and assault and battery with various degrees of aggravation, together with many offences not embraced in those above named. Of the whole number of cases entered, there were 368 in which no bills were found by the Grand Jury, and of the whole number of defendants, 189 were females. Besides the cases referred to, Mr. Parker filed and had served, 20 writs on recognizances which were settled before entry, and therefore do not appear on the docket of the Court.

In addition to the cases in the Municipal Court, the County Attorney brought one action in the Court of Common Pleas, for the Commonwealth against a party, and obtained judgment and execution for $187 53 for debt.

In the Supreme Judicial Court in September last, Mr. Parker filed a motion for process to compel the Boston Wharf Company to perform a decree of that Court passed in October, 1850, requiring them within six months, to take up and remove certain piles and obstructions placed by them in the harbor of Boston contrary to law. That motion has been twice argued before some of the judges, who have not yet delivered their opinion, and the said obstruction still remains in the harbor.

The District Attorney has also been consulted, and given written opinions in three cases to the Governor, and once to the Sheriff of Suffolk County. The report shows that during the year 1851, the Sheriff of the County received and paid over to the County Treasurer for fines and costs imposed by the Municipal Court, the sum of $22,007 46. Mr. Andrews, deputy jailer, has received at the jail for fines and costs within the same period, the sum of $2,706 30; and Mr. Parker has paid over within the year to the Treasurer of the Commonwealth for penalties and costs recovered of the bail of accused persons who avoided, the sum of $6,122 74, making a total of money paid to the government during the year from the Municipal Court, of $30,818 50.

Besides these pecuniary payments, the collective and aggregate term of the sentences of persons sentenced to confinement at hard labor, by the Municipal Court within the year, amounts to two hundred and thirty-five years in the State Prison, and one hundred and seventy-one years in the House of Correction, making a total of four hundred and six years hard labor to be performed in the two institutions by criminals tried, convicted and sentenced in one Court in Boston within a single year. This does not include the minors who have been sentenced to the State Reform School at Westboro', or those sent to the House of Reformation for Juvinile Offenders.

It is computed that the average value of a convict's work is about forty cents per day over and above his support and maintenance; if this be the fact, then the State gains by these sentences also, a much larger amount than the above pecuniary payments from the transactions of the Court, during the busy year which has just closed.

STATE REFORM SCHOOL.

Westboro'. Established, 1848. George H. Kuhn, Josiah B. French, Russell A. Gibbs, Samuel Wil liston, Thomas A. Greene, Edward B. Bigelow, Daniel H. Forbes, *Trustees.*

This Institution is for boys under the age of 16 years. It was designed to accommodate 300. The receipts from the State, the Lyman Fund, and Superintendent, for 1851, were $31,239 37. Boys committed during the year, 129, making the whole number, 465 for the year. There have been discharged during the year, 155.

The annual report of the Trustees represents the school as being in a flourishing state, and accomplishing in an eminent degree the benevolent design of its founders. It has been filled to overflowing during the whole of the past year, and for the greater part of the time with a much larger number than it could properly accommodate. The following is a list of its present officers:—

William R. Lincoln, *Superintendent.* Orville K. Hutchinson, *Assistant Supt.* Rev. P. L. Cushing, *Chaplain.* James Leach, *Steward.* Miss C. H. Porter, *Matron.* George H. Kuhn, Edward B. Bigelow, Daniel H. Forbes, *Exec. Com.* Edward B. Bigelow, *Treas.* Thomas A. Greene, *Sec.*

PAUPERS IN MASSACHUSETTS.

The whole number of Paupers in the State, according to a report of the Secretary of State for the year ending November 1, 1851, was 27,624. Suffolk county has the largest number, 9,471, and Dukes the smallest number, seven.

The number of State Paupers is 16,154, of whom 12, 940 are foreigners, and of these 11,905 are from England and Ireland.

Foreign Paupers who have come into the Commonwealth within one year,	2,000
Nett amount of expense of supporting and relieving paupers, including interest on Alms House establishments,	$484,688
Estimated value of Alms House establishments,	$1,317,250

NUMBER OF PERSONS RELIEVED OR SUPPORTED AS PAUPES DURING THE YEAR.—Suffolk County, 9,471; Essex, 3,891; Middlesex, 3,424; Worcester, 2,555; Hampshire, 445; Hampden, 942; Franklin, 385; Berkshire, 591; Norfolk, 1,968; Bristol, 2,726; Plymouth, 517; Barnstable, 331; Nantucket, 371; Dukes, 7.

The whole number of State Lunatic Paupers in the Hospital in Worcester in Dec., 1851, was 208, more than two-fifths of the whole number of the inmates of the Hospital, some of them insane or imbecile from early life or from birth. Eighty-seven were admitted last year who are presumed to have no legal settlement. The occupation of the halls of the Hospital by this class of patients is becoming more and more alarming to the friends of the unfortunate Insane for whose accommodation the Hospital was erected. Very many of them are incurable, and are more proper subjects for an Alms-House than for this Hospital. The price of State Paupers confined less than three months, is from two dollars and a half to two dollars and a quarter per week. By the resolve of 1845, the price of Lunatic State Paupers is, for a term not exceeding thirteen weeks, two dollars and a half, and for a term not exceeding twenty-six weeks, two dollars and a quarter, and for a term less than one year, two dollars per week, and for one year $100.

During the year 263 were admitted, and 466 remained at the close of the year. Number of patients discharged,—well, 111; improved, 38; incurable and harmless, 46; incurable and dangerous, 4; died, 39; total, 238.

More than 100 travelling Paupers were charged as State Paupers.

One family has been reported among the Pauper returns in twenty-five towns in the Commonwealth.

There were 225 returned from the Lunatic Hospital at South Boston, chargeable to the State, of which number 197 were foreigners, and of those 168 were natives of Ireland. The bill for their support is $17,374.

EXPRESSES.

The facilities afforded by the numerons Railroads centering in Boston, for rapid and cheap communication with all parts of the interior country, have given rise, within a few years, to a prosperous and extensive Express business. The Express business was first introduced between Boston and Lowell, on the opening of the railroad between the two cities, in 1835, by WM. C. GRAY, of Lowell. He was soon followed by HARNDEN, ADAMS, and others, on other rontes, and the business rapidly enlarged, until the various lines have extended their ramifications not only through all parts of New England, but also to the principal cities and towns of the whole Union, to the distant regions of the Pacific, and to the commercial centres of the Old World. Parcels and merchandise may now be forwarded, and business of almost every kind transacted, through responsible and faithful agents, between Boston and the most distant parts of the country,—affording a vast accommodation not only to those engaged in trade, but to all classes of the community.

The principal Express Offices in Boston are:—

ADAMS & Co., 84 Washington street, N. Y., Southern, and California. (See also page 23, Advertising Department.)

HARNDEN & Co., 8 Court street, N. Y., Southern, and California.

KINSLEY & Co., 11 State, N. Y. and Southern. (See also page 22, Advertising Department.)

PETTES & Co., 18 Congress, N. Y.

PALMER & Co., 10 Court Square, California.

THOMPSON & Co., 8 Court, Western Railroad, Albany, &c.

General Local Express Offices for Mass. and N. E. States are at Railroad Exchange, Court Square; No. 10 Court Sqnare; 7 Elm, and 8 Court.

RAILROAD JUBILEE.

The Railroads of Massachusetts constitute an important branch of the business of our State. The Legislature manifests towards them a commendable liberal policy. To Manufactures, Agriculture, and Trade, they impart life and activity; and the policy which should govern their councils ought to be of a liberal character, to reciprocate the public and private manifestations calculated to build up and encourage them.

The celebration of last year, exhibits the public spirit and interest awakened in the success of railroads. The occasion and its triumphant success, was alike worthy the great objects it was designed to celebrate, and the foresight and enterprise which suggested and matured it. Boston may well be proud of that day, when a hundred thousand, from all sections of New England, and the Canadas, came to show their confidence in her strength. An exhibition of all the mechanical arts, as was seen in the procession of September 19, 1851, is seldom witnessed, and showed the metropolis of New England not unworthy the distinguished honor received upon that occasion.

The City Government expended a large sum of money to celebrate, in an appropriate manner, the final completion of the great lines of railway uniting the tide-water at Boston with the Canadas and the Great West; and also the establishment of American lines of steamers between Boston and Liverpool. Hon. John P. Bigelow, then Mayor of the city, with his characteristic public spirit, issued a Circular to the citizens of Boston, calling upon them to unite in adding their approval to the great works then completed. This Circular says:

"The importance of these events to the great social and commercial interests of our city can hardly be exaggerated We are now about to realize, it is believed, the full benefit of those great enterprises, in the perfecting of which we have expended so much capital. There are now completed and in operation, in Massachusetts alone, about 1,200 miles of railway; and in New England, about 2,400 miles. Massachusetts has expended, in the completion of these roads, the enormous amount of $51,000,000; and it appears from the reports of the several railroad corporations in this State, made to the last Legislature, that there were transported over the Massachusetts roads alone, during the year 1850, 9,500,000 passengers, and 2,500,000 tons of freight. This statement, however, but imperfectly presents the advantages which we are to derive from these works. The railways of Massachusetts are but a small link in the great lines which connect us with remoter sections of our country.

The several lines connecting us with the Canadas, northern New York, the great lakes and the far West are now completed; uniting us by railroad and steam navigation with thirteen States of the Union, comprising an area of 423,795 square miles, the two Canadas, the lakes, with their 5,000 miles of coast, and bringing within our commercial sphere a population of 10,000,000 of inhabitants. The business of the lakes and the Canadas, and its rapid yearly increase, are worthy of especial consideration. It is estimated that the imports and exports of the Lake Harbors, exclusive of the Canadas, during the present year, will be $200,000,000. The annual increase of this business is found to be 17½ per cent., thus doubling itself in less than six years. In addition to this, the imports and exports of the Canadas will amount during the present year, to $50,000,000.

And now what are the advantages which Boston possesses, for doing this immense business? These are so manifest, that their importance will be readily appreciated. Her harbor is one of the finest in the world. Her wharves and storage accommodations, are equal, if not superior, to those of any other city, and capable of indefinite extension. Her local position is unrivalled, and the enterprise and integrity of her merchants are well known. The lines of railway to which we have alluded, all centre in her and radiate from her. It is ascertained, from the actual results of this year's business, that under favorable circumstances, all kinds of provisions can be brought from the West, through these new lines of communication, to Boston, more speedily and at a less expense, than to any other Atlantic port.

In this connection it may not be amiss to remark that the books of the Custom House show, that the merchandise transported to the Canadas from the district of Boston and Charlestown, for the six months ending June 30, 1851, was more than quadruple that of the six months next preceding January 1, 1851.

Merchandise can be landed at Ogdensburg, on Lake Ontario, put on board the cars at that place, brought to Boston without transhipment, and from here exported to England by means of our steamships, in a much less time than it can be done by any other route. It seems to us, then, that Boston has every facility for becoming a great exporting as well as importing city. Cargoes from Liverpool in steamships, via Boston, may be delivered in Montreal in twelve days.

This fact, taken in connection with the fact that the St. Lawrence is closed by ice during five months of the year, and that the communication with Boston is uninterrupted during the whole year, must make Boston, as it seems to us, the port of entry for the Canadas, thus opening to us a business, the extent of which we have not begun to realize. The eligibility of our location as a shipping port for the Canadas, will be seen by the following statement of distances, as compared with New York.

From Liverpool, via Halifax,				to Boston,	2,876 miles.
"	"	"		N. York,	3,093 "
"	"	direct	.	to Boston,	2,856 "

"	"	.	.	N. York,	398 "
"	Liverpool to Montreal via			Boston,	3,200 "
"	"	"	"	N. York,	3,471 "

The difference between Liverpool and Montreal, in favor of Boston over New York, is 271 miles.

In view of the above facts, and in conformity with the expressed wishes of many of the citizens of Boston, the City Government propose to celebrate the completion of these lines of railways, by a festival in Faneuil Hall, and other appropriate ceremonies. We cordially invite the co-operation of our fellow-citizens of Boston, in order that this celebration may be made in some degree commensurate with the great importance of the events to be celebrated."

Nothing has transpired since the formation of our government so well calculated to cement the harmony, good feeling and interest between England and America. Every thing passed off to the greatest satisfaction of all the numerous participators. Lord Elgin, Governor-General of Canada, his Staff and Cabinet, the leading members of the Canadian Parliament, and the city officers and leading merchants in Canada; President Fillmore, and his Cabinet; the Governors of the New England States; Railway Presidents, and Mayors of the cities in New England, and a host of others interested in railways and steam navigation, were all invited to this Railroad Jubilee, and the invitations generally were responded to by the personal presence of the parties interested. The celebration passed off with great magnificence, and in a manner highly creditable to its managers and to the city.

BANK STATISTICS.

The whole number of Banks in Massachusetts, according to the last report of the Bank Commissioners, is 137, exclusive of the Pawtucket Bank.

Amount of Capital,	$37,204,850
Circulation,	16,922,248
Deposits,	12,290,548
Specie,	2,919,310
Immediate Liabilities,	34,090,805
Immediate Resources,	17,740,741

The Board of Bank Commissioners,

Consisting of SOLOMON LINCOLN, PETER T. HOMER, and SAMUEL PHILLIPS,

Appointed by authority of the Act of May 8, 1851, was organized on the 29th of May, 1851, and immediately entered upon its duties. They have examined twenty-seven banks of discount and circulation, and the same number of institutions for savings. There are in operation of the latter class in the State forty-nine. The report says, "The general conduct and condition of the banks examined are such that we can confidently speak of them as safe for depositors and the public, and generally profitable to their stockholders. In most essential particulars, they are so managed as to promote the objects of their creation, in furnishing a sound currency, facilitating the transactions of business, and affording opportunities for investment in their stock, by corporations and individuals, with a confident reliance in their ability to afford liberal dividends of profits.

"During the last few years the business of banking has been unusually profitable to stockholders. The growth of the country and the expansion of business have created a demand for money so pressing and universal, that the temptation and the opportunity have been present to induce banks to make the most of their privileges."

The total dividends, paid by the Boston Banks, for the year 1851, were $1,745,598. Below we give the average annual dividends for the last five years of the following Banks:—

EMIGRATION.

The Superintendent of Alien Passengers for the Port of Boston, J. B. MUNROE, has presented a statement of the foreign emigration, by which we find that the whole number arrived by water in 1850, was,..... 30,075
The whole number arrived by land in 1850, 10,786

Total in 1850,.....40,861

In 1851, the number by water was, 29,319
In 1851, the number by land was, 16,654

Total in 1851,..... 45,973 45,973

Being an increase of 1851 over 1850, by land, of..... 5,868
and a decrease, by water, of 756

Leaving a total increase of.....5,112

The Superintendent also says, "The Commissioners recommend that the State erect three District Alms Houses, sufficiently large to accommodate all foreign State Paupers, and that the State take entire charge of all such persons, believing it the most economical plan. By doing this the people will have the satisfaction of knowing the actual amount of expense, which, under the present system, it is impossible to determine."

NATIVE AND FOREIGN POPULATION.

The population of Massachusetts, in 1850, according to the State Census, was 994,665. Of this number 200,896 were foreigners, about one half of whom belonged to Boston and to towns within ten miles of that city. The rapid increase of foreigners within the last ten years, and the continual influx to this country from foreign shores, have created fears in many minds for the result of its influence upon the country and its institutions, and have also been made the subject of legislation.

In 1830, the whole number of inhabitants was 610,408, of whom 9,620 were foreigners, or 1.58 per cent. of the whole. In 1840, total population 777,300, of whom 34,818, or 4.72 per cent. of the whole were foreigners. The foreign population in 1850 was 20.20 per cent. of the whole. Thus it will be seen that from 1830 to 1840 the increase of foreigners was 3.14 per cent. of the whole population, and the increase for the next ten years succeeding was 15.48 per cent.

A very large number arriving in the State every year, who direct their course westerly, is not of course included in the above enumeration.

MUTUAL LIFE INSURANCE.

THE NEW ENGLAND MUTUAL LIFE INSURANCE COMPANY,

OFFICE, MERCHANTS' BANK BUILDING, STATE ST., BOSTON.

Since commencing, February 1, 1844, to January 1852, has made out 3,600 policies.

The amounts from 200 to $10,000 each. Largest amount taken on one risk, $10,000. Insures lives only. $50,000 guaranty capital paid in.

Fund accumulated, owing to the favorable turn of the risks thus far, over $440,000, besides guaranty capital well invested for the proportionable benefit of those who shall become, as well as those already members. Surplus to be refunded to members at the end of every five years from Dec. 1843. Premium may be paid quarterly or semi-annually where desired, and amounts not too small. All the premiums earned by the Company are paid to it, and no member pays in his note or money against the notes (good or bad) of other members.

Forms of application, and pamphlets of the Company and its reports, to be had of its agents, or at the office of the Company, or forwarded by mail, if written for, post paid.

DIRECTORS.—Willard Phillips, Charles P. Curtis, N. F. Cunningham, Charles Browne, George H. Kuhn, M. P. Wilder, Robert G. Shaw, Wm. G. Lambert, Thomas A. Dexter, William Perkins, Sewell Tappan, Chas. Hubbard.

THE BOSTON

MUTUAL HEALTH ASSOCIATION,

GUARANTIED and ACCUMULATED CAPITAL, $5,000.

No. 8 Scollay's Building, Entrance on Tremont Row,

BOSTON.

In calling the attention of the public to this Institution, it may be worthy of remark, that though Health Insurance Companies are but of recent date in this country, yet in England they have long been considered as the greatest blessings and benefits of the age. There, where the price for labor is so small as to preclude all hopes of the Mechanic or Laborer ever obtaining a sufficiency beforehand to support himself or family, should sickness or accident prevent him from attending to his daily labor, the want of some such an institution was deeply felt.

As an experiment, Health Insurance Companies were formed, and as such more than realized the brightest hopes of their projectors. Thousands have been the cases where the head of a family has been prostrated upon a bed of sickness, with no provision for himself or wife and children, had it not been for the aid received by his insurance policy. By this he was enabled to remain with his family around him, instead of being obliged to remove to the Charity Hospital, and his family scattered abroad, homeless, to seek their bread of strangers. But now, thanks to his fortunate foresight, he was sure of receiving a weekly allowance, amply sufficient to keep want far away from his door. This happy thought cheered him through his sickness, and has often done more to restore the bloom and strength of health, than all the power of the Leech's art.

This is no fancy sketch, but reality. Even in our own more favored country, and the system is yet in its infancy, we can see many cases very similar to the one we have sketched above. And we would put the question to every man in humble circumstances, whether, if sickness should lay its heavy hand upon them, and it may at any moment, have they any support for themselves or families; if not, what awaits them? Shall it be aid from the hand of charity, or support from the public fund? — both alike repulsive to the man of sensibility and spirit.

In the Mutual Health Insurance Association, you can find the antidote, and we earnestly entreat the attention of all to its object, for its great advantages and benefits must be apparent to every one. What happier thought can thrill the breast of the husband and father, than the consciousness, that, though called away at any time, yet he was sure of leaving his family well provided for?

The Office is located in Scollay's Building, Court Street, where every information will be cheerfully given to applicants.

STATEMENT

OF THE

MUTUAL BENEFIT LIFE INSURANCE CO.

CHARTER PERPETUAL.

The soundness of this Company and the extent of its business may be inferred from the following statistics, sworn to by the Directors, June 1, 1851.

In compliance with the requisitions of a Law of the last Legislature of New York, that all the Life Insurance Companies doing business in that State should deposit each $50,000 in the Comptroller's Office, at Albany, on the 1st of August, and the like further sum of $50,000 in February next, making $100,000, to be held as SECURITY *for the fulfilment of their contracts with the Insured*, this Company has deposited with the Comptroller the security required, accompanied with the following sworn statement of its condition. Out of twenty-seven offices, only five have complied with the Laws:

Amount now held by the Company, securely and profitably invested, for the payment of Losses which may occur, and Dividends,	$1,226,383.25
Reserved Fund, for security of policies outstanding Jan. 1, 1851,	502,265.34
Profits retained, to meet the exigency of an epidemic, &c.,	200,000.00
Total Net Receipts for Premiums and Interest, during the year 1850,	538,361.55
Number of Policies now in force, 5,103.	
Dividend declared during the year 1850, thirty-two per cent.	
Greatest amount insured in one risk,	10,000.00

From the above statement it will be seen that the Company has an ample fund to meet all possible contingencies. The Premium Notes, which are received in some cases, while they may prove a convenience to the insurer, are always so secured and so limited in amount as to be perfectly safe to the Company. And it may safely be said that, for the object which the Company has in view, — the Mutual Benefit of the Insured, — its funds could not possibly be invested to better advantage. The Annual Receipts of the Company, for Premiums and Interest, are more than

HALF A MILLION OF DOLLARS,

While its Losses and Expenses do not exceed $200,000. This Company has had all its Business submitted to the most rigid mathematical calculation, and in the declaration of dividends, and the reservation of Funds to meet future contingencies, it obeys all the requisitions of the most thorough science on the subject.

This Company issue Policies on the JOINT STOCK PLAN ONLY. Its leading idea is to ascertain what it is worth to insure a given amount upon a life for a certain time, and to charge precisely that sum and no more. The reduction from the rates charged by the Mutuals is a material one, and not having anything to do with Scrip Dividends, Notes, or Bonuses, the insured is not subject to those uncertain and vexatious contingencies which are inseparable from many Companies.

ESTABLISHED IN 1842,

FOR THE SALE OF THE BEST TEAS ONLY.

NO. 78 HANOVER STREET. BRANCH STORES, NO. 68 BEACH STREET.

The fluctuations in the Tea Market, have been, of late years, too frequent and considerable to admit of the Proprietors adopting one permanent and uniform list of prices. Only such changes will at any time be made as equity demands; and it may be safely relied on, that the prices of the China Tea Company's BEST TEAS will always be considerably LOWER than are charged by dealers for like qualities, and less than they charge generally for inferior sorts. The quotations below will show the variation from former retail prices:

BLACK TEA.

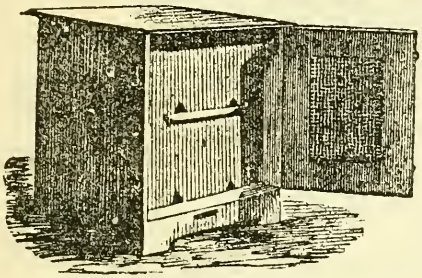
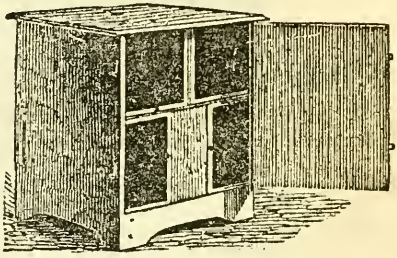
HONEY! HONEY!



[FRONT OF THE HIVE.]



[BACK OF THE HIVE.]

The Cultivation of Bees, and the profitable manufacture of HONEY, have hitherto baffled the ingenuity of those skilled in the business. The Moth-Miller is a deadly enemy to Bees, and hitherto every conceivable plan has been devised to prevent his depredations, without success. But what has been desired so long, has come at last. It is no less than

Dugdale's Patent Moth-Proof and Non-Swarming Bee-Hive.

This valuable Hive has been introduced into all sections of the West with great success, and IT MAY BE DONE IN MASSACHUSETTS. All will now give their attention to the business, many from the love of it, but more for its profit. The above Hive is calculated for two swarms. The very first year, a handsome return may be made for the money and time required for the operation.

The Bees are not destroyed when the Honey is taken from the Hive. It also secures the new swarms; a desideratum never before attained. It is highly and generally recommended as the only successful improvement for the manufacture of Honey.

Individual, Town and County Rights are for sale. For further information and printed instructions, address, (post paid,)

SAMUEL JONES,

— MANUFACTURER OF —

SALAMANDER SAFES,

CHELSEA, MASS.

Mr. J. has the best of testimonials to show that his SAFES have stood the severest tests, and that they are equal, if not superior to any now in the market, for withstanding the action of heat. The following extract is copied from a late number of the EASTERN ARGUS, (Portland, Me.): "Mr. John T. Smith's Safe was taken out of the ruins of the fire yesterday morning, RED HOT. When it was opened, however, its contents were but little injured. The books were scarred some, but perfectly intelligible. The bank bills were not scarred at all, and the wood work gives no indication of fire, and looks as fresh as before. The Safe was made by Samuel Jones, of Chelsea."

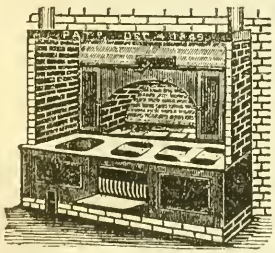
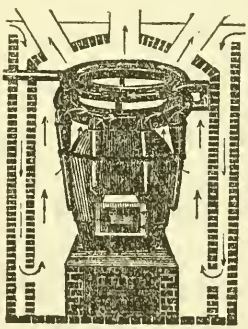
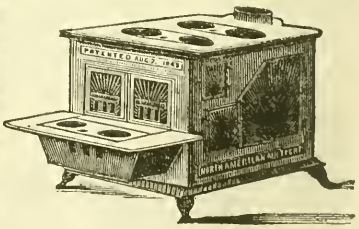
MASON'S IMPROVED
COOKING RANGE, FURNACE, AND STOVE,

MANUFACTURED BY

MASON & RUPP, 30 Washington St., near Cornhill, Boston.







This COOKING RANGE, of which we have five sizes, is the leading Range of Boston. It has one Brick and one Iron Oven, six Boilers, and a large Copper Boiler, with Water Backs and Bath Boilers, and Hot-Air Fixtures, for warming additional rooms.

The FURNACE is constructed on scientific principles, and presents twice the radiating surface of any other Furnace, having a double annual chamber, so that it is impossible for the heat to escape into the chimney, and combines more excellent qualities than any other in the country.

The STOVE, represented above, is a new and superior pattern of our own manufacture, and possesses vastly superior properties than most Stoves now in use, and bakes well and evenly all over.

STOVES SENT GRATIS. DON'T FORGET THE NUMBER, 30 WASHINGTON ST.

THE MECHANICAL PART DONE BY STEAM.

He received a PRIZE MEDAL at the World's Fair, and the HIGHEST PREMIUM at the last Fair of the Massachusetts Charitable Mechanics' Association. He has had ten years' experience in the Art, and his establishment affords every facility for producing the very best Daguerreotypes. All Likenesses warranted perfectly satisfactory to friends; if not so at the first trial, repeated without charge, it being his aim not only to produce the best thing the art is capable of, but pleasing likenesses to those for whom they are intended. The public are invited to call and examine a large collection of Daguerreotypes of some of our MOST DISTINGUISHED CITIZENS; also those of JENNY LIND, Benedict, Belletti, Barnum, Amin Bey, and the Turkish Ambassador; THE MOON, taken through the large Cambridge Telescope, and Microscopic objects, too small to be seen by the naked eye, &c. &c.

WHITE & POTTER,

(Over the Boston Type and Stereotype Foundry,) BOSTON.

This is one of the most extensive Printing Establishments in New England, and it has recently been NEWLY FURNISHED THROUGHOUT with Type of every description, cast in the United States and Europe, requisite to a complete Printing Office.

The Presses, which are run by Steam, are new and of the most improved construction, and comprise a variety of patterns recently invented, calculated to execute work well and fast. Attention is called to a new and beautiful REVOLVING CYLINDER PRESS, manufactured by Messrs. Hoe & Co., of New York, expressly for Job Printing, which will throw off **FOUR THOUSAND IMPRESSIONS PER HOUR**, in style and clearness far superior to any other machine now in use, enabling us to furnish this part of our work at nearly one half the former prices, and which those in want of Printing are invited to call and examine.

CARD PRINTING;

$1.25, $1.50, $1.75, and $2.00 PER THOUSAND, FOR BUSINESS CARDS.

Our facilities in this branch cannot be surpassed. The Presses are of the best possible construction for rapidity and neatness of execution; our materials are all new, and have been selected without regard to cost — and as we manufacture our own Cards, we are prepared to print them by the million at prices below any thing ever dreamed of in the history of CHEAP CARD PRINTING.

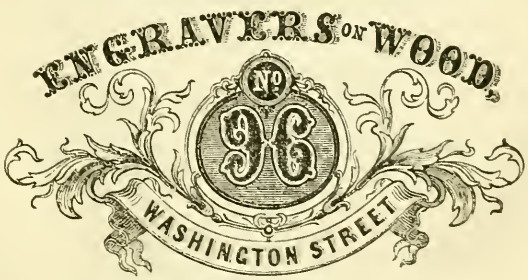
WRIGHT & MALLORY,



LITTELL'S LIVING AGE.

Extracts of Letters from Judge Story, Chancellor Kent, and President Adams.

CAMBRIDGE, April 24, 1844.

I HAVE read the Prospectus with great pleasure; and entirely approve the plan. If it can only obtain the public patronage long enough, and large enough, and securely enough to attain its true ends, it will contribute in an eminent degree to give a healthy tone, not only to our literature, but to public opinion It will enable us to possess, in a moderate compass, a select library of the best productions of the age. It will do more: it will redeem our periodical literature from the reproach of being devoted to light and superficial reading, to transitory speculations, to sickly and ephemeral sentimentalities, and false and extravagant sketches of life and character.

JOSEPH STORY.

NEW YORK, 7th May, 1844.

I APPROVE very much of the plan of the "Living Age;" and if it be conducted with the intelligence, spirit and taste that the Prospectus indicates, (of which I have no reason to doubt,) it will be one of the most instructive and popular periodicals of the day.

JAMES KENT.

WASHINGTON, 27 Dec., 1845.

OF all the Periodical Journals devoted to literature and science which abound in Europe and in this country, this has appeared to me the most useful. It contains, indeed, the exposition only of the current literature of the English language, but this, by its immense extent and comprehension, includes a portraiture of the human mind in the utmost expansion of the present age.

J. Q. ADAMS.

PROSPECTUS.

THIS work is conducted in the spirit of Littell's Museum of Foreign Literature, (which was favorably received by the public for twenty years,) but as it is twice as large, and appears so often, we not only give spirit and freshness to it by many things which were excluded by a month's delay, but while thus extending our scope and gathering a greater and more attractive variety, are able so to increase the solid and substantial part of our literary, historical, and political harvest, as fully to satisfy the wants of the American reader.

The elaborate and stately Essays of the *Edinburgh*, *Quarterly*, and other Reviews; and *Blackwood's* noble criticisms on Poetry, his keen political Commentaries, highly-wrought Tales, and vivid descriptions of rural and mountain Scenery; and the contributions to Literature, History, and Common Life, by the sagacious *Spectator*, the sparkling *Examiner*, the judicious *Athenæum*, the busy and industrious *Literary Gazette*, the sensible and comprehensive *Britannia*, the sober and respectable *Christian Observer;* these are intermixed with the Military and Naval reminiscences of the *United Service*, and with the best articles of the *Dublin University*, *New Monthly*, *Fraser's*, *Tait's*, *Ainsworth's*, *Hood's*, and *Sporting Magazines*, and of *Chambers'* admirable *Journal* We do not consider it beneath our dignity to borrow wit and wisdom from *Punch;* and, when we think it good enough, make use of the thunder of *The Times*. We shall increase our variety by importations from the continent of Europe, and from the new growth of the British colonies.

The steamship has brought Europe, Asia, and Africa, into our neighborhood; and will greatly multiply our connections, as Merchants, Travellers, and Politicians, with all parts of the world; so that much more than ever it now becomes every intelligent American to be informed of the condition and changes of foreign countries. And this not only because of their nearer connection with ourselves, but because the nations seem to be hastening, through a happy process of change, to some new state of things, which the merely political prophet cannot compute or foresee.

Geographical Discoveries, the progress of Colonization, (which is extending over the whole world,) and Voyages and Travels, will be favorite matter for our selections; and, in general, we shall systematically and very fully acquaint our readers with the great department of Foreign affairs, without entirely neglecting our own.

While we aspire to make the *Living Age* desirable to all who wish to keep themselves informed of the rapid progress of *the movement*—to Statesmen, Divines, Lawyers, and Physicians—to men of business and men of leisure—it is still a stronger object to make it attractive and useful to their Wives and Children. We believe that we can thus do some good in our day and generation; and hope to make the work indispensable in every well-informed family. We say *indispensable*, because in this day of cheap literature it is not possible to guard against the influx of what is bad in taste and vicious in morals, in any other way than by furnishing a sufficient supply of a healthy character. The mental and moral appetite *must* be gratified.

We hope that, by "*winnowing the wheat from the chaff*," by providing abundantly for the imagination, and by a large collection of Biography, Voyages, Travels, History, and more solid matter, we may produce a work which shall be popular, while at the same time it will aspire to raise the standard of public taste.

THE LIVING AGE is published every *Saturday*, by E. LITTELL & Co., corner of Tremont and Bromfield streets, Boston; Price 12½ cents a number, or six dollars a year in advance. Remittances for any period will be thankfully received and promptly attended to.

Complete sets, in thirty-one volumes, to the end of 1851, handsomely bound, packed in neat boxes, and delivered in all the principal cities, free of expense of freight, are for sale at sixty-two dollars.

MATTHEWSON'S

PATENT WEATHER STRIP

Is decidedly the cheapest and best article for rendering Doors and French Windows tight at the bottom. It is an article that can be put on inside Doors as well as out, and is so far from disfiguring the Door, that it serves as an ornament. The following advantages are derived from its use: It keeps the floor and the sill from decay, and carpet from fading; excludes dust, rain, and snow, and prevents the circulation of cold air from the bottom of the door.

The public are cautioned against purchasing Strips, except at my office, 35 Washington Street, or of my lawful agents, who will have a printed card of Agency, and a copy of the same will be on the Strips, with my signature at the bottom. ☞ All orders promptly attended to.

"GET THE BEST."

WEBSTER'S QUARTO DICTIONARY,

☞ UNABRIDGED. ☜

Containing THREE TIMES the matter found in any other English Dictionary compiled in this country, or any Abridgment of this work; a GEOGRAPHICAL TABLE of 12,000 Names, ILLUSTRATIVE QUOTATIONS, and other peculiarities and advantages found in no other work. ☞ Yet it is sold at a trifling advance above the price of other and limited Dictionaries.

"It contains scientific terms not to be found in any other work," and we have often been surprised to find that it contained full and clear definitions of many technical phrases, which we thought had never been heard outside of the workshop. It is a real Encyclopedia of Science, for it not only gives the definitions of scientific terms, but it describes the nature of many chemical actions and the operations of many machines. In its unabridged present form, it is complete, and no man pretending to scientific knowledge can be without it: we mean the Unabridged Dictionary, the present new edition, which contains all the results of Dr. Webster's forty-seven years' labor and revising, and the labors, for a number of years, of Professor Goodrich and several other gentlemen distinguished in science and literature. In Chemistry, Architecture, Geology, Engineering, Mechanics, &c. &c., it is full and accurate, and is not only essential to the student in science, but to the most erudite philosopher.—*Scientific American, Oct.* 4, 1851.

The Legislature of New York have just passed an Act to furnish this work to the common schools of the State.

☞ The following is an extract from the Report on the subject, by the "Committee on Literature:"

"There is no end so important to the education of the common mind as to use this our common language with correctness, ease and elegance, and to attain which we should make every possible facility readily accessible to all. And, in the opinion of your committee, there is no one book which furnishes so many facilities for this purpose as Webster's Unabridged Dictionary. The habit of referring to it will lead every scholar to a knowledge of this rich mine of *wealth intellectual;* and as he uncovers its treasures, his mind will be enlarged by the variety of knowledge which is condensed in the definitions of the familiar words he uses. The habit of reflection, too, will be matured, by being employed on objects so entirely within his reach as the words which he spells, and reads, and uses in speech. If he be once taught the habit of reflecting on words, he will soon learn to reflect on the thoughts which these words represent."

[*From Hon. J. C. Spencer.*]

ALBANY, June 18th, 1851.

MESSRS. G. & C. MERRIAM,— *Gentlemen:* After the testimony to the extraordinary merit of Dr. Webster's Dictionary of the English language, which has been borne by the illustrious Statesmen, Scholars, and Writers of this country, and by the most competent judges in England, it seems almost presumptuous for me to express an opinion on the subject, but as your polite note of the 16th inst. seems to invite such an expression, I comply.

More than twenty years ago I procured the Quarto edition, and have used it constantly ever since. My pursuits in life have rendered it necessary to consult it frequently, as well as other works of a kindred or similar character, particularly Dr. Johnson's Quarto, of the latest and best edition, Richardson's Dictionary, Crabbe's Synonyms, and Horne Tooke's Diversions of Purley. In professional, political, and literary discussions, the turning point of the argument has often been the exact meaning of words, as ascertained not only from their use, but from their derivation; while in many cases, perhaps in the majority of them, the works referred to have failed to give the desired information, that of Dr. Webster has always furnished precisely what has been desired, and I have long felt individually indebted to the illustrious author for the labor and time he has saved me by his unwearied patience, profound learning, and unsurpassed industry.

It is unquestionably the very best Dictionary of our language extant. It is a model of copiousness and precision, and its great accuracy in the definition and derivation of words, gives it an authority that no other work on the subject possesses. It is constantly cited and relied on in our Courts of Justice, in our Legislative bodies, and in public discussions, as entirely conclusive.

It is scarcely necessary to add that such a work is a treasure which cannot be dispensed with by any one who would thoroughly understand and correctly use his mother tongue. It should be in every school in our land, that our youth may not be obliged, as I have been, to unlearn the false pronunciation, the unsound philology, and the erroneous definitions, which were taught me in my childhood.

The elegance and correctness of your edition—so cheap for a book of its size—one third of what I gave for the first edition—are alike creditable to your taste and enterprise, and worthy of the great work which will ever stand forth a monument of the science and literature of our country.

John C. Spencer.

"A Dictionary is the last book which a scholar ever wants to have *abridged*, the process being sure to cut off THE VERY MATTER WHICH HE MOST VALUES."—*Chronotype.*

MUTUAL FIRE INSURANCE.

THE MERCHANTS' & FARMERS'

MUTUAL

FIRE INSURANCE COMPANY.

Incorporated in 1846.

OFFICE, OVER CENTRAL BANK, 102 MAIN ST.

WORCESTER.

Is constantly receiving numerous applications from MERCHANTS, FARMERS, MECHANICS, and others desiring INSURANCE UPON BUILDINGS AND PERSONAL PROPERTY of the safer classes.

The Plan of Business adopted by this Company recommends it to all who wish to procure Insurance at moderate cost, and STRICTLY UPON THE MUTUAL PLAN. The following are some of the reasons that render this Company so acceptable to the Public:

1. Declining to insure Factories, Steam Mills, Carpenters' Shops, and buildings alike hazardous, from a desire to protect those who have safer property, from assessments to pay losses on risks much more hazardous than those of the Merchant, Farmer, and Mechanic.
2. Insuring Buildings or Personal Property, for ONE TO FIVE YEARS, to suit the convenience of such as do not wish to advance at one time so large a sum as is required to obtain Insurance in offices which do not insure for less than seven years: saving to the insured the item of Interest, which, upon the Premium paid on a Policy for seven years, amounts to one half the sum of the Premium.
3. Requiring only sufficient Premium to provide a Fund adequate to meet all probable losses; and a Deposit-Note of less amount than is taken by most other Companies.
4. After paying Losses and Expenses necessary to the economical management of the business of the Company, all surplus of Premiums is equitably divided among the insured, at the expiration of any Policy whether for one or five years.

This Company was Chartered in March, 1844, and commenced issuing Policies of Assurance on the 1st of June, 1845.

The well considered and invariable policy of this Company has been to prefer the SAFETY AND MUTUALITY of the assured to the showy advantages of a large number of Policies, and an imposing amount of Receipts. California Risks have been uniformly declined, and the multiplication of Policies in Cities considered especially liable to Cholera has not been encouraged.

The CASH PREMIUMS of this Company are calculated on the most approved tables of the probability of life, and at the lowest rates which are deemed safe.

JOS. R. BRYANT, No. 30 Causeway St., Boston.

[*Extract of a Letter written after the great fire in Portland, Me.*]

Jos. R. Bryant,—Sir: We send you one of your Safes; it has proved itself a good article, and has done better than any other Safe for the fire it stood.

We would like to exchange it for another, as we would not have any other kind of a Safe. It stood the hottest of the fire; and the Safe was as red hot as it could have been had it been in a furnace, and the books were in good condition when taken out. If you wish to make use of our name in the papers, you can do so, as we are perfectly satisfied with the Safe, and do not think it can be beat. Yours, &c., SAML. B. REED & CO.

The above Safe was in the fire from twenty minutes before twelve o'clock until nine o'clock next day, and the building in which it stood was entirely burned down. The Safe may be seen at the Manufactory.

A Good Safe.—The Safe of Samuel B. Reed & Co., made by Jos R. Bryant, of Boston, Mass., was taken out of the ruins of the late fire, red hot, and the books were preserved in good condition.—*Portland Advertiser, Nov. 5, 1851.*

Also, Gunpowder-Proof Locks, Iron Store Fronts, Doors, Shutters, &c.

46 & 48 Congress Street,

O. EDWARDS,
E. HOLMAN,
J. FERNALD,

BOSTON.

THE IMPROVED SALAMANDER SAFES have been before the public upwards of *twelve years*, during which time several thousands have been sold by the Subscribers, and in EVERY INSTANCE where they have been tested by fire, the results have given the most entire and complete satisfaction.

NEW YORK, 22d July, 1845.

Messrs. Edwards & Holman, Boston.

GENTLEMEN,—We take pleasure in informing you that our books and papers, which were placed in one of your improved Salamander Safes, were all preserved from the fire that consumed our store, 28 Broad street, corner of Exchange place, on the morning of the 19th inst., while letters and papers (of no great value) which were deposited in a safe built in the wall, were consumed.

The Safe made by you fell from the second story to the cellar, and was subjected to so great a heat that the knob and brass ornaments were melted off.

You will be pleased to send us one of your larger size, to supply the place of the old one, as soon as possible, and oblige

Your obedient servants,
COE, ANDERSON & Co.

FROM MESSRS. JOHN EARLE, JR., & CO., BOSTON.

BOSTON, March 13, 1848.

GENTLEMEN,—Having been located in the block on Washington street where the great fire occurred on Friday night last, and being made sufferers by the event, we have the satisfaction to find that the contents of our Safe, which is of your manufacture, have not only been preserved, *but are entirely uninjured.* It is our pleasure, therefore, to recommend your "*Improved Salamander Safes*" to the notice of the public as being *unquestionably* "safe," the fact of which we have fully tested.

Respectfully yours, JOHN EARLE, JR., & Co.

Testimonials similar to the above, from the following named gentlemen (together with several "Test Safes") can be seen at our Store, viz.:—Messrs. S. & H. Cutter, Thomas Whitmore, Henry Warren, James Boyd, Damrell & Moore, *Boston;* C. A. Paige, *Southbridge;* James N. Buffum, *Lynn;* John Cook, Jr., & Co., Tallant & Macy, George H. Riddell, *Nantucket, Mass.;* David Bugbee, *Bangor, Me;* John Mel, *New York;* Hewes & Cutler, *San Francisco, Cali.;* Charles H Hurd, freight agent, Michigan Central Railroad, Detroit. Others might be named, but the above are considered sufficient to satisfy the most sceptical that the *Improved Salamander* Safes are truly "*fire proof.*"

PATENTS. . . . AMERICAN AND FOREIGN OFFICE.

AGENCY FOR BUSINESS WITH U. S. PATENT OFFICE, WASHINGTON,

NO. 22 STATE STREET, BOSTON.

IN 1840 the Subscriber was appointed by the Commissioner of Patents, Agent of the U. S. Patent Office, in accordance with the 10th Sec. of Act of '37.

Having relinquished the Agency for the transmission of Models, and adopted a more expeditious mode of sending them to the Patent Office, *whereby a Patent may be procured about six weeks earlier;* he continues to forward them free of expense — to prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings for Patents; and to render advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, Inventors are saved the time and cost of a journey to Washington and delay there, as well as all personal trouble in obtaining their Patents. They also have the advantage of verbally explaining their inventions, and of consulting in respect to them; matters, in general, of paramount importance in order to obtain correct specifications and claims. The experience of sixteen years' practice, an extensive collection of rare works, decisions, &c., on mechanical subjects, the Patent Laws, and Patents of different countries, collected at much expense during the long time this office has been established, together with accounts here kept of inventions patented at Washington, enable the subscriber to afford to inventors, desirous of procuring Patents, assistance and information which in other respects might be difficult of attainment.

R. H. EDDY, Solicitor of Patents.

WASHINGTON, JULY 21, 1849. During the time I occupied the Office of Commissioner of Patents, R. H. EDDY, Esq., of Boston, did business at the Patent Office, as Solicitor for procuring Patents. There were few, if any persons, acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring Inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office.

MAYNARD & NOYES'

BLACK WRITING INK,

For Metallic, or Quill Pens.

The manufacture of this Ink was established in 1816, and the quality has now been tested by the public for THIRTY-FIVE YEARS. During this time it has been constantly increasing in public favor and patronage, and is now the leading article in the country. Those who may be ignorant of its superiority and reputation, are invited to read the following testimonials, and to make trial of it themselves. When the best judges, after using it twenty and more years, express themselves in one manner concerning its superior excellence, it is quite evident that no one *need* be troubled with *bad* Ink.

Bank of State of North Carolina, Raleigh, March 4, 1847.

Messrs. MAYNARD & NOYES: Gentlemen,—Your Writing Ink has been in almost constant use by the officers of this banking house for the last *fifteen years* and has always been preferred to any other brand. *It flows freely from the pen, and does not mould; and the color, though sometimes pale when first opened, becomes a beautiful permanent black.* I have been a regular consumer of it myself during this time, excepting when curiosity has led me to make trial of other kinds, and take pleasure in being able to speak so favorably of it, and trust that my opinion, founded on such long experience, will induce many who may not be so well acquainted with its merits to give it a trial.

Yours, respectfully, C. DEWEY, Cashier.

Messrs. MAYNARD & NOYES: Gentlemen,—We are happy in being able to say, that we entirely concur in the opinion expressed above of your Writing Ink, by Mr. Dewey, the Cashier of this Institution.

Respectfully yours, DUNN CAMERON, Pres.
S. W. WHITING, Teller,
D. DUPRE, Bookkeeper.

Boston, January 10, 1848

Messrs. MAYNARD & NOYES: Gentlemen, — It is now, I believe, more than twenty years since the School Committee passed an order for using your Black Writing Ink in the City Schools. I have used it during that period, and deem it a *first rate article*, and cheerfully recommended it to others. It *flows freely* from the pen, and increases in blackness after being committed to paper, and the color is *durable*. I know of no Ink equal to yours, and I have tried many kinds, both English and American.

P. MACKINTOSH, JR.
Principal of Writing Dep. Hancock School.

Office of Merchants' Ins. Co., Boston, Nov. 18, 1847.

Messrs. MAYNARD & NOYES: Gentlemen,—I have used your Writing Ink for the last sixteen years. In 1840, I gave you a certificate of its excellence, and having continued its use ever since, to my entire satisfaction, my opinion is confirmed in its superiority. *It flows freely from the pen, and is, in all respects, the best Ink I have ever used.*

GEORGE HOMER, Secretary.

Registry of Deeds, Boston, Nov. 20, 1847.

Messrs. MAYNARD & NOYES: I have made use of your Writing Ink for the Recording of Deeds, &c., the past *twenty-five years*, and having found it to suit my wishes and purposes entirely, take pleasure in renewing my testimonial of its superiority. From the appearance of the records in my office, I am satisfied it is superior to any I have used, and consider it particularly adapted for all purposes where *permanency of color is requisite or desirable. It flows well from the pen, and does not mould; and my oldest records prove its color to be unalterably black.*

HENRY ALLINE, Register of Deeds.

Boston Post Office, Dec. 4. 1851

Messrs. MAYNARD & NOYES: Gentlemen,—In 1843 I certified to the superior quality of your Writing Ink. I have continued to use it ever since that time, and take pleasure in expressing as I then did my entire satisfaction with it. It has now been used in this office more than twenty years. Other Inks have during that time been tested, but yours has been in every instance preferred. For *fluidity, blackness, and permanency, none has been found equal to it.*

GEORGE .WM. GORDON, Postmaster.

Bowdoin School, Boston, Dec. 10, 1851.

Messrs. MAYNARD & NOYES: I have used your Ink in the Writing Department of this School during the last twenty-four years, and feel pleased in being able to express the same favorable opinion of it that I did ten years ago. It flows freely from the pen, its color is brilliant and permanent, and it combines all the necessary and desirable qualities of good ink. It has given me such entire satisfaction for so many years, that I can strongly recommend it to all of my profession, who so much need a first rate article of writing liquid.

JAS. ROBINSON, Writing Master.

Boston, Dec. 2, 1851.

Messrs. MAYNARD & NOYES: I am pleased in being able to say that longer experience in the use of your Ink, and the occasional trial of other kinds, has confirmed the good opinion I some years since expressed concerning it. I have used it in my weekly preparations for the pulpit twenty-one years, and have found it suit my wishes *entirely*. Its peculiar excellence is that it becomes *blacker by age*, at the same time it *flows easily* from the pen, and is sufficiently dark to make what is written easily to be read *immediately* after it has been committed to paper.

Yours respectfully,
G. W. BLAGDEN, Pastor Old South Ch.
